Charles A. Benz says that on the night of October 20, Jesse Sill of the Northwest Weekly began to think out loud at the Mazama club concerning the possible triumph that might attend such tremendous picture taking.

Results were prompt. By 8 o'clock of the following Sunday morning the party was on its way lugging moving picture cameras, color photograph cameras and cameras for black and white. There were Jesse Sill, Frank Ives Jones, L. Wernstedt, M. H. Barnes and Mr. Benz aboard J. L. Snead's automobile, bound for Government Camp. At Sandy they added Lije Coalman, famous mountain guide whose summer residence is 12,225 feet above the sea in the staunch little house on the very peak of Mount Hood. The story of the trip is told by Mr.

Benz who also made the pletures which accompany the article. It was the last ascent of the mountain for this year, he says. The atmosphere was so clear and frosty, views of mountains and can-yons, autumn colorings were so start-

"We reached a point near timberline shortly before sunset and pitched our camp beside a huge boulder and sheltered by several large trees on the east side. After building a large fire against the boulder and preparing our sleeping quarters with a generous supply of fir and cedar boughs, we sat around the fire and ate our dinner, consisting of soup, sandwiches, bread, butter and would be insufficient for breakfast so several of us started in search of a ax to remove some of it.

"I hesitated, then tried to adjust my color screen but found my fingers so numb from cold that I decided to close my camera and follow the party. Reaching the crevasse, we gasped for breath, and as it began to get dark we were wondering if we could find the course taken by those ahead. We found the water filled steps almost frozen and we could hardly tell that we were crossing a steep ice slope where a misstep meant a sure descent into the jagged crevasse several hundred feet below. The young mother rapidly followed her, not losing sight of her until the woman reached her home. There the girl convinced the woman that she really was the mother of the baby, and was allowed to take the child.

As stated, the girl was employed in laundry and so was a certain youth year or two her senior. Their friendship ripened into love and a promise to wed. A mis-step was taken in 1914, and four or five months before the baby came the young man left for the home of his parents in a distant state, leaving the girl to face her trouble Girl's Parents Angry.
