To remove freckles, blotches or any complexion difficulty, the best thing to do is to remove the skin itself. This is easily and harmlessly done by the application of ordinary merculized wax. The wax peels off the defautive outer skin, a little each day, gradually bringing the second layer of skin to view. The new skin is beautifully soft, blear, white and young looking. Just procure an ounce of merculized wax at any drug store and use like cold cream.
