WOOL SALES SHOW A VERY STRONG PRICE

Trading in Interior Oregon and Idaho Increasing With 30c Be- Saturday ing Generally Offered for Best; Tursday 407 258 Weinesday 451 45 Tursday 350 167 Monday 3429 456 Week ago 177

Wood sales in Interior Oregon and Idaho are somewhat more liberal and prices are still tending higher. Sales of coarse stock are reported in both Oregon and Idaho as light as 30c a pound generally although some lot to 12 loads of grassers from the south are atra good quality is reported to to 2c to 12 loads of grassers from the south nee above this extreme quotation.

Conditions in the domestic wool trade are at full prices for quality. of the best known among the present trade. General cattle market range: Wille there is some tendency among a cer Wille there is some tendency among a certain per cent of the Atlantic coast trade to await more definite news regarding the possibility of England allowing weed from its colonies to come to the United States, posst of the big mills are preparing for any energency that may arise and are openly in the market for supplies at the extreme quotaitions.

Here and there pickups of Willamette valley are by no pound but the sales in the valley are by no means extensive. Yakima continues to offer rather freely its poor quality stock but hold.

General cattle market range:

Choice pulp-fed steers. \$5.90(9.15)

Choice pulp-fed steers. \$7.70(9.15)

Stock Market Is Irregular at Start

Opening Trade in New York Is Mixed; Early Session of the Leaders Shows Unloading.

New York, May 13,- (P. N. S.)-The market was irregular at the opening today. The short week end session incited early selling in some of the leaders, but for the most part prices held well in the first hour. That is, losses were not severe, but it was apparent that the entire list lacked the sustaining qualities of a market influenced by a definite irond. Uncertainty over the Mexican situation continued to hold the bulls to a restricted position.

In the rails, Canadian Pacific, New Haven and Reading were most active, and prices ad-valued materially from higher openings. Steel stocks were less active than they have been on me Saturdays in the past few months, and iregularity dominated the course of prices.
Alaska Gold opened 1 point up. and later re acted from 24. Anaconda was fairly populat, but the metal list, as a whole was compar-atively dull. Zinc and the locomotive stocks continue to report fairly liberal offerings of wire well treated, but prices were inclined to

by the present state of suspended market ac-tivities than any other department on the board. Marine preferred was in brisk movement, and in the first trades a 1 point gain was posted. Industrial Alcohol was active and higher, and Mexican Petroleum sold around 197. The aggregate of first hour sales was 147-100 shares.

Range of New York prices furnished by Overheck & Cooke Co., 216-217 Board of Trade

Winner of Panama-Pacific producing formation to birds. Championship Tells of Success in Breeding.

By Harry R. Burke.

measure of his success in breeding his | ticularly in winter, in a deep straw barred rocks. The chicks get nothing a light feed of a moistened mixture of else to drink until they are four bran and cornmeal, fed in troughs in months old. "Buttermilk is great to the winter or on the clean turf in the mature the chicks. It is fine to grow spring and summer months. The feathers and it keeps their bowels in younger ones are fed grain at night. splendid shape." Mr. Myers says in Bran is also kept constantly before summing up its advantages for the young chicks.

The son (above) was the result of cockerel mating, the sire being a noted prize winner. M. J. Myers, Sixtleth and Division streets, the breeder, won the American association medal at Spokane in 1914, with the younger bird as best parti-colored bird in the northwest. He was third prize cock at Panama Pacific exposition.

POULTRY Department

AN EXAMPLE OF LINE BREEDING

For 22 years Mr. Myers, who lives at Sixtieth and Division streets, has been breeding barred rocks. Starting with the Latham strain for pullet mating and breeding from Grove Hill, and Thompson strains on the cockerel side. Mr. Myers has brought his strain up to a standard that will compare with anything in the country, as witness his bred hen, first pullet bred cockerel, first cockerel bred cockerel, first pullet bred pullet and many other places at the Panama-Parific exposition.

the barred rocks.

That utility is bred with the show type is manifest in the fact that Walter Hogan, originator of the Hogan system, gave Mr. Myers second, fourth and fifth places in judging for egg producing formation in a hot class of

Mr. Myers feeds his chicks dry feed to start with and feeds lots of dry bran, the birds getting no wet mash until about two months old. Bran, he considers, is a great eng producer feed lots of bran to the young stuff. At 5 o'clock in the morning Mr. Myers gives his chickens their first
