UP EGG PRODUCTION

Storrs, Conn., Oct. 7 .- At the close Tom Barron, (White) Catforth, Eng-land, 1998.

Abel Latham, (White) Brierfield, forty-seventh week of the laying contest at Storrs the total England, 1854, production for all pens was 152,894 eggs or 1086 more than for the full fifty-two weeks last year; thus all the 1811. eggs produced from now on will be a clear gain over last year's total, 7105 necessary to bring the average yield up to 160. The total production for the week was 2708 which was eggs less than for the preceding week. Rock Rose farm's pen of Bar-red, Rocks from Katonah, N. Y., won first place for the week with a pro Oregon Agricultural college (Ore-duction of 51 eggs. J. E. Watson's White Wyandottes from Marbledale. Conn., were second with 49 eggs, foi-lowed by Dr. N. W. Sanborn's Buff Wyandottes from Molden, Mass., with Wyandottes from Molden, Mass., with Sorre of 48 eggs. A. B. Hell's White a sore of 48 eggs. A. B. Hall's White Leghorus from Wallingford, Conn., tied with the Agricultural college pen of "Oregons" from Corvallis, Or., with production of 47 eggs for the week It is interesting to note that it is the heavy breeds that are keeping up the production during the homatretch. Out of the thirty-eight pens of Leghorns there were eleven which laid 31 eggs or better during

> Expert Advises Screens for Henhouses to Keep the Flocks Healthy.

Window screens for poultry houses are the latest wrinkle in poultry keeping. Professor Harry R. Lewis, head of the poultry department of the New seat out a warning to all chicken rais- courage, determination and action ers advising them to screen their hen A. W. Rumery, Danville, N. H., 1749. houses and keep out the mosquitoes i Jacob E. Jansen, North Haven, Conn., they would keep their flocks healthy. houses and keep out the mosquitoes if ings of poultry houses movable, so Working in cooperation with the poultrymen, Professor Lewis is waging a vigorous campaign against

chicken pox, a disease that occurs in every county of the state at some time during the year. Thus far the campaign has been one of prevention, and has proved so successful that Professor Lewis has been able to find only one fowl in the entire

state having the chicken pox. are working with him in an effort to get a vaccine that will render chickens immune, but the prophylactic measures have been so efective to date that At Pullman, Oct. 15 ures have been so efective to date that the chemists have been unable thus far to procure enough birds having the

disease. State College, Pullman, Wash., Oct. —High bred hens of many breeds and Chicken pox and its allied ailments, roup and canker, have been a bane to poultrymen ever since the industry outgrew the barnyard stage, where but few chickens were kent in each flock Travel With the Wind.

> In many sections where five and 10 acre chicken farms are numerous the chickens of one farm rub noses with those of the next door neighbor, and doors, partitions, nests and everything when a disease hits one flock it generally hits all the rest. Chicken pox is very contagious and spreads from flock to flock with

alarming rapidity. Vineland is the largest chicken center in the east, and early this summer Professor Lewis made a personal survey of the entire Vineland district, visiting the farms and getting first hand information on the local aspects of the

In traveling from farm to farm h found that the disease generally spreads in the direction of the prevailing winds, and as mosquitos are us ually blown in the path of a wind, he decided that they carried the germs. Insects No Longer Reep Hens Awake. So, at the suggestion of Professor Lewis, many of the poultrymen have screened their chicken houses with mosquito netting, and no more are correct laying capacity of the hens,

all breeds considered, the results of the their birds kept awako at night by the buzzing of the pesky insects. omparison will have an important Those who have adopted this preventive measure have noticed that their chickens are in hetter physical condition than is usually the case at this time of the year, when a chicken's vitality is at its lowest ebb. Many other poultry raisers spray their chicken houses, especially the

rosts, with kerosene to keep the mos-

long as satisfactory work is being quitos away. Where large flocks are kept on small areas the soil is often a productive source of infection, especially in damp When shipping live poultry do not weather, and Professor Lewis has the crowd them too closely in the crate. It poultrymen liming their chicken yards results in such shrinking in the birds several times a year and frequenty that it more than offsets the slight cropping them.
