

POULTRY Department

OREGON'S GREATEST CROP IS POULTRY

amounts to Sum That Would Pay for Several Large Battleships.

By James Dryden.

Professor of Poultry Husbandry at O. A. C. The seed is being sown now for next year's crop. I mean, of course, the egg and chicken crop—a crop in Oregon alone that amounts to a sum large enough to pay for two or three battleships a year.

POULTRY AND PIGEONS 37 SICILIAN BUTTERCUPS

First prize per \$3.50. Second prize per \$2.50 per 12. Eat less than any other breed. 2000 eggs per 100. 6 months of year. E. R. Thompson, 25 E. 59th st., N. Phone Tabor 5831.

INCUBATORS—Miller's Electric Incubator, 1000 lbs. with 100 eggs. Best possible construction. Price \$13.00 up. Fifteen years on the coast. Still giving complete satisfaction and good service. Write Lilly's, Portland.

S. C. WHITE LEGHORNS. The famous McKenna Park strain is the most productive of any breed. Large birds that lay white eggs. 15 eggs \$1.50, 100 eggs \$7.50. McKenna Park, 1000 Lombard st., St. Johns, Ore.

McKENNA PARK POULTRY FARM. 127 Chamberlain, Portland, Ore. SILVER CAMPINES, prize winning stock, laying from 10 to 14 eggs per day, at \$1.50 per chick; eggs \$2.50 per 100. \$1.00 per 50. C. R. I. R. 21 and 22 per \$1.50 per 50. White Leghorns, 75c per 50. At 1313 Burge st., Portland.

HOROUGHURED Mammoth White Pekin ducks, 6 to 8 pounds in 10 weeks, breeding flocks, \$2.50 per 100. For hatcheries, \$1.10 per 100; fertility guaranteed. R. B. DeLong, Vancouver, Wash.

FIRST SPECIAL PRIZE. Light Brahma, 1000 lbs. setting, 1000 eggs, \$1.50 per 100. Phone 553. W. T. Sheppard, Milwaukie, Ore.

WHITE Leghorns, Wyckoff strain, setting eggs, \$1.10 per 100; day old chicks, \$1.10 per 100. Sunnyview Farm, Milwaukie, Ore. Phone 15-J.

FOR SALE—Eggs for setting or incubators; also day old chicks. Write to Incubators, 151 Melvin, Gresham, R. 1, Box 152, East Astor, Troutdale, Ore.

WHITE ORPINGTONS—Prize winning pen at real sacrifice; eggs \$1.50 per 100. F. Shane, 254 E. 24th St., Portland.

BLACK LEGHORNS, great layers, good hustlers, eggs and stock from prize winners; prices reasonable. John M. Wood, 232 1/2 Commercial, Portland.

BUFF ORPINGTON prize winners, setting eggs, stock that will lay. T. J. Edwards, 92 Division st., bet. 29th and 30th.

FOR SALE—50 thoroughbred White Leghorn pullets, Oak Heights strain, and 50 R. I. Reds. Stables, Knights' Station.

Full blood Black Minorca eggs for hatching, heavy layers, extra large eggs. \$2 for 10. Tom Cowling, Lentz, R. Tabor 5740.

FOR SALE—Old Trusty incubator, 120 egg size; used once; in perfect condition. \$8. Eugene W. T. Shepard, Milwaukie, Ore. M.L. 2-3.

SINGLE combed Rhode Island Red eggs and stock for sale, laying and prize winning strain. Sellwood 1870. 2519 46th Ave. S. E.

FOR SALE—Buff Leghorn and Silver Campine eggs for setting, \$1 per setting. J. Robertson, box 26, Jennings Lodge, Ore.

DULY'S laying strain of Buff Leghorns, eggs for hatching, \$1 per 15. 147 W. DuWay, Parkwood, Ore. Phone Sell 1060.

ORDER R. I. Red chicks for March 15. A few good cockerels left, good stock. Sellwood 2618.

TIMELY SUGGESTIONS FOR POULTRY RAISERS

Precautions should be taken by every poultry raiser to prevent crowding of hens on their roost during the colder nights. When they get too close together, heat is human beings, perspire and loose considerable strength which renders them subject to cold. The first draught that strikes them is likely to cause trouble.

Cleanse and disinfect the breeding pens and equipment. Select the hens to be used for breeders and get them located. These hens should be those that have made good laying records during November, December and January. They should possess good health and vigor and be of desirable size and shape.

Do not feed too heavily for egg production. If the hens have been in heavy laying, a month of rest from laying will put them in good condition for producing good fertile eggs for hatching.

Ten to 15 hens can be mated to one rooster, depending on vigor of the male and size and activity of the breed. The rooster should be a good poultry specialist. Oregon Agricultural College.

It is a good plan to use hens in second or third year of laying mated to males about one year old. Well matured pullets and cockerels may be mated if they come from good parents and have good constitutional vigor.

When the machine maintains an even degree of heat at 102 for several hours the doors should be opened and the egg chamber allowed to cool to about 85 degrees. If the machine is set to run on even 102 within three hours then it is ready for the eggs. When the cool eggs are put inside, they will cause a drop in the temperature, but when they are heated through, the warmth will return.

Something can be done in breeding for shape and size of the egg as well as for quantity. This is the latest in experimentation with utility egg birds. Professor C. T. Paterson of the Missouri poultry experiment station has

White Wyandottes In Lead at Storrs

Storrs, Conn., Feb. 27.—Last week's ultra winter weather had its effects on the egg production in the laying contest at Storrs; 15 inches of snow and 15 degrees below zero is by no means the right combination for un-laying the eggs. To be sure several pens did remarkably well but taken all together the birds lost nearly 1500 eggs as compared with the previous week's production, although they laid more than 400 eggs better than for the corresponding week two years ago.

The three best pens in each of the principal breeds are as follows: Plymouth Rocks—Jules F. Francis (Barred), W. Hampton Beach, E. L. 567; Fairfields Farms (Barred), Short Falls, N. H., 365; Holston Hill Poultry Farm (White), Holliston, Mass., 283.

Wyandottes—Tom Barron (White), North Haven, Conn., 505; A. W. Rumery, Danville, N. H., 491; Hillview Poultry Farm, St. Albans, N. Y., 484. White Leghorns—Will Barron, Barre, Vt., 413.

Rhode Island Reds—Jacob E. Jensen, North Haven, Conn., 505; A. W. Rumery, Danville, N. H., 491; Hillview Poultry Farm, St. Albans, N. Y., 484. White Leghorns—Will Barron, Barre, Vt., 413.

Russell Sage Would Buy, Today

because a purchase were living today we are certain he would buy real estate—ALWAYS BOUGHT WHEN EVERYBODY ELSE WAS SELLING. That was how he became a millionaire.

You will say, "That's all very well—but I haven't Russell Sage's resources." Very true. But you can profit by observing his methods.

That was the secret not only of Sage's success, but that of practically every man who has made a fortune with his own hands. Our own Portlanders who bought real estate in the period following the Civil War and reaped fortunes later, they all went away up. Follow this same principle.

You have an opportunity right now to do the same thing. Today almost everyone wants to sell. Prices asked for property are consequently below normal.

BUY WHEN EVERYONE ELSE IS SELLING. The men and women who have a little spare money in the bank; the trustees and executors of estates; men who wish to invest—for all of these real estate is an ideal time to put money in real estate.

BUY WHEN EVERYONE ELSE IS SELLING. The average man or woman could do no better than to watch the papers for announcements of the occasional purchases made by conservative men who have made their money in real estate.

When you see such a man has made a purchase, you will be pretty safe in following his lead. Such a purchase, however, should not be made blindly. It is always wise to retain one of Portland's reliable, established real estate men before entering any real estate transaction.

Having purchased, have patience. This old world swings back and forth like a pendulum. A period of plentiful money, which means high prices, is approaching. When that times comes, you will be glad you bought. SELL WHEN EVERYONE ELSE IS BUYING.
