

MINERAL RESOURCES OF OREGON ARE VAST NEVADA MAN AVERS

With Proper Development the State Would Have \$100,000,000 in Five Years.

RARE METALS IN QUANTITY

Iron, Gold, Platinum, Antimony and Thorium All to Be Found, Is Statement.

"The mineral resources of Oregon are beyond comparison with almost all other portions of the country but Oregon people seem to have no interest in them nor care a straw for their development," said C. W. Clapp, formerly of Reno, Nev., yesterday.

"Why, southwestern Oregon is a veritable Colorado. It is full of rich minerals waiting to be taken out and processed. The black sands of Oregon streams are full of gold, platinum and iron. Thorium and antimony exist in Oregon in abundance, as does nickel."

"Last year the United States furnished only a fraction of the world's nickel supply, yet Oregon and Washington alone with proper development could produce over half."

"Most of the world's platinum supply comes from the Ural mountains. Due to the war it has advanced in price from \$40 to \$60 an ounce. Oregon has enough platinum to supply the world."

"Thorium, used in coating gas mantels, is found in southern Oregon. It brings \$250 a ton on the market. The common every day stones you use between the streetcar tracks there in Portland are full of iron which can be drawn out by the new processes at \$25 a ton less than it costs to bring it from Pittsburgh."

"Antimony, used in the making of type, has advanced 300 per cent in the last 10 days. It can be produced for 6 cents a pound in Oregon and brings 22 cents on the New York market."

"If Oregon would wake up and begin developing these mineral resources she would have a production of \$100,000,000 a year within five years."

Mr. Clapp deprecates the work of the Oregon bureau of mines and geology.

"Painless" Parker Taking New Tack

Dentist Begins Equity Suit to Compel Dental Board to Produce Examination Data and Issue License.

Another tack was taken by Edgar R. ("Painless") Parker yesterday in his fight against the state board of dental examiners when a suit in equity was filed in Parker's behalf by Attorney R. A. Sullivan asking that the board be forced to produce all examination papers and data connected with Parker and to grant him a license to practice his profession. Parker first started mandamus proceedings to secure the same results but abandoned that method.

Parker alleges that he has twice taken examinations for a license and that each time he performed the work and answered the questions required in a manner which he deems worthy of a license. He charges the board with conspiring to keep him from securing a license because he violates the ethics of the dental craft by advertising.

Parker is represented in the present suit by the legal firms of Mannix & Sullivan and Giltner & Sewall and by Attorney John F. Logan.

Naval Fighting in North Sea Reported

Only Long Range Shooting Has Occurred; German Submarines Said to Be Planning Dash.

London, Aug. 15.—Desultory fighting between British and German warships in the North sea was reported today by the official war information bureau.

It was stated, however, that "no losses are reported or claimed," only long range shots having been exchanged.

"A certain liveliness is apparent in the southern area of the North sea," said the bureau's bulletin. This was interpreted as forecasting a dash by German submarines and destroyers.

COUNTY COURT NEWS

Oids, Wortman & King submitted an offer to hang tapestry and a large flag in Circuit Judge Morrow's courtroom to correct the defective accounts for \$188.70. The offer was placed on file.

Notice of the acceptance of an offer by the county to oil the roads on the Gresham fairgrounds at \$1.50 a barrel for oil distributed was given by the Multnomah County Fair association.

Deputy District Attorney Murphy, in answer to a request from the Herzog Iron Works for settlement of their claim on their courthouse contract, notified the board that the Herzog claim must await adjustment of the claim of A. J. Capron, the original contractor, whose contract was taken over by the Herzog company.

The proposed settlement with Biagio Monaco, a laborer injured on the Columbia River Highway, was once more referred to Roadmaster Yeon with a recommendation by Deputy District Attorney Murphy that \$58 be deducted for physicians' bills as Monaco left the hospital without his discharge.

Whidden & Lewis, architects of the courthouse, submitted plans and specifications of the courthouse for use of the "bug juice" investigating committee, stating a complete set will be furnished later.

Julius L. Meier and others petitioned for improvement of the road from Chanticleer to Rooster Rock. The petition was referred to Roadmaster Yeon.

R. A. Weidman of Fairview was allowed \$275 indemnity for 11 cows slaughtered because of tuberculosis, the county to pay half and the state the remainder.

Gin Coming to New York.

Fear that the present European war would prove such an interruption to commerce as to halt the importation of foreign wines and liquors is mitigated to a slight extent in the announcement at New York that 10,000 cases of gin are now en route from England to this country.

GRAND OPENING OF THE RE-ORGANIZED BON MARCHÉ

With Interest and Eager Interest Portland People Will Read the News of This Great 13-Day Sale

A 13-DAYS' EVENT THAT WILL MAKE HISTORY
