Gibson of Detroit, secretary of the Nat Odd Fellows' hall in Lents last hight painted china, valued at \$65 altogether.

## A Lesson from the Past

Years ago, before baking powders were so well known, the housewife sometimes made her own from cream of tartar and soda.

These materials were then comparatively expensive and processes of refining had not been devised to bring them to the high state of purity of the presentday well known cream of tartar baking powders, such as Royal; and yet she never thought of buying alum, then as now a cheap and inferior substitute for cream of tartar. She wouldn't think of permitting an ounce of alum to enter her kitchen.

Yet housekeepers are to-day asked to buy alum baking powders with which to make food for their children.

The statement on the label affixed to every can naming the ingredients of which the baking powder is composed affords a method of protection against the use of undesirable kinds.
