

**CHRISTIAN SCIENCE CAN BE APPLIED TO EVERYDAY PROBLEMS**

This Is Statement of Bicknell Young, C. S. B., in Lecture Last Evening.

**BIG AUDIENCE PRESENT**

Crowd Is So Great That Many Were Turned Away, Being Unable to Find Standing Room.

An audience of more than 1500 people listened to Bicknell Young, C. S. B., lecture on Christian Science at First Church of Christ, Scientist, last evening. Many were turned away after all seats and standing room was taken. Mr. Young will repeat his lecture to night at 8 o'clock. The church doors will open at 7 o'clock.

Mrs. G. H. Watson, who introduced Mr. Young last night, said that Christian Science is a demonstrable science that can be applied successfully to every day problems, whatever they may be. A necessary requisite to its demonstration she said is honest and earnest study of the Bible and the Christian Science textbook, Science and Health.

The lecturer spoke in part as follows:

"It takes a great deal of instruction to convince the average human being that the word 'God' does not mean something remote or inaccessible. Now we can think of a deity which is not a being. These ideas reveal power because God and power are one. They are God with us, and therefore power with us. On the other hand we can think of our bodies, and as a matter of fact we think of them a great deal too much. Nevertheless, so long as that is our tendency, it might not be difficult for us to recognize that the true thought of what God is may affect our bodies, since some kind of thought is doing something to our bodies all the time. We walk because of mind; and talk and think, and wink our eyes, because of mind, and do everything 'so we are doing because of mind, and we do absolutely nothing because of matter, for matter cannot think nor talk nor walk by itself when thought is absent."

**2nd Object Stated.**

"To recognize the nature and action of thought is educational. To arouse or awaken a human being to the necessity for correct thinking and the power to attain it as a habit, is the object of all true religious and philosophical endeavor. For this reason it is universally recognized that in order to produce good moral results it is necessary that moral teaching should be carried on, and in accordance with this necessity people are taught to guard themselves against evil thoughts, whether audible or silent. Is there not the same necessity to guard against the thoughts of disease? What must then be the conclusion as to the present effort made through the press and elsewhere to instill the belief of disease into children, and others, by means of processes that are called education?"

**Sanitary System Established.**

"Jesus stated this fact more strongly than anyone else could, and Christian Science practice has proved conclusively that to the extent that the human mind is emptied of fear, malice, envy, hatred, revenge, evil thinking, evil speaking, and all the beliefs of vice and sin and disease, just to that extent is a sanitary system being established. And furthermore, Christian Science has proved in innumerable instances that when a system of hygiene, purely mental, is established, all of the world's hygienic requirements are more than fulfilled, and just in that proportion also is the law of health unobtainable and permanently established, both individually and collectively."

"The human body never gets ill because of any inherent capacity to do so. To put it another way, the human body does not know enough to suffer. Deprived of mind, it never suffers. In 'Science and Health' and her other works, Mrs. Eddy has most clearly set forth the fact that it is the human or mortal sense of things that suffers. The mortal mind, so called, is a mortal sense which enabled thousands of people through her books to prove that immortal mind heals."

**Mind Is Infinite.**

"The object of this is often to the effect that you cannot think thought without a thinker, and this contention is based upon the supposition that a person is a thinker by means of a mind which he contains. Christian Science shows that mind is infinite, cannot be contained. The divine mind is the primary and only thinker. When we return to this truth that mind, which Mrs. Eddy in 'Science and Health' declares to be the only mind of man, then what we call our mind will be so purified and regenerated as to manifest the omnipotence of good in healing the sick as well as in saving the sinner."

**The divine mind, as we apprehend it more and more, means to us necessarily the very name of originality. There is no limit to the possibilities of the enlightenment which the study and practice of Christian Science entails. For this reason no formulas are possible in the mental processes of Christian Science healing.**

**Woman Was Inspired.**

"We are apt to think of revelation as something imposed upon us by God, but a more consistent understanding of the word shows that its meaning is best apprehended when one understands its naturalness. The Mary Baker Eddy was inspired when she discovered and set forth the truth of Christian Science cannot be doubted, and yet that inspiration, that revelation, required first receptivity."

"It was this readiness, this ceaseless responsiveness to divine mind which characterized her whole career and made her the leader of the most far-reaching religious and scientific movement that the world has known. It was this same responsiveness which has made Christianity a science resulting in such untold benefits to mankind that thousands of people spontaneously reverence and love the discoverer and founder of Christian Science, Mary Baker Eddy."

**Patterson's Skull Fractured.**

Roseburg, Or., Nov. 20.—Walter Patterson, a well known local grocery clerk, sustained a fractured skull Wednesday night when a buggy in which he was riding overturned about 17 miles west of Roseburg. Mr. Smith, who was with him at the time, escaped unhurt. Patterson will probably recover.

You Save \$5.15 or \$7.15 On Each Suit in This Sale.
