the barrel must be removed from the stock. Inside of a case the gun may be carried in one piece or broken in two, just as the shape of the case permits. The weapons must not, however, be ready for firing. The extreme penalty is 60 days in jail or a fine of \$200.

NINE OUT OF TEN Here's the Reason Why Read Carefully. Consider the makes—the time-honored instruments included in this great sale—and the prices, and you will wonder why nine out of every ten pianos sold do not come from Eilers. We are certainly proud of this selling record. It means better times coming. It spells prosperity, and Portland is proud of it. There is not a thinking business man who calls at our store but states it is something wonderful. True, it is, the manufacturers are making prices never before heard of. More high-grade pianos have been sold here during the past several weeks by three times over than were sold throughout the entire state by all piano merchants combined; and October is going to far exceed September. In fact, up to today we have nearly reached our September record. That means an increase of business in October of 25% or more.

Two Great Sales in One The greatest distribution of fine pianos ever undertaken in the west. The Manufacturers' Emergency and Surplus Sale at Eilers Music House, combined with the residue of the costliest styles of pianos from the Soule Bros. failure stock. As announced in the papers heretofore, the cheaper styles were sold by Lore at 388 Morrison street, but the thinking people who look ahead would not buy the expensive instruments and take chances unless they knew some responsible firm would stand back of the transaction. Thus another business opportunity came along. We secured 44 of the really and truly high-grade pianos. Hence, the double event. We are now selling through the factory representatives, Ellsworth, Barnes and Davey, the big stock of all new pianos which the manufacturers have agreed to sell for us, they paying all of the expenses connected with this sale; you can also purchase with perfect safety the high-grade pianos from the Soule Bros. failure stock, which was authorized sold by order of the court.

New Fall Hats \$9.75 In the Millinery Salons, on the Second Floor An especially interesting group of beautiful new Trimmed Hats decidedly underpriced for Thursday's selling. Women who seek exclusiveness at a moderate price will find many pleasing styles in this wonderful assortment.

Piano Quality at Lowest Prices. This has made the record-breaking campaign so successful. Eilers Music House has always been noted for selling the best and highest grade of pianos manufactured. The nation's most honored names in the piano trade are here. Quality is and should be the first consideration. The enormous business of Eilers Music House enables them to supply the higher grades for less than the old-time dealers ask for cheap or medium grade pianos.

Seventy-Two Out of Every Hundred Pianos. in the state came from Eilers Music House. This is a broad statement, and one that should have consideration, for we are only too glad to prove any statement we make at any time. Any thinking business man or woman knows that quality pianos can be distributed for less per piano in large quantities than in smaller quantities. Thus the Eilers quick sale method and little profit per piano policy accomplishes these wonderful results.
