Egg prices lost another cent in the Front street market today with case count down to 24c and candled offerings generally quoted at 25c a dozen. Receipts of eggs continue to show an increase in the trade here and the

that this season's eggs to date have been far the best ever received by the trade. The loss in canding is non-inal. Country interests seem to have realized at last that it does not pay to hold eggs away from market when offerings begin to increase and shipments are therefore more regular than

REMAIN IN BUSINESS

That They Are Opposed to Regulations Which Would Simply Cause Them to Quit Business.

The introduction of another bill in the state legislature to regulate commission houses of this state is evidently not in favor among country shippers, notwithstanding the fact that an increase in the trade here and the loss in the price today was caused by the inability of the trade to unional promptly at former prices. This is absolutely necessary at this period of the season because all expectations are for gradual defines until the low point is reached.

One of the best signs of the times is the promoters of the bill allege that it is in the interest of the farmer.

According to letters received from the country by Front street interests, farmers no longer desire to add additional burden on their agents, the commission men. They realize that after all they are the ones who will be compelled to bear the burden.
