BELIEF IN NECESSITY OF WAR IS FALLACY.

Coming of Universal Peace Is Predicted in Address Made Before Rotary Club.

AMERICA SHOULD

Duty of This Country in Demanding Abolition of Warfare Declared to Be Manifest,

Business men stood with bowed heads when at the Rotary club luncheon in the Benson hotel yesterday, Dr. John H. Boyd, chairman of the day, led" a prayer for world peace. The sang together "America" and listened to selections by the Congregational choir, then to an address by Rev. Frank L. Loveland, pastor of the First Methodist church, whose subject was "Universal Peace" and who said, in

A world in which there is no war, is the ideal world. Prophets and seers, from Isaiah and Paul to Victor Hugo and Leo Tolstoi have dreamed

When the war drums throb no longer And the battle flags are furled
In the Parliament of Man.
The Federation of the World."
I believe in this coming universal
peace. Humanity by divine help will

War Relic of Barbarism.

With wise shakings of the head we are informed that man is naturally a fighting animal, that he loves war as he does money and women, that war drums and explosives are in his brain, that battles boil in his blood, that by heredity he is a warrior, that war paint of this measure, that such amount will come nowhere near counterbalancing the amount which now escapes taxation entirely, such as bonds, mortgages and money in and out of banks, and other personal property which is not in any sense patent to the eye of heredity he is a warrior, that war paint heredity he is a warrior, that war paint is his favorite color, that he instinctively reaches for the tomahawk and butcher knife; therefore war will coexist with the race.

Such ideas belong to the age of the world's barbarism. They are belated.

They belong to the carboniferous era of governmental evolution. They are the bony old hags rising from the past with garments dripping with mildew and emitting the odors of by-gone senulchres. They are unworthy of the twentieth century. They are damned and should be forgotten.

America should, and must lead in the workingman never has much property that can be concealed from the east of the twenty that can be concealed from the east of the sensor. I can't see why a small home owner or workingman would be opposed to it under any circumstances. It is a notorious fact that the wealthy do not pay in proportion as compared to the small home owner. This measure would equalize the burden. I will America should, and must lead in overthrowing militarism, and consign to the eternal discard the fingo, the wap-college and the military expert, and must lead in-

Abolition of War Demanded. These are the real enemies of world progress and peace; these look at the world through the bore of a gun. Any nation is doomed, as Europe is prov-ing, that gives itself up to the leading of war lords and military experts, livered from yellow newspaper jingolsts and builders of battleships.

America must emphasize the neces-America must emphasize the necessity of a realization of a new cosmic civilization. The time of the universal is here. Science, commerce and Christianity are insisting upon unity. By consent of all schools of thought this universe has one history and one destiny. Matter, force, life, humanity, are all one—injury to any part is harmful to the whole. Even religionists and theologians are now compelled to admit that God is not local. Our universities, our seminaries, our commercial centers, demand the abolition of war as a racial necessity of the war as a racial necessity of the

America must accentuate the altru-istic forces that are moving for world peace. The heart of humanity is cry-ing out against the inhumanity of war. Love of battle is being counter-acted by hate of blood. The glory of war is being offset by its shame. America Must Be Leader.

America must lead the way in this great work for world peace. From the

of nations has blessed us above all the nations of the earth. The responsibility of leadership is upon us; we have shattered the scepter of the tyrant and broken the shackle of the slave; we have torn the diadem from the brow of emperors, and placed the scepter of authority in the hands of the people. We have undertaken to lead the human race from the slough of despondency to the delectable mountains. We must make good our glorious promises. The eyes of the world are upon us. We must not fail. We will not fail.

Why should not American civilization now make the first decisive move for a United States of The World.

There is a spring on the Columbia

There is a spring on the Columbia highway near the scene of the work or Good Roads day, and yesterday it was voted this spring be named the "Ro-tary-Ad Fountain," the inclusion of the Ad club being an honor conferred because this organization Good Roads Day, April 25.

FAVOR OF HOME TAX EXEMPTION MEASURE

Best Piece of Legislation for Masses Ever Proposed" Says Electrical Worker.

The \$1500 home tax exemption measre to be voted upon next month is receiving the unanimous support of small home owners and workingmen throughout the entire state. How some Pacific coast manufactories, but that of them feel toward it is shown in

the following statements: peace. Humanity by divine help will work the subsoil out of its system and become less and less like the beast, and more and more like God. This must be or the very creation of humanity was a piece of colossal idiocy.

Some insist that such an ideal of world peace is a delusion, with no more foundation than the "baseless fabric of a dream." They tell us that wars always have been, therefore always will be—that men must fight as well as labor to exist—that war will see that men must fight as well as labor to exist—that war will greatly encourage me to make further E. E. Southard, Fortieth and Powell greatly encourage me to make further of this measure, that such amount will come nowhere near counterbalanc-

> not in any sense patent to the eye of the assessor, R. O. Rector, 975 Gladstone avenue, contractor and carpenter-This would certainly help the small home owner. The workingman never has much prop-

to the small home owner. This measure would equalize the burden. I will pay taxes next year on lots valued by the assessor at \$1325 and improveexemption on the improvements and and we should have done a great bustcannot have more than one-sixth added to my land taxes, it is only a matter of a little figuring to discover that our products and all our skins must be I will be ahead several dollars if put on the local markets. An overthis measure passes.

Electrical workers are almost unanimously in favor of the passage of this measure, for we feel satisfied that it is the best piece of legislation for the masses ever proposed in Oregonit sure is. The Journal will deserve the gratitude of the people if it aids to secure the home exemption amend-

J. L. Ledwidge, business man-Any one in sympathy with the working in support of the measure. It is people cannot but sympathize with this home exemption measure. It will help every line of business in the city, and make a demand for every kind of labor. My business brings me in contact with working people every day and nearly all the time. They are and nearly all the time. They are going to vote for it, and I believe and hope it will carry.

E. E. Smith, electrical worker .great work for world peace. From the beginning we have been pre-eminently a nation of peace, that is why the God men of this city. Every one I know
