

MARSHFIELD EXPECTS S. P. TO BE EXTENDED ON DOWN THE COAST

News of Sale of Bonds for Grants Pass-Crescent City Extension Is Encouraging.

WOULD FEED COAST LINE

News would Tap Large Territory Now Absolutely Without Transportation and Continue on to Eureka.

Marshfield, Or., May 13.—News received that the bonds have been sold for the Grants Pass-Crescent City railroad is taken here to mean that the southern Pacific from this point will be extended on down the coast. Those who claim to know of railroad

conditions say that if the line is built from Grants Pass, and the reported hearing of the bond issue now indicates that it will be built, it will reach Crescent City and be a feeder to a coast line which will extend from Coos Bay on down through Curry county to Crescent City and on south to Eureka to connect with the railroad to San Francisco.

Southern Pacific officials who have recently visited here claim to know nothing positive as to plans for extending on down the coast but have admitted that such an extension was a possibility in the future. The fact that the Grants Pass line to the coast seems to be a reality is taken here as encouraging news and as an indication of future activities in railroad building from this point.

The line through Curry county to Eureka was surveyed some years ago. It is pointed out that if it was built it would tap a large territory which is now absolutely without any transportation and that the line from Grants Pass would be a valuable feeder to the coast route which such extension from Coos Bay would make possible.
