Vancouver Marriage Licenses. Vancouver, Wash., Oct. 29 .- Marmade in these columns that the only effect that the European war would have upon the price of coffee would be to lower values to an extreme low level. Such announcement has been fully justified by the facts. The price of coffee today is from 2c to 4c a pound lower than then, and the situation continues to show much weakness.

Sary, another heavy drinker, together with the fact that the crop is a big one and that financial backing is at low ebb in coffee producing sections, indicates that there is not likely to be any improvement in the price of coffee, at least for some extended period.

This will be true especially of the milder grades of coffee. The situation continues to show much weakness.
