### Present System Scored.

The present juvenile court system was scored as unjust, inefficient and party last Saturday evening in combasically wrong. The system is without heart, it was declared, being purely punitive in its work rather than aimed toward the uplift of the child

Instances were given of records being faisified and children wrong-fully accused of misdeeds. Too much is the work of the court left to untrained subordinates, it was charged. The bureau of juvenile and parental relations is aimed to do away with existing evils and to put heart and soul and justice into the work of caring for delinquent and dependent To Entertain at Opera. children, the child getting real repre-

sentation. Plans were discussed by the coun-

cil for a city-wide garden day on March 15, the day to be devoted to the making of gardens and the utilization of all vacant lots in Portland. The Parent-Teacher organization has adopted . "Portland More Beautiful" as a slogan.

### Cooperation to Be Asked.

Persons of means as well as those who find the present cost of living onerous will be asked to cooperate with a view to putting every lot to use, either for vegetables or flowers. Twenty sacks of seed have been procured from the department of agriculture at Washington as well as a large supply of seed potatoes. N. F. Johnson, in charge of the men's de-partment of the municipal employment bureau; Commissioner George L. Baker, and School Garden Supervisor Reed, are assisting the Parent-Teacher council in this work. And through Professor A. G. Bouquet, who was present at the meeting, the cooperation of Oregon Agricultural college

was offered. Garden day is to be observed in interest the pupils in gardening, and it is planned to distribute a large number of rose bushes for planting. A vigorous campaign in behalf of municipal garbage collection, which comes before the voters in June, will be carried on by the Parent-Teacher organizations of the city. Dr. George B. Storey, a member of the former city health board, discussed the advantages of municipal garbage collection from the viewpoint of health and sanitation.

# **Cut This Out and Save It**

The spirit of 1776 plus the intelligence of 1917 demands that every citizen KNOW what this government is doing in the present international situation and why.

## This suggested course of reading will give you FACTS.

The big international problems that we, as a nation, face to-day concern every man and woman, every boy and girl of this land. They concern every United States citizen of the present and every United States citizen to come for scores of generations.

History is making rapidly. This country of ours has lost its "splendid isolation." Gigantic world-forces are in operation. The ship of state is being navigated through the perils of new waters. We are feeling the pull of great tides and currents.

The President needs the intelligent support of every citizen. Intelligent support means an understanding, not a hope or a belief, or a faith, or a partisanship, but an understanding. A knowledge of FACTS.

> It means being able to answer correctly the multitude of questions about international and national affairs that are being asked wherever ... people gather together.

On all sides, men and women are wondering, supposing, guessing. This does not get anyone anywhere. FACTS will make a better citizen of YOU. Facts will help you to think, decide, act, clearly, intelligently. And the facts can be known by everyone, with very little effort.

Now, when there is so much confusion of talk and opinion, it is good to know that in The Encyclopaedia Britannica you will find an almost inexhaustible fund of information and facts about international affairs, international agreements and usages, about our own national government, its powers and resources -facts that are quickly available and positively authentic.

> We realize that NOW is the time when people want this information. To make the facts especially easy to find we here publish a list of Britannica references that anyone can quickly look up and get from them definite, correct answers to the thousands of questions people are asking themselves and each other every day.

Whether you own the Britannica or not, cut this advertisement out and save it. Put it in your pocket. Study it. You who own the Britannica will go straight to the questions you are asking or being asked. You will quickly know the basis in history or usage or agreement for the actions of this government and of Germany, England, France, Italy, Austria, Belgium and all the world powers.

If you do not own the Britannica take this reference list to your library or to some friend who does own the Britannica. Learn the facts. Get posted. Patriotism demands this much of you. The security of the nation is in the keeping of men and women who know.

### Daly Outlines Plan.

Commissioner Will H. Daly out-lined to the council his municipal lighting plan. A committee was appointed to investigate into the merits of his proposal with a view to working actively in its behalf if the committee report is favorable.

Mrs. Bonnie Merrill was named chairman of a committee to make an investigation of the juvenile court. looking into its attendance department and the matter of false reports. Others on the committee are Mrs. A. R. Mattingly, Mrs. Thomas G. Green, Mrs. E. J. Steel, Mrs. Ewell and Mrs. Bonham. Reports will also be made following investigation on state and county institutions with a view to cooperation where possible.

Mrs. May Althea Drennon, in charge of the industrial bureau of the Portland Chamber of Commerce, read a paper on "Industrial Realities and Possibilities.

### Must Prefer Local Products.

'To build up the community industrially," said Mrs. Drennon, "we must give more of our capital for industrial investment, and we must learn to make these investments intelligently that we may be able to back up sound enterprises instead of being taken in by industrial 'wildcats.' We must support patriotically and energetically home products. This need not be in form of a bitter bias against everything imported or brought in from the outside, because that would be destructive, but we must safely and in a wholesome way give preference to the local product where price and quality are equal. and do away with the miserable fad that because a thing is brought from a distance, it has greater value than if it is 'made at home.'

Mrs. Drennon told of plans for a Home Industry league of the Chamber of Commerce, being organized to lay before the consumers of the state importance of supporting home industry. She also outlined that growth of leading industries of the state.

### How You Can Make Hairs Quickly Disappear

### (Helps to Beauty)

Even a stubborn growth of hair will quickly vanish from the face, neck or arms after a single treatment with delatone. To remove the hairs, make a stiff paste with a little powdered delatone and water, apply to hairy surface, and after about two minutes rub off, wash the skin and it will be left free from hair or blemish. To avoid disappointment, be quite certain you get real delatone.
