

APPROPRIATION NOT SUFFICIENT TO CARE FOR STATE INSANE

Report of Supt. Steiner Recommends Completion of Receiving Hospital.

NUMEROUS NEW CASES

Parole Law Asked, That Patients May Be Treated at Their Homes.

(Salem Bureau of The Journal) Salem, Or., Oct. 29.—In his biennial report to the state board of control, filed today, Superintendent Steiner, of the state hospital for the insane here, says that the per capita cost per month, for each patient, which includes clothing, food, nursing and medical treatment was \$14.83, or 48 cents per day. Dr. Steiner urges the necessity of completing the receiving hospital, so that male patients can have quarters there. It is now available for women patients only.

The report shows that on October 1, 1912, there were 1152 male and 552 female patients, a total of 1704 in the asylum, and that there were remaining at the end of the biennial period, September 30, 1914, 1914 males and 527 females, a total of 1576. During the biennial period 225 patients were transferred to the new eastern Oregon hospital, 155 escaped and 82 were recaptured, 221 recovered their reason, 192 were discharged as much improved, 113 were discharged as not improved and 101 were discharged as not improved.

Figures for Year. During the biennial period 774 males and 474 females, a total of 1248, were received. A total of eight, five males and three females, were committed as not insane and 293 patients died. The total number of those transferred, discharged, died and escaped during the term was 528 males and 400 females, a total of 928, and the total number under treatment during the term was 2067 males and 1927 females, a total of 3994. It is pointed out in the report that 1248 patients were received during the term, but 67 less than the number received during the preceding biennial period, despite the fact that the eastern section of the state had been cut off and sent patients to the new hospital at Pendleton. When the legislature made its appropriation for the term on a daily average of 1500 patients, while the daily average was 1529.22. This naturally caused the funds to be inadequate.

Causes of Insanity. Some interesting statistics are given as to the forms of insanity, one item being that 55 cases are classed as alcoholic, being due to the use of liquor. In this class are 31 males and 24 females. According to the commitments, only seven cases of insanity were due to love affairs, while religion caused 12 to lose their reason. Work caused 73, and other reasons four. Overwork was blamed for 11 cases and ungovernable temper for four. What caused insanity was unknown, according to the commitments. Although led in the list of the admitted, there being a total of 612. The patients born patients admitted totaled 741 and those foreign born 1195.

The report deals at some length with the occupation and amusements of the patients. Basketry, rug making, needlework, fancy sewing and laundry work formed the principal indoor occupations of the women and there was heavy picking and other work on the outside. The men were engaged in agricultural and other pursuits.

No one was forced to work against his will, it is asserted in the report. "We have found that almost every patient can be taught or persuaded to do something helpful if proper tact is employed," says the report.

The attendants are not permitted to be brutal, it is asserted. In discussing this question, it is urged that stringent laws should be passed for the punishment of attendants who mistreat patients. If there is any evidence that an attendant has mistreated a patient the attendant is promptly discharged, it is stated.

Asks Parole System. It is urged that a law should be passed making it possible to parole patients. It is asserted that under the present law this is impossible, and many harmless patients could be cared for at home, at least part of the year. Eighty-three patients were deported during the year, effecting a saving of \$143,832, based upon a life expectancy of 19 years. Seventeen of the patients were deported by the federal government.

Expenditures for the biennial period totaled \$545,699.07, leaving a balance of \$68,514.47. Maintenance totaled \$543,722.07.

A large amount of dental work was done during the year and much good reported, the report says. A total of 1198 patients had their teeth fixed.

New Measures Are Considered by Club

Anxious that its members shall be informed on the measures submitted for vote November 2, the Rotary club devoted Tuesday's program in the Benson hotel to the subject and unanimously voted to use next Tuesday's luncheon program in the city hall. E. Steiner, local member of the club, in discussing the measures, said that citizens in order to vote intelligently will be forced to study closely, and that many of the measures seem to have been addressed by one class of people to another, the "small home owner" particularly. The club has arranged to contribute to charity this year through a performance of the play "Mother," at the old Heilic Theatre, Tuesday night.

To Make Hairs Vanish From Face, Neck or Arms

Keep a little powdered delatone handy and when hairy growths appear make a paste with some of the powder and a little water, then spread over hairy surface. After 2 or 3 minutes rub off, wash the skin and it will be entirely free from hair or blemish. This simple treatment is unsailing, but ears should be exercised to be sure and get genuine delatone, otherwise you may be disappointed. (Adv.)
