While much ado has been made recently regarding the great surpluses of wheat in Europe, the fact remains that most of the countries are today showing very cent supplies for the rest of the season. France will need considerable wheat during the next few months and Spain has also re ported that its holdings are inadequate fill requirements.

Even Holland has decided that it will not have a sufficient supply to take care of its needs and further liberal purchases are expected from that quarter. The government has just authorized additional purchases. At Liverpool the spot wheat market showed strength with prices unchanged to 3d higher than yesterday.
