CRUSTO
I just want you to taste the richest baked fish you ever put into your mouth. It is wonderful what a little Crusto will do to give it richness without in any way changing the flavor of the fish itself. It gives the "meat" of the fish a slight moisture and a richness that's almost a dressing in itself.

Try This Recipe
To Stuff and Bake Fish: Take either plain bread stuffing, veal stuffing or forcemeat, fill the fish and sew it up. Put a teaspoon of water in the baking pan, with a dash of Crusto and bake according to the size of the fish, from thirty minutes to an hour. Season with pepper and salt and bake brown.

Crusto is absolutely pure—use it for baking, frying, and as a shortener. Does all that good lard can do and does it better, costs no more. As good as and cheaper than butter for cooking.

At all Grocers—Comes in tight tin (straight sided, friction top, sanitary containers that bring Crusto in you in the most perfect possible condition—cleanly and conveniently)—in various sizes to suit your convenience.

RAILROAD NOTES
Canadian Railway Planning to Open Portland Agency.
Canadian Northern Officials Here.—R. Creelman, general passenger agent of the Canadian Northern railway, and J. F. McGuire, traveling passenger agent, have been in Portland several days, investigating the local situation with reference to opening an office here. Mr. Creelman's headquarters are at Winnipeg, and Mr. McGuire, who has been covering the northwest territory, has from Vancouver. The officials expect to make a report to General Traffic Manager George H. Shaw at Toronto, who will decide whether the Portland office shall be opened.
Four Bits Hurts Conscience.—Superintendent Fred Cooper of the P. R. L. & P., has just received a 60-cent piece from a man who, converted to the Apostolic faith, found a series of impromptu free rides so heavy on his conscience that he had to make restitution. The superintendent handed the money to the treasurer, who credited it to the conscience fund.
Passenger Men's Conference.—The monthly meeting of the North Pacific Coast Passenger association will be held Wednesday at Spokane, with A. D. Charlton, assistant general passenger agent of the Northern Pacific,

Beauty Chat BY LILLIAN RUSSELL

Be Kind to Your Stomach.
IN THESE days of good education children learn things about which their mothers and fathers knew very little. A little anecdote is told of how Nora, aged 9, met her father with her blue eyes full of tears. "Oh, daddy," she wailed, "I've just fallen and bumped my patella." "Dear, dear," said the father, sympathetically, "with the best intentions in the world he bent to examine her elbow. Nora drew herself angrily away. "Humph," she snorted with a superior air, "I said patella—that's not my elbow. My elbow is my great sesamoid."
"Know thyself," said a wise old philosopher. One of the best things the public schools are doing today is helping children to "know themselves." If people only knew more about their bodies, there would be less sickness and disease in the world.
They would expect little or nothing from an overworked machine. Yet every day one sees people complacently stuffing their bodies with too much—and practically indigestible foods—and then wondering why they have indigestion—why their blood loses its vigor and their appearance the attractiveness which only good health can give.

The stomach is a bag which holds only one or two quarts, yet one wonders when watching some people how their poor, overtaxed stomachs ever held all the material forced into them. If these people knew anything about the organization and system of the human machine they would surely refrain from mistreating it as they do. They would know that a pain in the stomach means trouble in their digestion. They could understand why sugar in the blood weakens its vigor and causes the skin to break out in unsightly and disgusting pimples. "Know thyself." Find out how your stomach carries on the delicate work of separating useful from useless matter in the food; how the blood does its part of the body with new life; how and why it is one part of the body can be injured without the rest of the system responding. Know yourself and you will know

why it is that the whole system becomes clogged up when you have a bilious headache. You will understand why your head begins to ache when you go without your luncheon. It is because you have accustomed your body to a stimulant at that meal—a cup of tea or coffee. It is not hunger that makes your head ache but lack of that stimulant to which you have been accustomed.

Find out something about your own body. Know the difference in the function of the liver and the stomach. Learn how fat is formed and you will be able to rid yourself of superfluous flesh. Find the reason for your headache—then cure it. Pains don't just come and go without cause. Seek out their cause and their cure will follow.

One of the greatest sins committed by people nowadays against their bodies is overeating. Remember, your stomach has, at most, the capacity of only two quarts. Don't overtax it by eating too much. Don't expect it to work all the time, as it will have to do if you eat continuously. Know yourself and be healthy. For health means beauty.

Forty-five to Fifty— The Vital Period

Dr. H. M. Biggs, Commissioner of Health of the State of New York, sounds a warning to men between the ages of 45 and 50. "The vital period," he calls it, "if they want to reach old age."

In his advice he dwells importantly on food, fresh air and exercise—but food first of all. Ghirardelli's Ground Chocolate is a boon to men in the "vital period." Unusually nutritious and easy of assimilation, it is a beverage of extraordinary food value to every man whose strength or nerves are taxed in holding the fast pace the modern world moves to. Before retiring you will find Ghirardelli's Chocolate rest-bestowing and sustaining.

The Grand Prize, the Highest Award
at the Panama-Pacific Exposition, San Francisco, was bestowed upon Ghirardelli's Ground Chocolate in recognition of its unquestioned superiority. Order from your grocer today.
