BAKER MINES MAKE SHOWING THAT MAY MEAN NEW RECORD

All Districts Active; Indications That Year's Output Will Be \$2,000,000.

NEW CAPITAL INVESTED

Ore Bodies Are Being Uncovered and Developed in Number of Properties Throughout Entire County.

Baker, Or., Sept. 2 .- The prophecy the first of the year that 1916 would be the banner year of gold production Baker county bids fair to be fulfilled. More ore and bullion is being shipped than ever before, through the local sampling works and to the Salt Lake and Tacoma smelters, and the year's total will certainly run over the

Cornucopia is probably one of the liveliest camps in the Northwest at the present time. The Union-Companian, Baker Mines company, Last Chance, Boulder creek placers and smaller properties combined are averaging around \$100,000 a month. The Columbia, never ceasing operations for the past 20 years, is contributing its share; Rainbow, reverting back to the Commercial Mining company from the United States Smelting & Refining company after the latter, under agreement, had taken out \$500,000 due it, is paying better dividends now than ever. and other Mormon basin properties in the vicinity of the Rainbow are doing

Snake River Busy.

The Snake river section is busier this year than ever in its history and copper properties standing idle for years, with metal at the present prices. can ship at a profit. Arkansaw and other Seven Devils copper properties are shipping. The Connor creek gold mine's new mill is in operation and Clark's creek and farther down the river in the Homestead section are full of small claims that are being developed with good prospects. A 30 foot ledge of high grade Cox properties on Goose creek and the operators are blocking out ore preparatory to sacking and shipping.

Some of the richest ore ever discovered in eastern Oregon was uncovered in the Kelly mine on Rock creek early in August and wide of free milling ore.

which mean more and better things in in installing a retort. a mining way in the near future.

Medford Reports Strikes.

Medford, Or., Sept. 2 .- Andrew Jeldness, owner of the Bloomfield mine and the group of claims about it, in ples of ore to this city, just taken from the Bloomfield, that are attracting attention. The ore, known as bornite of copper, is declared the richest of any ore taken from the Blue Ledge district. Recently Manager Jeldness brought ore to this city that assayed \$126.40 to the ton,; \$26 of which was in gold. Old miners of this region guess that these samples will run more than twice that figure. The

assay is now in progress. San Francisco capitalists are investigating the Monteith copper group of claims, on which considerable development work has been done with alturing results. This group is also a part of the Blue Ledge district, near the terminus of the proposed railroad. It has not been offered for sale, but recent visit to that region by representatives of a syndicate resulted in an offer. Development work is proceeding vigorously

Copper King is making imtaken out, preparatory to shipment. which nearly a million dollars' worth of work has been done, is again ready for operation. Superintendent F. V. Carnahan is on the ground in readiness for orders to get busy.

Activity in this new-old district is more general and much more sub- idential straw vote was taken on the lous parks is accompanied by Robert S. stantial than for 10 years. Lumber Production Normal Last Week

Seattle, Wash., Sept. 2.—(P. N. S.)— Lumber production registered normal in Washington and Oregon last week. for the first time in months. It is said this does not indicate an abandonment of the individual mill principle of curtailment so much as it does a policy of preparedness, mills crowding through urgent orders on the strength of earlier reports from Washington in dicating a probable interruption of traffic. Shipments by rail, while slightly in-

reased over the previous week, were 3.53 per cent below production, due to severe car shortage in certain Oregon districts. In producing districts where car supply was easy, every effort was made by the mills to expedite delivery.

Vancouver Matriage Licenses. Vancouver, Wash., Sept. 2.—Mar-riage licenses have been issued here by the county auditor to the following persons: Loid O. THOMPSON'S TRIAL IN MURDER MYSTERY BEGIN

Hearing Will Take Place in Washington County, Where Killing Took Place.

JITNEY CASE RECALLED

Mrs. Helen Jennings and Fred Bistman Were Slain in a Manner Which Presents a Difficult Problem,

In the Mount Scott cemetery is the body of Fred Rigiman and in a ceme-tery near Tualatin is the body of Mrs. Helen C. Jennings. They were murdered Monday night, May 15. Mrs. Jennings' body was found in her home near Tualatin the following day while Ristman's body was found 10 days later in the woods near the home.

In jail at Hillsboro is Bnenett l'hompson, an ex-convict. He was arrested Wednesday afternoon, May 17, and taken to Hillsboro for investigation. The grand jury first indicted him on a charge of larceny and later on a charge of murder.

Trial Begins Tuesday. Tuesday in the Washington county ourthouse Thompson's trial begins de is to answer to a charge of murderng both Mrs. Jennings and Ristman. If further postponements are not sought, Tuesday will probably be given over to picking a jury. Witnesses for the state have been ordered to appear court Wednesday morning.

District Attorney E. B. Tongue of Washington county will represent the state. It is said that S. B. Huston and Roscoe Hurst will appear for Thompson. Attorney Hurst has contended ever since Thompson was arrested that he has a perfect alibi.

If Thompson is found guilty it will probably be largely on circumstantial evidence. An undershirt, an outside shirt and a blue coat are expected to play a prominent part in the evidence. An outside shirt covered with blood and graphite was found near the scene of the murder. It is presumed that this bloody shirt had been worn by the murderer.

Evidence Is Claimed. An undershirt taken from Thomp-

son's home was said to have blood and graphite spots on it which were in corresponding positions with those on the outside shirt. Tiny spots resemyoung bling blood and graphite were also Thompson knew Mrs. Jennings and

said by the officers to have been in the neighborhood a few days before the murder was committed. Ever since Thompson was arrested he has stoutly maintained that he is innocent.

Arrest Follows Fend.

Dallas, Or., Sept. 2.—Armed with a warrant from the justice court at Falls City, Sheriff John Orr of Polk county, yesterday again visited the mountain section between the counties where a feud between homesteaders caused both officers to make ter school will reopen for the year of hurried trips last week in search of a 1916 on September 11. The Man **Who Cheats** His Patient **Cheats Himself**

Many Dentists Who Find Business Dull Can Find the Cause in High Prices and Poor Work.

My offices might well be termed "A Dental Clearing House"-sooner or later patients from Dentists of high and low degree come to me.

I have become so familiar with the "style of work" turned out by various Dentists that I can frequently tell a patient who did his work, after an examination.

And right here I might say that the genius who wrote "Uneasy lies the head that wears a crown" must have had some Poor Dentists in mind-for I have seen such evidence of incompetence, neglect and downright dishonesty covered up by gold crowns that I have wondered how a man who places the symbols "D. D. S." after his name can be guilty of such arrant quackery.

I have removed crowns from aching teeth and found open cavities filled with pus. I have found others with the filling loose, and even exposed nerves-and some of these cases were former patients of well-known Dentists.

I PRIDE MYSELF ON THE FACT that my examinations and advice are entirely honest and based on the actual requirements of the patient. If a tooth can be saved, we save it. If a small filling is sufficient, that is all we advise. If a crown or bridge work is necessary, I personally guarantee that the tooth will be placed in an absolutely perfect condition before it is crowned and the cost will be less than the same work can be done for elsewhere.
