Expert Advice to Swat the Rooster

It'is not necessary for a rooster to he among hens in order that their laying qualities may not be curtailed. The rooster, it is advised, should be says J. R. Mohler of the federal buallowed with the hens only during the breeding season, and eggs that are intended for hatching purposes should by farmers living in sections where be fertile, as the infertile ones will not hatch. Fertile eggs spoil very the effect poultry seem to like it and quickly when subjected to the ordinary eat it freely. An analysis of feterita methods of handling on the farm and seed is as follows: when marketed during the hot summer months under adverse conditions. In- ether extract, 3.46; protein, 14.06, and fertile eggs will keep in good condition in temperatures which will cause in some localities, inasmuch as it is not necessary to the laying qualities of a hen that a rooster be maintained is undoubtedly comparable to mile or covering. in the flock. Moreover, his presence during those months means fertile eggs, which mean bad eggs, and the consequent loss to the producer and to the consumer.

Big Egg Contest Goes Merrily On

Northwest hens appear to be strivmay be seen by a perusal of these colseason opened quietly, with a little one part wheat bran, one part mid-hen from Newberg claiming the hon-ors. Then "Dad" Casaday and his White Wyandotte jumped into the ring, followed by half a dozen others, and Incubation As Is the race was merrily on. This week Black Minorca, owned by Mrs. C. E. Hamilton of Prescott, Or., comes to the front with a well shaped egg measuring six by eight and one-half inches. But the honors must go to Mrs. Salome Michel of Hillsboro, for she has among her flock of hens a White Leghorn pullet, 10 months old, that has been giving her eggs measuring eight by six and one-half inches three times a week. The eggs are on exhibition at 394 Jefferson street, and can be seen at any time.

Testing Duck Eggs.

other, rest assured that they contain ducklings. It is during the last stage of three or four weeks the chicks put or rather, during the latter part of the hatching period that a duck egg appears as described above.

Overfeeding is more dangerous to not moisten the cags with warm young chickens than underfeeding, water, as is a common custom, just says the United States Department of before the chicks are hatched. Chicks Agriculture specialists in poultry that cannot break the shell without

Use of Feterita As a Poultry Food

So far as known, no experiments have been conducted in which feterita has been used as a grain for poultry, real of animal industry.

Occasional comments have been made some of this grain has been raised to Moisture, 8.29 per cent; ash, 1.78;

nitrogen, free extract, 70.22 per cent. From this analysis it appears, says

kaffir, 10 bushels of it being equal to

Wheat is usually considered quite an ssential part of the scratch part of the ration that is of whole or grains.

A good food could be made of three parts cracked corn, two parts barley, one part oats or wheat and one part feterita or milo maize. This scratch ing this year to smash all records for mixture would be fed with the mash big eggs, and that they are succeeding or ground grains ordinarily used with any scratch mixture. A good mash umns for the past few weeks. The may be made of two parts cornmeal,

Practiced in China

John Chinaman had a method of hatching eggs artificially many generations before there were any white men in America to begin to think about providing a mechanical substitute for the mother hen, according to the American Boy. And John Chinaman is still using his ancient method and refuses to purchase the new fangled inubator. The Chinese poultryman takes a quantity of unhusked rice which he has roasted. This is heated until it is Duck eggs are very easy to test, be- lukewarm. A three inch layer of cause the shells are, as a rule, very warm rice is spread into a tub, and a At a certain stage of incubation, layer of eggs is placed thereon. Ana duck egg presents a rather strange other layer of rice is added and anappearance, especially to one who is other layer of eggs and finally a last not familiar with such matters. If layer of rice over the fifth layer of the shells appear to be nearly half eggs. About 500 eggs are placed in a empty, don't get excited. That is the tub. Once each day the eggs are reway they should be. If they are very moved, the rice heated and the whole dark at one end and very clear at the repacked. The tub is kept well cov-

Single Mating of Poultry Advised

By J. W. Scott. Much has been written in regard to he care of poultry, from the chick to the laving hen, but there has not been one article explaining the single mating system, which, in my opinion, is very essential in the raising of poul-

Thousands of poultry raisers can not define what constitutes single mating, in order not to interbreed your flocks, which you will do if you fail to understand the single mating

In the first place, do not breed the same hatch, generally called brother and sister, after the second hatch, which would be interbreeding. After that, you can use for breeding purposes the cock bird of the first hatch and the pullets of the second hatch. and the cockerel of the second and the hens of the first hatch. Leaders Pollow Course.

This single mating system can carried on from generation to generation, and it is highly satisfactory, therefore, to find that "the men who set the pace," the real leaders in the poultry business, are following the same wise course with equal success, Now, in order to carry on this system, you must start out right by getgood, first-class foundation stock, no matter what breed you start with, in order not to get your stock

Keep Records.

When you are ready for breeding, all you have to do is consult your book and record, and when you do your mating, you will have no trouble in following the single mating sys-All the leading poultry raisers of

the country are discarding the double mating system and following the single mating system. If poultry raisers will only adhere to this mating system, they will not have to send away for new stock year after year, as a great many do here in Nevada. This system produces better and stronger chicks than any other system. Keep the money at home and pay it to yourself by following the system laid down in this article, but be careful to keep a cor-

For the Brooder

A stone jug or crock filled with hot water makes an excellent heater for the brooder. The size will depend on the area of the brooder and the number of the chicks. A one-gallon jug is large enough for a brooder of 50 chicks.

Cover the jug or jar with three or four thicknesses of flanned, stretched smoothly and sewed or pinned in Mobiler, that feterita might be used to place. This is important, as if the fertile eggs to rot. The department advises that on May 1 all male birds be either killed, sold, or confined until December 1 or as late as January in the average analysis of wheat.

Mohler, that feterita might be used to place. This is important, as if the wrapping is loose the chicks will work into it and smother. A still better way is to have a circle of winds mesh in the average analysis of wheat. According to a circular of the bu- wire screen around the jug so that the reau of plant industry, the grain itself chicks cannot get in contact with the

CONFISCATION OF ALL **GERMAN PROPERTY IN** ENGLAND DEMANDED

Lord Beresford and Most Influential Papers Support the Move.

London, May 15 .- (I. N. S.) -- Confiscation of German owned property in Great Britain valued at more than \$1,000,030,000, was demanded today by England's most influential newspapers. Lord Beresford is supporting the movement and doing everything in his power to accomplish this end.

While the internment of Germans and Austrians continued today, outbursts occurred in many quarters. Scores of arrests were made. A number of Germans on their way to police stations to surrender were set upon and badly

kets, saloons and shops were attacked. A great mob in Tottenham fought with the police for an hour before it was finally dispersed. - Dozens of arrests were made. A German proprietor of a jewelry store complained that the rioters had

removed everything of value from his

shop. Then they beat him up. German appeals for protection to the American embassy continued today. Public clamor for "one treatment" of all Germans is one of the most perplexing problems now before British officials. Several members of the government are Germans. Sir Edward Speyer and Sir Edward Cassell, Germans, are members of the privy council. Both are muitimillionaires and warm personal friends of King George.

German Property Destroyed. London, May 15 .- (I. N. S.)-A Johannesburg dispatch to Reuter says:

"In the last 36 hours mobs have resumed the destruction of everything German or apparently German. Police and troops have been called in and now have command of the situation. "The wrathful outburst of Wednesday seemed to infect the entire country and other centers like Port Elizabeth, Durban and Bloenfontien quickly followed Johannesburg's lead. "One of the incidents of yesterday was the wrecking of three suburban houses belonging to Herr Rosendorff, brother-in-law of Sir George Ailen. The contents of houses and stores

were burned." From Capetown comes the news rave anti-German rioting in some of the principal towns of the union, accompanied by wholesale destruction of German property. The total loss is estimated to exceed \$5,000,000.

Africa to Intern Germans.

Pretoria, May 15.-(L N. S.)-Following the example set by England the Union of South Africa decided toto intern all enemy aliens of a military age. The arrest of unnatural ized Teuton citizens already has start-Naturalized Germans and Austrians will be given full protection, but will be warned to do nothing that will excite the public.
