NATION-WIDE STRIKE ON RAILROADS NEVER TO OCCUR, SAYS LEE

"No Matter What Decision Is Handed Down by U. S. Supreme Court," He Adds.

CHAIRMEN INDORSE STAND

Heads of Local Committees, 640 in All, Declare Bogy of Strike Must Be Laid.

Chicago, Jan. 13.—(I. N. S.)—W. M. Lee, president of the Brotherhood of Railroad Trainmen, declared last night that there never will be a nation-wide railroad strike.

"No matter what decision is handed down by the United States supreme court, you never will hear any of us threaten a strike which would tie up the railroads of the nation," he declared.

The statement was made immediately after the adjournment of the meeting of 640 chairmen of the four railway brotherhoods. The chairmen unanimously passed a resolution indorsing the recommendations of the chief executives to allay public fear of such a gigantic struggle as a nation-wide strike would bring.

Powers Given Leaders.

They also voted full confidence in their four leaders and placed in their hands the same power they held when the last meeting of the chairmen was held in Washington, August 28.

"We want the shippers and the general public to rest content with our pledge," said Mr. Lee. "A little later a statement signed by Warren G. Stone, W. S. Carter, L. E. Sheppard and myself will be given out.

"If anyone in the future tries to create a fear in the public mind that a general strike will be called you can be assured he is not acting for the four brotherhoods, but against them."

The declaration of assurance to the public came after a day of debate. The bill presented by Congressman Adamson, providing for a straight eight-hour day and compulsory investigation before a strike could be called, was condemned by every speaker. The chief executives were instructed to use every means to defeat the bill.

Each chairman was appointed a committee of one to confer with the United States senators and representatives from his state and inform them of the united opposition to the enactment of any law which will prevent railroad men from bettering their condition.

National Strike Discussed.

The question of a nation-wide strike was taken up. Many chairmen reported that it would be a calamity to wreck the business of the nation by a strike of that magnitude. It was charged that not to deny the many rumors afloat now would injure the members of the four brotherhoods.

"Circumstances have changed," said President Lee. "We must not be placed in the position of threatening the supreme court. Now is the time for us to take a firm stand that a nation-wide strike will not be ordered, even if the supreme court decides against us.

Conviction Is of Victory.

"It is my firm belief that eventually we will gain the basic eight-hour day with 10 hours' pay, as recommended by the president and congress. With the president so firmly for those principles, we can rest content for the time being."

The chairmen then unanimously instructed the chief executives to state clearly the trend of the brotherhoods on a nation-wide strike.

President Lee said the action did not mean that no strike of any kind would not be called in the future. He said that as in the past, there may be occasions when strikes will be ordered on one of more railroads. The power to call a strike is held by the chief executives of the four unions, he said.

A German scientist claims to cure obesity by treating patients with small quantities of certain metals introduced into their food.

HALF AUTO AND HALF SLEIGH SOLVES PROBLEM OF RUNNING IN SNOW

© INTERNATIONAL

Virtue White of West Ossipee, N. H., devised this scheme to overcome the difficulties of traveling through the deep snows of New Hampshire. The front wheels of the auto were removed and placed under the body of the car just in front of the rear wheels and the two sets of wheels were then connected by anti-skid chains. This prevents slipping and gives a greater driving surface and also prevents the car sinking in the snow. In place of the front or steering wheels, a set of runners was provided. Mr. White has attained a speed of 24 miles an hour with his novel vehicle.

Snow in Mountains Presages Good Grass

Pendleton, Or., Jan. 13. — There is three times as much snow in the mountains of Umatilla, Morrow and Grant counties as there was at this time last year, according to readings of snow stakes just completed by forestry officials. This fact insures good range conditions next spring and summer and an abundance of water in streams.

The deepest snow was found in Granite meadows in the south end of this county. The average depth there was 56 inches against 20 inches a year ago.

In Morrow county the greatest depth was 45 inches at the head of Willow creek against 15 a year ago. The snow is well packed. The heavy snows of a year ago came in January and February.

CHANGE TAKES PLACE IN NORTH BEND MILL & LUMBER COMPANY

Boston Man and San Francisco Concern Said to Have Controlling Interest in It.

CAPITAL ALSO INCREASED

Deal Includes Purchase of Steamer Yellowstone and Business Will Be Extended By Improvements.

North Bend, Or., Jan. 13.—It is reported here that a change has taken place in the ownership of part of the stock in the North Bend Mill & Lumber company and that about $200,000 additional capital has been put in the business. C. K. Hudson, who came here from Boston some time ago, is said to be one of the heavier investors and it is understood that he and Swayne & Hoyt of San Francisco now will have the controlling interest.

The sale is said to have come about through the purchase of the stock of L. J. Simpson and the Standish Hickey company, and the purchase of the steamer Yellowstone from Swayne & Hoyt. The Yellowstone for some time past has been carrying lumber from the mill but as a Swayne & Hoyt boat.

George Stephenson is manager of the mill and the plant has been in operation steadily for the past three and one half years when many of the other mills were closed down. The plant has been a paying one. It is said that the business is to be extended by improvements which will be made.

Marshfield Nurses Police Scandal.

Marshfield, Or., Jan. 13.—It is reported that Mayor Copple has demanded the resignation of Chief of Police John W. Carter and the matter is to come up before the city council at the meeting next Monday night. Recently the mayor had the members of the police force on the carpet for not arresting bootleggers who, it is alleged, have worked rather freely in the city during the past two months. It is possible the action may result in an investigation of the force.

Children of Luxury Larger in Physique

Oakland Survey Shows That Offspring of Rich Parents Are Taller and Bigger Than That of Poorer Families.

Oakland, Cal., Jan. 13. — (U. P.) — Children of rich parents are taller and bigger generally than children of poorer families.

Officials of the Oakland schools announced this today following a survey made in cooperation with University of California experts, during which 100 children, taken at random, were examined.

Children living in residential districts averaged 56.8 inches tall and 59.6 pounds in weight, while children living in factory districts averaged 48.6 inches tall and 53.3 pounds in weight.

Hunt for Forester Continues.

Bend, Or., Jan. 13.—To take charge of the hunt for Forest Guard J. Russell Christensen, lost in the snow in the country adjoining Crescent, V. V. Harpham and Ranger Ed. Mann, were sent out Friday from the Deschutes forestry office here. They will travel by auto to Paisley, where they will be joined by Rangers Burton Oney of Big River and William O. Harriman of Fort Rock. They will go by team to Crescent, remaining over night and starting out early next morning for Rabbit creek, in which vicinity the rescue party is working.

Bend Population Is 5193.

Bend, Or., Jan. 13.—The official population of Bend is 5193. This was the purport of an affidavit filed by H. J. Overturf, chief enumerator in the recent school and municipal census, with City Recorder H. C. Ellis Friday. The number of individuals residing in the district, of school age, was given last month, but because of considerable work in the way of tabulation a delay in announcing the number of residents actually residing in the city was necessitated.

DESCHUTES COUNTY SCORES FIRST POINT IN FIGHT FOR ITS LIFE

Judge Duffy, at Bend, Sustains Motion to Strike Portion of Original Complaint.

Bend, Or., Jan. 13.—Deschutes county scored its first victory on Friday in its fight to maintain its individuality as a separate corporation, when Judge T. E. J. Duffy sustained the defendant's motion to strike out a portion of the original complaint.

The advantage is now on the side of Deschutes county, it is believed, as the previous motion of the defendants, decided against them, was to quash service, and the refusal of the court to sustain had no bearing on the former status of the case.

Hospital Practically Secured.

Bend, Or., Jan. 13.—Resident Catholics and non-Catholics, through their contributions, have practically assured the erection of the hospital in Bend, proposed by the Sisters of Charity of Nazareth, whose headquarters are in Lexington, Ky. Of the necessary $6750 with which to purchase the property in Bend, approximately $5000 has been subscribed by local citizens desirous of seeing the institution situated in Bend. It is expected that the entire amount will be subscribed by the end of the week and the final details of closing the deal for the purchase of the property known as the water-tower site, will be completed.

PORTLAND SHIPS HER HORSE COLLARS EAST, MAKES OWN FURNACES

MANUFACTURERS' DIRECTORY

(Names in blackface type save announcements, containing their addresses, on the manufacturers' page. Addresses of others may be obtained from the telephone directories. Many manufacture for the jobbing trade only, but in all cases buyers should demand the products of our home institutions.)

Albers Bros. Milling Co., breakfast foods and health cereals.

WEST IS NOW GETTING ON THE EASTERN MAPS FOR PORTLAND-MADE HORSE COLLARS AS WELL AS OTHER PRODUCTS MADE HERE GO THITHER

Now No Longer Is It Necessary to Go "Somewhere Else" for Many Things That Everyone Uses or Requires, as Most Needs May Be Filled Right at Home.

J. C. Warnock, proprietor of the Enamel Bake Ovens, 504 Burnside street, is the true "muddy season" friend of the autoist. When the "liquified" earth has marred the appearance of the car hood and fenders, and they are brought to him, he turns them out as new in appearance as when they left the factory. His clientele is from all parts of the state.

The Finke Brothers' cooperage works, 183 Madison, notwithstanding the prohibition law, is doing a better business now than at the same season of 1915 when Oregon was "wet." These gentlemen make anything to be had at any cooperage factory in the country, and in addition sell great quantities of staves and hoops, which are shipped elsewhere.

The Pacific Ladder works, 505 Albina avenue, is busy filling orders for next season's fruit picking. This is one of the very complete factories of the city.

The new life and vigor instilled into the mining industry of the coast is manifest in the Montana assay office, 34-38 Second street. Ores are being received from both the eastern and southern mining regions of the state, and are being tested there. This concern's announcement published herewith describes the broad ground it covers in its work.

The Columbia Carriage and Auto works, 209-11 Front street, is "chock-a-block" with work all the time. When cars or trucks become crippled and maimed and halt and blind, if delivered to the Columbia people they will soon be turned out as spick and span as a lily. They surely know how to "doll" things up.

The Crystal Springs Finishing works, 135 Tenth street, hasn't any "cry" coming. The manager declares that everybody seems to have bunches of money this January—judging from the sales of the company's wool bats and mattresses.

The Hesse-Martin Iron works bought the plant of the Vulcan Iron works, consolidating that outfit with the former. This gives this enterprising institution an equipment enabling it to largely increase its force and more expeditiously handle its speedily expanding business.

When Chicago dealers order Portland-made horse collars, it is a pretty good sign that the west is getting on the eastern map. P. Sharkey & Son, East Oak and Union avenue, have made generous sales in that city, and now all horse collars used by the Wells-Fargo Express company in Chicago are made at the Sharkey factory. And, in fact, they are in use in other cities also by the Wells-Fargo corporation.

The Kadderly furnace, invented a few years ago by J. J. Kadderly and manufactured for his hardware store at 130 First street, has given such satisfaction that its sales the last six months have exceeded those of any previous year. So far this month they have averaged almost one a day.

It is no longer necessary to send "somewhere else" for a first-class hearse. The Oregon Hearse and Body works, Second and Taylor, have a surprising business in that line. It extends from northern California to many points in western Idaho and Montana. This concern can take an ordinary automobile and on removing its body convert it into a first-class hearse. The cleverness of its mechanics in this work is certainly interesting.

Families having their laundering done at home are becoming familiar with the excellence of the Mount Hood Easy Day washing soap. It costs but 5 cents to try this new production of this big factory.

The Shope Brick company, 361½ East Morrison street, inventors and owners of patents on an entirely new kind of brick, suitable not only for walls but ornamental purposes, is selling a large number of equipments for its manufacture in the territory comprising Oregon, Washington, Idaho and Montana. The product is rapidly coming into favor whereever known.

Good times in the country is evidenced by the business among farmers of the Sam Connell Lumber company's ready cut house department. These structures are cut to faultless measurments by machinery that makes no errors, and when received by the purchaser may be readily put together. The expense of building is greatly lessened, for the reason that the slow and tedious handsaw, jack plane, etc., is entirely eliminated. It is a new and modern way of home construction.

They will tell you in Kansas that the manufacture of Mentholatum in Wichita put that city on the map. Camthol is apparently starting in to do the same thing for Portland. Its factory is at the foot of Burnside street, and its product in nearly every drug store in Oregon and adjoining states.

One of the largest retaining walls in the world has been built at Rangoon, Burma, to prevent a river shifting its channel.
