LOOKOUT HOUSES WILL BE PLACED ON PEAKS

District Forester Cecli Lets Contract for Material for Three Structures,

George H. Cecil, district forester. has just placed an order with the Mill Made Construction company for ready cut material for three standar! lookout houses to be erected at the summits of Mount McLaughlin, Diamond Peak and Rustler peak on the Crater National forest, in July.

These houses are 12 feet square, with a cupola six feet square. Both cupola and main part of the building have windows running all the way . around. The lower part of the house is the lookout man's living quarters, while the cupola contains the fire finder, maps, and other lookout equip-

The success in quickly discovering forest fires from lookouts stationed on Mount Hood and other high peaks has turned the attention of foresters to this form of fire protection work Besides the three houses to be erected on the Crater forest this season. lookout houses will also be placed on several other prominent peaks in Oregon and Washington. Material for a house on St. Helens, on the Columbia National forest, was taken nearly to the summit last fall, and will be set up as soon as it is possible to use the Spirit Lake road.

Mount Adams, also on the Columbia forest, will have a lookout station on its summit this summer, as the material is all ready to be trans-ported up the mountain. This station will be about 1000 feet higher than the one on Mount Hood, and will give protection to a large area of valuable timber.

According to recent official estimates there are about \$0,000,000 sheep in Argentina.
