

HEALTH INFORMATION AMONG LABORERS IN CITY WORK SOUGHT

City Health Officer Marcellus to Find How Many Men Have Been Ill, TO TACKLE GERM ISSUE

Effect of Breeding the Soil Upon Epidemics To Be Ascertained, If Possible.

What may result in health information of interest all over the country is a campaign now being conducted by City Health Officer Marcellus to find out how many city laborers have been ill during the past two years and what is the nature of their illness.

An example of what the investigation may result in is that the statistics secured may prove or disprove the commonly accepted theory that breaking the soil sometimes results in an epidemic of communicable diseases, such as diphtheria or scarlet fever.

It is believed that no records have been kept of the nature of the illness occurring among certain classes of laborers, such as street cleaners.

Information from some 500 laborers in the departments of public utilities, public affairs and public works will be secured.

The ambulance division answered 21 calls and made 159 visits.

The city bacteriologist made 502 examinations during the month.

The sanitary inspection work, 1070 inspections were made, 287 complaints were registered by citizens, and 783 complaints by inspectors.

Under communicable diseases, 20 cases of diphtheria, 12 of scarlet fever and 21 of tuberculosis were registered.

Engineering Charge May Be Waived

City Attorney La Roche, in a letter to the city auditor, informs the council that the improvement of Irving street, as well as items upon which the council cannot agree, according to Bigelow's view, and intra-department detail and routine should not be allowed to take up the advisory committee's time.

The committee was provided for by a resolution of Commissioner Baker, unanimously adopted by the council.

Commissioner Bigelow will soon call on the various commissioners to submit to him the advisory committee's report, an estimate of the needs of their department for the 1916 budget.

The council will then meet as a committee to prepare the budget.

Water Issue at St. Johns Daily Asks if the Present Plant is for Sale.

The first step in the investigation of the water needs of St. Johns and report and means of supplying that newly annexed territory with Bull Run water, as authorized by the council, has been taken by Commissioner of Public Utilities Daily.

He has sent a letter to the St. Johns Waterworks and Lighting company asking if it contemplates selling its plant and requesting all information regarding its investment.

The company is said to own considerable real estate in addition to its mains and pumping station, but should it be acquired the city would probably be able to purchase its mains, only alternatives are condemning the property or laying new mains.

TO MAKE ADVERSE REPORT

Opening of East Water Street is Difficult Proposition.

Commissioner Dieck will report Wednesday against a petition from the East Side Business Men's club asking for the opening of East Water street from East Ash street to the Burnside bridge, as it would be difficult to finance, would be dangerous when

passing through the Southern Pacific railroad yards and would practically cause a widening of the street. The north, East Water street would be a dead street, he says.

Dieck believes, however, that there should be a margin street along the east river front to serve the public docks, and that it should have a belt line railroad as well as serve vehicle traffic.

He opposes the petition of the public docks commission for opening East Ankeny street from East First street to the river, as it would cross the railroad, and declares that East Water street is already opened between East Ash and East Ankeny streets.

The dock commission also requested that this stretch be opened.

HEALTH OFFICER REPORTS

Carload of Watermelons Destroyed During July.

A carload of watermelons weighing 5,960 pounds was condemned in July, according to the monthly report of City Health Officer Marcellus.

Other food condemned consisted of 2559 pounds of fish, 7446 pounds of pork, 3512 pounds of beef, 1923 pounds of lamb, 3760 pounds of vegetables, 10 crates of berries, 180 boxes of cherries and 104 boxes of peaches.

During the month 102 restaurants were inspected and 76 violations and delicatessens in the market inspection work, 152 complaints were made by citizens, and 2797 inspections were made.

Two hundred and eleven dairies were inspected and 10 violations, 25 herds and 230 animals were tested for tuberculosis. Of 218 samples of milk and cream analyzed, only 2.1 per cent of the samples were below standard.

The city bacteriologist made 502 examinations during the month.

The sanitary inspection work, 1070 inspections were made, 287 complaints were registered by citizens, and 783 complaints by inspectors.

Under communicable diseases, 20 cases of diphtheria, 12 of scarlet fever and 21 of tuberculosis were registered.

Stable Question to Be Given Attention

City Attorney La Roche will suggest to the council several different legal methods of doing away with inconvenience and unsanitary conditions caused in various residence districts by barns and stables.

The present ordinance provides that no stable shall be built within 15 feet of a residence. Pending further action by the council, no more building permits for stables in residence districts are being issued.

It was brought out in the recent complaint of residents against a barn at 909 East Twenty-first street, north, that while the barn complies with the ordinance as to construction and sanitation the noise of the cows driven in and out disturbs the neighbors' slumbers.

Coppette's Bullet Hits the Bullseye. San Francisco, Cal., Aug. 7.—(U. P.) Katherine Eisenhart, San Francisco, "Coppette," put two crack teams of marksmen to shame today at a police shooting contest, when she carelessly picked up a revolver, made one shot at random and hit the bullseye. The only consolation was that the next four shots did not even hit the target—for she shut her eyes in shooting.

Price Cut on Sugar! Jones' Cash Store, Pioneer Mail Order House, gives you benefit of saving. Buy at wholesale for preserving and canning. As the largest distributors of Sugar in the Northwest, you share in the economy of our huge quantity buying. It's the policy that keeps this old reliable Mail Order House growing bigger every year.
