THE FERRIS BILL---NO. 2

TITE ARE told in advance that the water power conference will protest against the Ferris bill.

Yesterday, The Journal showed that the Ferris bill reflects the effort of Secretary Lane and President Wilson to

secure legislation for development of the West, that it is an effort to open western water powers to use without dissipation, that the keynote of the bill is use of undeveloped western resources, that it proposes to permit the use of these resources only by firms and corporations as will use them, that the government will enforce use and development by making the grants revocable for non-use, and that it will not allow these public resources to go into private ownership and be held in non-use for speculative purposes. whole.

Is it against these provisions of the Ferris bill that the conference wfil "protest," and if so, why? What is to be the mood of the conference if, in advance, we are informed that these desirable and whole-

> If you do interstate or territorial business where the state has no power of regulation, we will regulate your business to see that you give your consumers a fair deal. Where there is state regulation, the state will regulate the business.
