RIGHT THINKING

By Rev. Luther R. Dyott, D. D., Pastor of the First

Congregational Church. Man is capable of right thinking. He is more than a machine. Marvelous is the mechanism of his body. "We touch heaven when we lay our hand on a human body." Carlyle declared this saying to be a scientific fact. But a man who thinks, knows himself to be more than his physical body. Even so do others regard him.

Great is the miracle of the brain. In man's brain Emerson saw "the geometry of the City of God," while likewise in his senses he observed that he carried "morning and night, and the unfathomable galaxy."

the thinking man knows that he is more than the six hundred

His thinking is right when it is straight-straight toward God, his brother man and himself. In his capability of such thinking is found the initial idea of his likeness to God, while through such thoughts, as living forces, he reaches his adequate life as it is expressed in divine terms. One cannot have a first-rate life with second-rate thoughts. No more will he have a second-rate life with first-rate thoughts. . As he thinketh within himself, so is he.
