### WORMS PLAY HAVOC WITH CABBAGE CROP IN LOCAL TERRITORY

Output Is Decreased as Result of Dry Weather Which Is Aiding the Pests in Their Work of Destruction in the Valley.

Worms are playing havoc with the Worms are playing havor with the Oregon cabbage crop into season. The continued dry weather is adding the pests in their work, and the yield is being reduced in all local districts. according to various reports. So extreme has been the shortage of cabbage in the local market recently that the trade has been again compelled to send to California for supplies. While the quality of the southern stock is not as good as might be desired, the trade considers that it is better than none at all is better than none at all. While in isolated instances local cabbage is selling in the wholesale market as high as 2% c a pound, the general price, both for the home prodct and the California stuff stands g at 2c. The outlook is for a firm market within the immedi-

EGG MARKET IS VERY POOR from California and many shipments sold above express charges. Naturally under such a condition shipments ceased but the improved feeling caused a renewal of shipments. Very poor market is showing for eggs locally, with liberal arrivals. One leading f. o. b. house reported this morning that it received over 100

cases of eggs yesterday, although it has been practically out of the market for two weeks. CHICKEN TRADE DRAGGING Trade in the chicken market is

dragging. Supplies are not heavy, but some offerings have been carried over from last week. The trade seems to lack snap in all departments. FIRST CAR OF GRAPES HERE

ENGLISH WILL TAKE RISK ON GRAIN FROM

THE ATLANTIC COAST

Chicago, Ill., Aug. 4 .- Two distinct features were noticeable in wheat at the close, when December and May were about best point for the day at about 216c net advance over Monday's close, while the September was 10 under best point of morning. The late action in the market was explained by some selling pressure in September, due to the large run of over 1000 cars to this market, coupled with the unusual money situation, while the later months feit the bullish

effect of prospective improvement in conditions for exporters. In the absence of selling pressure In the absence of selling pressure and helped by the news from Washington pertaining to the registry bill, and the cable news from the other side indicating that the British government will assume the war risks on open accounts for Atlantic shipments to English ports, the market shot up quickly for moderate volume of trade. Two hours later prices were back to 87½c September, 92c for December and 98½c for May. Then followed the closing strong rally for the late months, helped by firmness in the northwest and by the action in corn. Cash sales of wheat were limited to 10,000 bushels to mills. The big millers were reported active buyers millers were reported active buyers of wheat in the open Minneapolis market early in the day. World's visible stocks, according to Bradstreet's, increased 8,800,000 bushels for the week. War developments are closely watched by the trade, but they can have little influence on prices until there is an outlet for the accumulating stocks.

WEATHER AFFECTS CROPS

Ridgefield, Wash., Aug. 4.—As no rain has fallen in this section of Clarke county for nearly six weeks, many crops are shriveling and drying out. The dry spell exceeds that for many years. Heretofore during July there were small showers. Threshing there were small showers. Threshing of grain has now started and will be in full swing before the week ends. As the grain is so dry threshing is proceeding with great rapidity. On the ranch of John Anderson near here threshing was begun today. As a general rule the grain is in excellent shape and good yields are looked for. So far no fires have destroyed any grain, Much extra precaution of guarding against fires during the dry spell are being made, both in town and are being made, both in town and
