

EPISCOPALIANS WILL THRESH OUT STAND ON PROHIBITION QUESTION

Unions of Nations to Prevent
Future Wars Suggested by
Peace Commission.

BOARD MEMBERS NAMED

First Expected When Recommendation
That Prohibitory Measures Be Adopted
After Representation Comes Up.

St. Louis, Oct. 21.—(U. P.)—That the prohibition question will be thoroughly threshed out by the Protestant Episcopal church of America in triennial conference here, was the consensus of opinion tonight among bishops and deputies of the church's legislative bodies. The prohibition question came before the house of deputies late today in the form of a memorial asking that the house endorse the prohibition movement.

The deputies referred the memorial to the committee on memorials and a report will be made later in the session. An interesting fight is expected when the question of the stand the church is to take on the question is brought up.

Union of Nations Urged.
A union of nations of the western hemisphere into a cooperative organization, such as exists between the states of the United States and European nations into an organization of the same character was suggested as a means of preventing war in the future. The suggestion came in the report of a commission on peace, headed by the Rev. Henry Lubek of New York.

The report placed on the house calendar said:
"By agreement, armament on the Great Lakes has been limited and the border has been unfortified for 100 years, and our relations with our northern neighbor are increasingly cordial. We are part of a pan-American union with our Latin-American neighbors."

Hot Fight Expected.
This extends the cooperative idea over the whole western hemisphere and makes for peace. These are practical suggestions and suggest the organization of mankind in the interests of the normal condition of peace. The commission said that a similar agreement on the part of European nations was a possibility and would tend toward a permanent condition of international peace.

Another hot fight is expected next week on the report of the joint committee on proportionate representation. The report recommending that 23 eastern dioceses be allowed larger representation among the deputies was laid over until Monday. The report showed that the 23 dioceses having a total of 900,000 communicants have a representation of 145 to the 45 dioceses with only 184,000 communicants have a representation of 105.

New Board Members Named.
After conferring in the house of bishops selection of Detroit as the city for the next triennial conference, the deputies adjourned until Monday. This evening they were guests at a tea party. The bishops remained in session until early this evening. The following new members of the house of missions were chosen by the bishops:

Bishop Alfred Harding, Washington. Rev. Henry Ansie, of New York. Dr. William T. Manning, New York. Bishop Bratton of Mississippi.

Appointment Causes Surprise.
These appointments must be considered by the deputies. The appointment of Dr. Manning caused some surprise among churchmen tonight. He resigned from the board in 1913 because of a dispute as to the sending of delegates to a conference of mission workers of the Protestant churches in Pan-America.

How the appointment of Dr. Manning would be received in the lower house was a topic of much speculation. Today there were rumors the deputies would make a fight on Bishop Arthur Selden Lloyd, who had been selected president of the board of missions. Bishop Lloyd was the storm center of the pan-American controversy in 1913.

The selection of new mission members closed the bishops' session for the day. Adjournment was taken until Monday.

With no other preparation than cleaning the inside bars of a tree is used for blankets in Ecuador.

Kryptok
made by us cost no more than Kryptok made by other opticians, but the Kryptoks supplied by us are better, being finished on a specially made machine and in the finest, most completely equipped retail optical factory in Portland.

Besides, we do all the work under one roof, from the examination of your eyes to the accurate fitting of the finished glasses.

VETERAN FIGHTER IS DEAD

Brigadier General James Jackson.

GENERAL JACKSON OF OREGON GUARD FAME IS DEAD AT 83 YEARS

Civil War Veteran Built Up
Troops of This State by
Tireless Effort.

General James Jackson, the "grand old man" of the Oregon National Guard and a retired brigadier general of the United States army, died at 9 o'clock last night at his home, 380 Thirty-second street, north.

General Jackson began his services at the outbreak of the Civil war with the Twelfth (now the Twenty-first) infantry, and participated in many of the most important engagements during that memorable contest.

After the war he was with his regiment in Indian fights, distinguishing himself in many ways as an efficient officer and soldier. On his retirement in 1898, he accepted the position of inspector general of the Oregon National Guard, and built it up into an effective fighting force, superintending the trying task incident to getting the Second Oregon to the front at the outbreak of the Spanish-American war, and performing many other military services for the state. He continued in that position for many years as an active worker for preparedness.

Last April congress passed an act which gave him the rank of a brigadier general.

Some months ago he underwent a severe operation, from which he appeared to rally slowly, his advanced age of 83 years being a handicap.

Guard Concerned in Department Ruling.
Families of Men Enlisting in Militia or Guard After June 18 Entitled to Benefits of Act.

Major W. W. Wilson, acting adjutant general of the Oregon National Guard, has been officially advised by the United States department that the families of all enlisted men who were members of the militia or National Guard at the time of the call of the president of May 9 and June 18, 1916, and were brought into the service of the United States pursuant to those calls, are entitled to the benefits of the act from, and including, June 18, 1916, are entitled to the benefits of the act from the date of their enlistment.

It has been a question whether the families of those men who enlisted after June 18 were entitled to benefits. This ruling will affect the families of men now on the border in the cavalry and in the field artillery.

Flag Presentation Planned for Masons.
Portland lodge, A. F. and A. M., will hold a flag presentation special session in the auditorium of the Masonic temple next Friday night, October 27. The flag is given the lodge by H. L. Pitcock, past master, and the presentation speech will be made by Wallace McCann. It will be received on behalf of the lodge by J. Francis Drake, past master.

The Grand Master will furnish a program of patriotic music and the Cathedral Guard of the Scottish Rite Masons will give a fancy drill. The Schottische and Ladies' trio has volunteered its services. Its members are: Mrs. R. A. Thompson, Miss Edna Gates and Miss Elsie Hall, with Mrs. R. T. Groves, accompanist. All members of the Masonic fraternity are invited.

Voters' Pamphlet Given Away Free At Journal Office
Any person wishing a copy of the official pamphlet issued by the state of Oregon, and by the State of Oregon, giving pro and con on each of the 11 measures before the people to vote upon on November 7 next, can have one free by applying to the advertising counter of The Oregon Journal, down stairs in the business department.

Any person wishing a copy of the official pamphlet issued by the state of Oregon, and by the State of Oregon, giving pro and con on each of the 11 measures before the people to vote upon on November 7 next, can have one free by applying to the advertising counter of The Oregon Journal, down stairs in the business department.

BRITISH AND FRENCH RESUME OFFENSIVE AT ABOUT SAME TIME

Former Reports Gains From
400 to 500 Yards; Latter
Took Strong Position.

London, Oct. 21.—(U. P.)—British troops resumed the offensive on the Somme front today after a several days' lull with a heavy blow on a front of nearly three miles.

The attack was delivered on the sector between the Schwaben redoubt, north of Thiepval, and the village of LeSars, on the Albert-Bapaume highway. General Haig reported tonight that the British line was advanced from 300 to 400 yards.

The Sturt and Regina trenches, strongly fortified German positions and German posts northeast of Schwaben redoubt, were captured. Several hundred prisoners were taken.

French Strike About Same Hour.
At about the same hour the French struck north of the Somme. By a swift advance, General Foch's troops mastered a part of the strongly fortified wood north of Chauhain, taking 250 prisoners.

The British and French blows followed by a few hours perhaps the most determined counter-attack launched by the Germans on the Somme front since the allied offensive began on July 1. Both north and south of the Somme, the Teutons assailed the allied lines with the greatest fury, driving forward in dense masses.

Germans Are Repulsed.
On the British front, the most savage attack was directed against the Schwaben redoubt, by a German force in considerable strength, this morning. The Teutons were repulsed with heavy losses at all but two points, where they entered British trenches, only to be ejected later. The British took as prisoners five officers and 33 men.

Teutons Obtain Foothold.
On the French front, the most powerful counter-attack was delivered against the village of Sully-Sailly, captured by the French in Veslun, the fighting. The Teutons came forward in grey waves, only to be rolled back under curtain and machine gun fire, according to the French war office.

South of the Somme the Germans attacked recently lost positions between Biaches and LaMaisonette (west of Peronne), and along the Blaise wood, where they were especially fierce fighting. By the aid of liquid fire, they obtained a footing in the northern part of Biache wood, but elsewhere were repulsed with heavy losses. While this violent hand fighting was going on, British and French aviators engaged the German flyers in a score of air fights above the Somme front. General Haig reported that an allied squadron bombarded an important railway junction and ammunition depot, demolishing four railway coaches. Three German machines were destroyed and many driven down in air fights, the British commander telegraphed, and two British aeroplanes are missing.

Seven Lives Toll of Great Lakes' Gale
Two Ships Foundered, Captain of One, Who Was Taken From Rigging, Being Sole Survivor of Its Crew.

Detroit, Oct. 21.—(U. P.)—After 24 hours in shelter, while a 56-mile gale lashed the Great Lakes to fury, lake shipping was resumed tonight. The storm took a toll of seven lives and sent two ships to the bottom of Lake Erie. Only timely warnings from the government weather bureau, officials here declared, prevented a repetition of the scenes of "Black Friday" in November, 1913, when a score of ships were battered to pieces on the Great Lakes and 250 sailors died.

With the arrival of the steamer E. G. Hartwell at Detroit this afternoon bearing 10 survivors from the wreck of the steamer Marshal F. Butters, the dead from last night's storm was definitely fixed at seven. Of these, six perished when the barge D. L. Fier foundered off Bar Point, Lake Erie, after a futile 12-hour battle against heavy seas. The seventh was the wheelman of the Butters, who died when the lumber carrier went down off Southeast Shovel, Lake Erie.

Captain John Mattison of Muskegon was the sole survivor of the crew of his sunken ship by members of the crew of the passenger liner Western States, who reached him in a lifeboat, after a thrilling two-hour battle with the waves.

Their Own Returned.
Chicago, Oct. 21.—(U. P.)—"We're only getting some of our stuff back," masked victims told Frank H. Halley, confessed operator of a handbook, as they relieved him of jewelry and \$200.

COUNTY OFFICIALS ARE PREPARING ESTIMATES OF NEXT YEAR BUDGET

Consideration by Advisory
Committee of Nine Will Begin
About First of Month.

MILLAGE MAY INCREASE

Decrease in Assessed Valuations Likely to Result in Greater Rate—Increasing Statistics Prepared.

Under instructions from the board of county commissioners heads of county departments are preparing their estimates for next year's budget.

Consideration of the budget by the advisory committee of nine will begin about November 1. The committee has not yet organized. The name of the committee is being discussed in connection with the chairmanship. The committee will be composed of the following: W. F. Lippman, A. Bennett, Frank Keenan, E. H. MacNaughton, H. E. Reed, S. B. Martin, F. C. Riggs, G. C. Chapman and Abe Tichenor.

The 1916 budget called for a levy of 4.2 mills or a total of \$2,096,324.33 for county purposes, including county schools and library.

Segregated the budget was as follows: County schools, \$448,860.92, tax, 1.35 mills; county, \$752,821.67, tax, 2.45 mills; roads and bridges, \$631,021.33, tax, 1.95 mills; county library, \$145,194.21, tax, .45 mill.

Valuation Is Key.
The total valuation of property in the county for 1915 was \$223,600,530. Since the assessment was made there has been a shrinkage and a rough estimate of the amount on which the 1917 budget is to be based is approximately \$200,000,000.

If the amount to be raised next year approximates this year's figures there will necessarily be a slight increase in the millage.

Another factor to be considered is the proposed constitutional amendment limiting the county's debt to an increase of 5 per cent over that of the year immediately preceding. If that should be adopted at the coming election the 1917 budget can not be increased more than 5 per cent of the amount raised in 1916. So far as the overhead expense of the county is concerned there is not expected to be any material pruning.

May Cut Surveyor's Office.
There has been a suggestion that a saving can be made in the operation of the county surveyor's office. There was allotted to this office last year the sum of \$4000. Since the establishment of the roadmaster department a great deal of work formerly done by the surveyor has been transferred to that office. The levy of the county surveyor is \$1500 per year and those who advocate a retrenchment here would fix the appropriation at about that figure, eliminating employment of all assistants.

The chief work of the advisory committee will be in the consideration of the road budget, proposed county buildings and other improvements.

Over \$500,000 was raised this year for roads. The road tax was 1.95 mills. Road improvements in prospect for next year will call for approximately the same amount as this year. If they are approved, the levy will be in the neighborhood of two mills.

Numerous Improvements Planned.
Among the proposed improvements is the regrading and hard surfacing of the St. Helens road to the Columbia county line, the completion of the pavement on the Canyon road, which is being regraded, and the completion of the pavement on the Capitol highway connecting it with the Terwilliger boulevard.

It is also desired to pave the Palatine hill grade, recently finished. Another important project is the construction of a new road from Graham to the Washington county line, which will ultimately be the main line of traffic between Portland and the Tualatin valley towns. This improvement is much desired by the residents of Washington county, as it will give them an easy access to the Portland market.

May Improve Secondary Roads.
On the east side of the river it is desired to extend the hard surface on the Popple Valley road from Graham to the Clackamas county line, forming ultimately a link in the proposed Mount Hood loop road. There is also a demand for hard surfacing of eight-second street to the Clackamas county boundary, but a difficulty is in the way by reason of the fact that the city grade is considerably below the present road bed. The improvement would involve a great deal of grading, and the work would be expensive.

Besides these paving projects, it is contemplated to improve many of the secondary roads of the county, bringing them up to the general standard for macadamized and paving.

County Auditor Martin has prepared some interesting statistics on the expenditures of the 1916 budget exclusive of the county schools and library.

Auditor Prepares Statistics.
The budget allowance was \$1,167,076.80. From this was taken \$62,500, interest on the Interstate bridge bonds, making altogether \$1,104,576.80.

The average budget allowance per month was \$92,048.06. The average expenditures per month for the past nine months have been \$83,706.37, or an average saving over the budget allowance of \$8342.69.

This was purely for county administration. In the road fund the budget allowance was \$831,029.10, or \$52,585.76 per month. The nine months' expenditures averaged \$57,000 per month, or at most of the road work for the year has been finished, the expenditures for the next three months will be a great deal less. In the county administration there has been paid out for salaries during nine months' period, the sum of \$336,147.05, or 44 per cent of the total. For extra labor, \$35,369.58 was paid out, or about 3 per cent of the total. For stationery, supplies and material has been \$107,351.80, or 14 per cent.

Total of expenses for the nine months has been \$753,348.33. Out of the road fund there has been expended a total of \$477,315.68, of which \$402,767.76 went into salaries and \$158,358.92 went into labor. Supplies and material have cost \$144,817.87. There has been paid out on contracts \$26,576.25.

The charge for salaries and labor is approximately 50 per cent of the whole.

British Columbia to Mexico Road Urged
Samuel Hill Would Have Government Construct Coast Highway for Military Purposes; State Road Also.

San Francisco, Oct. 21.—(U. P.)—Construction of a highway from British Columbia to Mexico, to be built by the United States government for military purposes, and of the upper Sacramento or Pitt river road, to connect California with British Columbia, was urged today by Samuel Hill, president of the Pacific Highway association, and known as the "father of the good roads movement," in an address before the San Francisco Commercial club. Mr. Hill also advocated the Swiss system of military training for the public schools of Washington, Oregon and California.

Speaking of the proposed highways, Hill declared one should be built by the government and the other by the three states.

Mr. Hill showed pictures of the highways and scenic spots of Oregon, Washington and California, interspersed with pictures of many prominent highways of the world.

VON HINDENBURG HAS RESUMED CAMPAIGN TO CRUSH ROUMANIA

Huge Force of Germans,
Bulgars and Turks Ham-
mers Russo-Roumanians.

LATTER FORCES RETREAT

Retirement Is Indicated on Frontally
Attack Dobruja Front and Is
Admitted by Both War Offices.

By Ed. L. Keen.

London, Oct. 21.—(U. P.)—Suddenly shifting the attack to Dobruja, von Hindenburg has resumed his campaign to crush Roumania and put King Ferdinand's forces out of the way.

Under command of Field Marshal Mackensen, who directed the Teutonic roller through Serbia, a huge force of Germans, Bulgars and Turks is striking heavy hammer blows against the Russo-Roumanian line. Mackensen is attempting to break through the Russo-Roumanian line by terrific smashes of infantry and artillery and seize the important Constantinople.

On practically the entire Dobruja front, where the Russo-Roumanians have given way under the first shock of this mighty offensive, official dispatches indicated tonight.

Retreat Was Orderly.
Part of the line of fortified works behind which the Russo-Roumanians retreated when they fell back 40 miles under Mackensen's first great blows several weeks ago, have been surrendered to the enemy. The retreat, however, was orderly, the official reports indicated, the Russo-Roumanians falling back on previously prepared positions.

The German war office this afternoon announced the capture of the Black Sea port of Tuzla, only 12 miles from Constantia, together with the main positions of the Russo-Roumanians on the heights along a wide front. Three thousand Russians, a few hundred Roumanians and 22 machine guns were captured, Berlin reported. German flyers playing an effective part.

Retirement Is Admitted.
Both the Roumanian and Russian war offices admitted a retreat under Mackensen's attack. An official dispatch from Bucharest tonight said that enemy attacks in Dobruja forced a retirement on the center and right wing, but did not mention the loss of Tuzla. An earlier official statement from Petrograd admitted the loss of a Dobruja village.

In all other sectors of the Balkan war theatre, the fighting is growing more violent, with the approach of winter interfering with activities on other fronts. Saloniki dispatches tonight, reporting the arrival of fresh Russian and Italian contingents, while the Serbs press their advance on Monastir, indicate that the allies are preparing to press their Macedonian campaign with the utmost vigor.

On the Transylvanian frontier the Roumanians have driven the Teutons back toward the Tisza on the Hungarian sector and in the Bistritza valley, the Roumanian war office announced. Roumanians surrounded an enemy force that occupied Mont Sinespa and took 500 prisoners, two guns and five machine guns. In the Ugal valley the Roumanians repulsed enemy attacks, but in the Buseu valley they were forced to retire.

The Serbs have defeated the Bulgars in another battle in the Monastir region, it was officially announced tonight, capturing 144 Bulgars and taking four field guns, seven machine guns and a large quantity of war material. The Serbs are advancing in the direction of Balduel.

Allies Receive Reinforcements.
Salonica, Oct. 21.—(U. P.)—Fresh Russian and Italian forces have been landed in Greece to reinforce the allies.

On the allied left wing the Serbs have repulsed all German counterattacks. British warships bombarded Bulgarian defenses on the lower Struma.

Canada's Wheat Crop Short.
Washington, Oct. 21.—(U. P.)—The Canadian wheat crop this year will fall far below the production in 1915, with an estimated total yield of 168,811,000 bushels, as compared with 376,303,600 bushels last year, American Consul-General Foster, at Ottawa, reported to the state department.

A bed that folds into a wall and is hidden by a pair of doors is the idea of a Colorado inventor.

Axminster \$19.88 RUGS, 9x12

Less Than Wholesale Cost—No Phone Orders—None Sold to Dealers

Edwards' Rug Department will be packed, jammed all week with enthusiastic purchasers. Think of going into a retail store and buying a rug for less than a dealer could buy it wholesale! This opportunity is yours — if you can come in this week.

ONLY ONE TO A CUSTOMER—THE QUANTITY IS LIMITED
The PATTERNS offered are Orientals, medallions and conventional designs. Large rugs suitable for any room in your home.

\$1 SENDS IT TO YOUR HOME

OUT-OF-TOWN FOLKS
Here is your opportunity to secure a rich, soft, warm rug for your dining or living room. Orders must be in the mail by Saturday night. Inclose with your order 75c extra for packing. If you have not received our big, new stove circular, send for it today—it's free.
