Taking advantage of a diversion created by the holding of an Apostolic faith meeting Charles Ivy, aged 26, a trusty employed as a cook, escaped from the county jail some time between 6 and 8 o'clock last night. He was serving six months for larceny. Special Message to the Women

NO. 6.

This is our sixth message to you. In it we want to recount some of the facts contained in our previous announcements.

Pasteurization is absolutely your only guarantee of pure butter. Mr. W. F. Jensen. president of the Mutual Creamery Company, and his brother, were the first to use this treatment of cream in the United States. Hundreds of creameries do not yet pasteurize their cream, and it is therefore unsafe to use their butter.

To protect butter from contamination after it has been pasteurized, it must be wrapped in wax paper and placed in a dust-proof carton. We were the first to adopt this modern method—in fact, we introduced it. All our packages are sanitary.

ter-pound prints in a germ-proof carton. We named our first package of this kind "Four-in-One" Of course, it was extensively imitated, and we soon found that, while was extensively imitated, and we soon found that, while other butters were not called "Four-in-One," they were all trading on the name because they put up four prints. That's why we introduced MAID O'CLOVER, the highest quality table butter. Its purity is guaranteed, because every ounce of cream in it is PASTEURIZED. Here's another fact: Mr. Jensen and his brother were
