Years for Education.
From an early age Giuseppe, bred to sturdy outdoor life, displayed a bent for the priesthood—a bent that for the most part is religiously respected by Italians of the lower class.
The educational resources of his birthplace were soon exhausted and the industrious learnings demanded a wider field for their development.
He was sent to a college at Castel-Franco, and from there was transferred to the Central Seminary, at Padua, the world renowned seat of Italian learning.

FRANCE SUFFERS HEAVY LOSS!

New York state now had a bureau to deal with the unemployed.
There was a great difference of opinion as to the qualifications of Pope Pius X for his office.
His election, a compromise between the various powers, was a victory for the king.
While at first he was referred to as apostle, executive and reformer, in the later years of his reign there were many reports of dissensions among cardinals and factions in the church because of a lack of strength, of commanding power, and iron will.
Pope Pius' policy was the simplest.
His election resulted because a majority of the cardinals had wearied of diplomacy and its barren results, and longed for a Pontiff who would build up the unity of the organization.
Such is, the dioceses they ruled by bishops.
