Washington-Tonight and Tuesday fair cooler tonight east portion; gentle winds, most

Weather Conditions

The pressure is low over California an northern Idaho and eastern Washington; elsewhere over the country the pressure is relatively high. The weather during the past 24 bours was fair except rains at a few scattered stations, the heaviest being 1.28 inches at Gal-veston, Texas The temperatures rose in the Rocky Mountain states. Missouri valley and the southwest, and fell in the eastern balf of the country, the extreme northwest, northern California and Nevada. The temperatures this morning are below normal in the Great Basin, the west Guif states, and quite generally east of the Mississippi river; elsewhere they are above. ALFRED H. THIESSEN.

#### Corvallis in Need BOTH SIDES MARKING Of School Building

Corvallis, Or., Oct. 3 .- Corvallis high school will open next Monday, but just how or where has not been determined, but probably in the several churches of the city. The new high school is not completed and will not be for a month or more, and the board of education has decided that it must do the best it can and open the session in some way October 8. The board will take up the matter with some of the nearby churches. The board also decided to penalize the Portland heating contractors \$30 per day on the heating system from September 15, the date when the contract called for its installation. The contractors have not yet done any work toward its installation and the school board thinks it is time to take drastic action. The delays on the building are said to have been un-avoidable.

#### Will Move Station

### Mobilizing for the War Your Uncle Sam is getting ready to fight.

All over the country, hundreds of thousands of artisans are busy with war preparations. Great warships are sliding off the ways; navy-yards and arsenals are working night and day; great mobilization camps are springing up as if by magic; everywhere the vast resources of the Nation are being gathered together for war.

All over the Bell telephone system, thousands of employes are busily engaged in all branches of telephone activity, to keep pace with the extraordinary telephone needs of the Nation. Everywhere poles are being set, and wires strung, central office equipment increased, new long-distance lines constructed between important points and telephone facilities increased.

The greater and more varied the Government's war activities become, the greater will be the demands upon the Bell system for service. With the increased Government requirements, there will be greater demands for commercial service.

The scarcity of material and labor have set definite limits to the amount of new construction, and the needs of the individual must be subordinated to those of the Nation.

It is going to be harder to supply new telephones, extension telephones and to put up wire to new telephone stations, because of the vast amount of telephone equipment devoted to the service of the Government, and because the Bell organization has contributed heavily to the draft, and many of our technically trained men have voluntarily joined the colors.

When you use the telephone, we ask you to remember the patriotic service we are rendering the Government, the extraordinary conditions we are facing, and to help us maintain good service by a conservative use of your telephone and equipment.
