Majestic's Bill Has Quality, Quantity

If the Majestic is not the most pop-ular picture theatre in town this week it will not be for lack of quantity and quality. Many of the managers recently have been showing almost an entire bill of short pictures in addition to a five or even six reel feature, but the Majestic has gone them all one better and is showing a double bill of two long features, "Anna Karenina," with the "royal actress," Betty Nansen, and "Officer 666," as produced by the

George Kleine company.
In the trying role of Anna Karenina, Miss Nansen only fulfills to a greater extent the wonderful promise of her first screen appearance. She is a woman of rare beauty and rare dramatic attainments whom it is a delight to see act. Her principal support is Edward Jose, who gives a striking per-trayal of the stern minister of state. The story is Russian and the snow scenes are not the least interesting in

the picture. Howard Estabrook is featured as Travers Gladwin in "Officer 666" and is highly satisfactory. The entire performance is up to the Kleine standard and is brim full of fun from beginning

#### Theme of the Devil Highly Interesting

One of, if not the best, Mutual Masterpictures yet released is "The Devil." the Columbia's attraction. The picture is an interesting one for its theme and its portrayal. The evil in human thought is personified by a man, the devil in disguise, and throughout the story the temptations and the thought processes by which two people stray from the path of honor are pictured as

actual happenings. The devil is ever with them, arranging situations to hurry them on their way and break down their desire and resolve to do right. In the end, because they do yield to his tempations, the devil loses his chance of salvation and returns to his nether regions where the man and woman he has tempted join the lost souls the moment they really step aside.
