Imagine a cigar made from the chopped-up short filler on the left.

You can just see how the criss-cross, jack-straw leaves will break up the draught of air and prevent the cigar from drawing evenly. That's the kind of cigar you have to keep lighting up when you smoke it.

Now look at a long-leaf filler cigar.

You know it will draw evenly if the cigar is hand-made. When the leaves are laid together as they are in the OWL, you get a full, even draught of air with every puff.

Long-leaf filler is one requisite of a good cigar, whether it costs 5 cents or 25 cents. You get long-leaf filler and nothing but long-leaf filler in the Million Dollar OWL.
