The option advanced a cent a bushel and carried September up %. The pit crowd fought the advance, but a heavy short covering move-

Corn prices were practically unchanged at the outset. The trade was small. The pit crowd was inclined to the short side but offerings were light. Some commission house buying in the later trading caused a firm tone. The market reflected some of the strength in the southwest.

Outs were ½ to ½ higher at the opening. The strength in the market was due to scattered buying, presumably for cash interests. Provisious were weak. Range of Chicago prices furnished by Over-beck & Cooke Co., 216-217 Board of Trade building: High Low Close.

Notes Just Issued Absorb Old Debts

To cancel outstanding notes now held by the banks, the Portland Union Stockyards company yesterday issued \$110,000 in three year gold notes which were absorbed by the Lumbermen's Trust company. The notes are secured by an agreement which constitutes a mortgage lien upon \$300,000 worth of stockyards company property.

The mortgage agreement was filed yesterday with the county clerk. It was signed for the stockyards company by W. H. Daughtrey and O. M. Plummer and for the trust company by John A. Kesting and F. H. Hollenbeck. By the note flotation, all the stockyards' obligations incident to the stockyards' obligations incident to the extension of its facilities are consolidated into one, at an interest rate of 6 per cent.

ST. PAUL BREAK ONLY FEATURE IN N. Y. STOCKS

Copyright, 1915, by the New York
Evening Post.

New York, July 2.—(U. P.)—Except
for a sharp break in St. Paul—based
partly upon "flividend rumors," which
attach themselves alternately to most
railway and industrial companies nowadays, and partly on, an unfavorable
statement of the company's May earnings—the stock market was as meaningless today as yesterday.

As a rule, prices recovered about as ingless today as yesterday.

As a rule, prices recovered about as much as they declined yesterday, but in the main the changes were unimportant. London continued to sell moderately, as was witnessed by the number of bond sales.

The cotton erop estimate of yesterday was reflected in Europe's cotton markets by a sharp decline in prices: day was reflected in Europe's cotton markets by a sharp decline in prices; but in our own by a prompt recovery. This showed a somewhat interesting difference in the point of view. The wheat market is in a hardly less perplexed condition. On one side stand undoubted injury to winter wheat (the scope extremely uncertain) and signs of renewed foreign buying. of renewed foreign buying; on the other, the belief that, despite this damage from unfavorable weather, the government's forecast for the total wheat yield next Thursday will be higher than that of a month ago.
