> What Commercial World Teaches. In the commercial world the methods are constantly being altered to meet every new condition In other words, the methods adopted by suc-

cessful commercial enterprises are only those that can live under the rule. of the survival of the fittest but in public affairs we notice periodical upneavals in contrast to the gradual and almost daily change of commercial life, and after one of these upheavals affairs settle back into slumber and those new methods which have been thus adopted not only remain just as they were installed, but are very apt not to receive from time to time the corrections and adjustments which they should receive. Too often they are permitted to become inefficient and worthless by gradual disuse and neglect. The only remedy for this state of affairs that exists is that the public should, like private enterprises, choose their officials for their qualifications to perform their particular duties and not entirely for their personal popularity.
