### American Markets Active for Apples At Liberal Prices

Local Receipts Are Increasing, But Prices Are Stationary-Good Tone in East.

Generally speaking, there is an active and strong market for apples throughout the United States. An incomplete report issued by the United States department of markets Be Moved on Account of Lack of slows 448 carloads shipped during the preced-Local market continues steady, with re-

Potato prices climbing.

East is buying onions.

Unusually heavy buying of potatoes is slown in the country tributary to Portland, as well as in Central Oregon.

Most of the purchases of No. 1 shipping sick are reported in the country at \$1.25 per cental f. o. b. cars where the freight rate to outside points is the same as from Portland.

For selected lots as high as \$1.35 per cental has been paid in the country, but this price is that the present trade is entirely a speculative affair.

If the trade here could get its shipments through and take advantage of the extreme prices now in effect in the California markets, they would be able to advance their present bids. This is not possible because cars canhor be obtained for shipment and this causes the famine in California and the extreme prices there.

Far the greater bulk of the recent purchases of potatoes in this section by shippers

Far the greater bulk of the recent purchases of potatoes in this section by shippers have been rushed into warehouses awbiting cars for shipment. It may be that later prices will be higher than at present and the dealers secure still greater profits, but they are taking chances on the future and may possibly lose.

CABBAGE MARKET TO ADVANCE

# Bearish Sentiment Stops Rising Trend Of Chicago Wheat

December -Russian

Chicago, Oct. 24.—(U. P.) — The upward tend of wheat was cleeked today by a bearlich pit sentiment. Cables indicated that reports of Argentine crop demage had been exaggerated, and that weather there was unsettled and showery. December was unsettinged over today's opening at \$1.75 and May was up 4c at \$1.74%.

Corn was weak today on general selling, December was down 1%c at \$7%c and May down %ac at \$8%c. Outs had a good opening, but a reaction sent May down almost to the point of yester day's close. December was up %c at 53%c and May down %c at 56%c
