But it is distinctly untrue that So less close personal acquaintance with

cialists do not believe in private property. It is the existing order that by rent, interest and profit makes it each year-almost each day-more and But more difficult for the producing classes to secure, or to keep after they have secured it, enough "private prop erty" on which to exist, to say nothing of enough to exist upon in comfort This is proved by fifty different ways by every "investigation" that is ordered with intent to put off a little longer the time, sure to come, when the game to win. Instance after in- theirs.

As a matter of fact, Socialists be lieve passionately in a million times worse than other practical politicians more "private property" than there is of the times in state politics, but at present, but widely, universally distributed and not resting in the hands of a few families-members of our oli garchy-as now. Combs, manicure sets, gas ranges

automobiles, food, clothing, dwellings -when occupied by their owners-and any any number of other things are "private property" when devoted to private use, and so recognized by Socialists; their lodgment in private hands would be greatly stimulated by the chief tenet of the Socialist creed, namely, that all public utilities whatsoever, together with all natural resources, including coal, oil and water power, should be publicly owned for the benefit of all, because publicly used.

That is quite a different proposition from the statement made by Mr. Col lins. Doubtless his love for truth and fair play will cause him to correct this error in future addresses

This Was Portland's Notion.

From the Ketchikan Miner. For years the people of Alaska waited for the Portlanders to come. They invited if not begged them to come in. Apparently annoyed by our insistence. a couple of years ago they decided to send a couple of old tubs, of the speed and fashioned after Noah's ark, expecting that Alaskans would fall over compelled to sell to the Hood one another to patronize them, course the enterprise proved a failure, but if they expected otherwise we can only say that they were very foolish. Right here is where we find a difference between the Portland spirit and the Seattle spirit.

Stories of Street Town

Always Eager to Oblige. FRANK C. RIGGS and Ralph P. Meyer, respectively well known in the automobile and laundry business, sat at the meeting of the Royal Rosarians, Monday, their feet upon a common chair. Present Mr. Meyer noted a small hole in the cerise blue of Mr. Riggs' half hose. His sensibilities were exceedingly shocked. From his vest pocket he drew his fountain pen. "May I?" he suggested, leaning forward and applying Carter blue to the white spot in its field of cerise. The spot disappeared, "How long will the repair last?" in-

quired a spectator. "Until he washes his feet," delicately responded Mr. Meyer.
