WHEAT WILL BE PLentiful SOON, IT IS REPORTED

United States Food Administration Says Flour Mills Will Be Flooded With Grain.

FARMERS TOO BUSY NOW TO ATTEND TO SHIPPING

Plans Involving Increase of Capacity of Mills Are Now Under Consideration.

New York, Sept. 14.—(U. P.)—Within two weeks there will be so much wheat available for flour milling that the big northwestern mills in Minneapolis and other cities will not be able to handle it all.

This was predicted today by the United States food administration's grain corporation.

The wheat shortage in Buffalo, N. Y., mills has already been relieved, it was declared.

The United States grain corporation, with central offices in New York, is the federal government's organization for controlling the wheat situation.

It is in close touch with wheat handlers all over the world.

Mills on 90 Per Cent Basis An official of this organization stated today that some Minneapolis mills are running on 90 per cent capacity now because the farmers' sale of their crops at minimum prices are not in any rush to move the wheat to market.

With the prevailing good weather, the farmers are busy preparing the land for next year's crop, it was declared.

It was pointed out that the farmers see no advantage in hustling their crops to market, as they can go to the banks any time and get money for their wheat on the 90 per cent minimum price, which stands until July, 1918.

However, the grain corporation official said there would be no further slackening of milling operations in Minneapolis and elsewhere.

The next move will be to increase the capacities of these mills to handle the great flow of wheat which is sure to begin arriving within a fortnight.

Wheat shipments to the east all so carefully regulated that they will not affect America's bread.

Danger of Bread Famine Negligible In view of the fact that there is an extraordinarily big crop of wheat available, the danger of bread famine is negligible, the official said.

He emphasized the statement that under present conditions farmers are satisfied with the minimum wheat price fixed by the government, as they are making no effort to rush their crops to the mills during the present slight shortage in an effort to get a higher price.

Farmers Are Given Blame Chicago, Sept. 14.—(U. P.)—The American people, especially in the East, will be feeding extensively on rye, corn and even oatmeal bread, because of wheat shortage, wheat receipts jumped up to normal today when 452 cars arrived in Minneapolis yesterday.

Local grain dealers were more inclined to blame the farmers' failure to get their wheat to market, rather than their unwillingness to hold it in the hope that a higher price could be obtained.

The government is educating the farmers in this thing, said one dealer, "and as soon as they know how to go about it the mills will have more wheat than they can grind."

Federal buyers purchased 37 cars of wheat in Chicago yesterday.

Minneapolis Receipts Increase Minneapolis, Minn., Sept. 14.—(U. P.)—With one small mill shut down because of wheat shortage, wheat receipts jumped up to normal today when 452 cars arrived in Minneapolis yesterday.

Other millers declared farmers would soon be pouring wheat into the market. Plowing and other farm activities are keeping farmers busy on their fields and they are moving less wheat to market than usual.
