NEW FRENCH MINISTRY

RECREATIONAL WORK IN-CANTONMENTS IN RESPONSIBLE HANDS

Y. M. C. A. and Knights of Columbus in Exclusive Charge of Activities.

Washington, Oct. 20.—(WASHINGTON BUREAU OF THE JOURNAL.)—Secretary Baker has issued a statement explaining why he has deemed it inadvisable to permit the erection of use of recreational buildings inside the army cantonments by organizations other than the Y. M. C. A. and the Knights of Columbus.

Various religious denominations, fraternal orders and athletic or recreational clubs have sought entrance to the camps to provide comforts or hold meetings for their membership. They have in some cases complained of discrimination because they were not permitted to do so.

Secretary Baker says the Y. M. C. A. and the Knights of Columbus have heretofore been engaged in such work, notably along the Mexican border, without any regard to questions of membership.

They have been granted permission to carry on similar work in the new soldier cities on condition that their buildings and meetings will be open to any soldier in the camps. "The Knights of Columbus," said the secretary, "will sustain exactly the same relation as the Y. M. C. A. and will hold no meetings to which all the troops in the camp are not invited, regardless of religious or other preferences."

The Young Men's Hebrew association in its recreational work has identified itself with the Y. M. C. A. and it seems to me that this task of ministering to the social needs of the soldiers has been met fully, in a way which will not needlessly complicate the machinery of camp organization.

IN TODAY'S PHOTOGRAPHS

ABOVE at the left is seen the wreck of a German sea-raider that has shot its last torpedo at any enemy or neutral vessel. The submarine was stranded on the beach near Calais. Before abandoning their craft, the Germans set a fuse to blow it up.

Mrs. William K. Vanderbilt Jr. and Major General J. Franklin Bell are seen above in the center while inspecting the hostess house at Camp Upton, Yaphank, L. I.

French trench torpedoes are seen above at the right. These powerful missiles are fired from specially designed turrets and they are much more effective than machine gun fire, hand grenades or shrapnel.

In a powerful blow recently struck at the Austrian forces by General Cadorna's armies, a great many prisoners were taken, some of which are shown below at the left.

Lieutenant William Thaw has been named to succeed Captain Thault as chief of the famous Lafayette escadrille, composed of American airmen in France.

The memorial to the late president, William McKinley, at his birthplace, Niles, Ohio, was dedicated by impressive ceremonies, featured by an address by ex-President Taft. The memorial is an imposing granite structure erected at a cost of more than \$500,000.

Below at the right is a specially posed photograph of the new French ministry recently completed by M. Painleve. Front row, left to right: Fernand David, minister of agriculture; M. Glavelle, minister of works; M. Chaumet, minister of marine; Koul Peret, minister of justice; Louis Barton, minister of state; Leon Bourgeois, minister of state; M. Painleve, president of the council of war; M. Ribot, minister of foreign affairs; M. Douler, assistant minister of state; Jean Dupuy, assistant minister of state; M. Klotz, minister of finance; M. Steeg, minister of the interior; M. Loucheur, minister of armament. Rear row, left to right: M. De Morzie, assistant secretary of marine; V. Petral, assistant secretary of interior; Daniel Vincent, minister of public instruction; M. Godard, minister of health; M. Bessard, minister of colonies; M. Dalimier, minister of arts and science; M. Clemenceau, minister of commerce; M. Bourely, assistant minister of finance; M. Renaud, assistant minister of works; M. Mourier, minister of justice and pensions; M. Dussini, minister of aviation; M. Long, secretary of revivallment; M. Breton, minister of inventions.

Only Aliens Left in West Virginia Town
Weirtown, W. Va., Oct. 20.—The selective draft will leave only foreigners in this steel-mill town. Of the 950 registrants here, it has been found that 700 are aliens who are exempt from military service. Practically every physically fit American will be taken in the first national army.

American Phone System in France
American Field Headquarters in France, Oct. 20.—(U. P.)—An all-American telephone system in France is completed and in working order today.

SACRIFICE MATERIAL AND SAVE LIVES IS PETAIN PHILOSOPHY

French Expenditure of Shells Averages a Million a Day and Will Go Higher.

With the French armies at the front, Oct. 20.—(U. P.)—For the first time in the world's history battles are being fought today on the French front where the number of artillerymen, "preparing" the attack equals—and often exceeds—the number of infantrymen in the assault.

Such concentration of artillerymen and of shells is the greatest development yet reached in the "warfare of material." It is the basis on which American troops will participate. When American infantrymen eventually are called upon to "go over" it should be after artillery preparation possibly not of a million, but of two million shells a day.

French fired day after day, an average of a million shells a day. Had the United States been in a position at that time to furnish France with one million shells a day indefinitely, the war might have been over by now.

Comparative figures show this great artillery development. In the German assault on Verdun last year the enemy seldom was able to fire over 200,000 shells a day. In the French attack on Verdun, August 20, the maximum of 400,000 a day was reached.

For the French portion of the Flanders attack in July, if all guns used had been placed side by side instead of in successive rows, they would have been too close together for safety in firing.

Petaim Saves Men
It is General Petaim's philosophy that no military commander now has the right to send human breasts against material.

In gigantic attacks during the summer in Flanders, on the Aisne, against Moronvilliers and Verdun regiments of French troops have captured pre-fixed objectives without a single soldier killed. The tremendous artillery preparation permitted it.

If America supports her infantry with an artillery program, equal in every way to that which the French have developed—and are now developing to even a greater degree—she can count not only on victory, but victory at a cost of less than will be proportionately smaller as her material preparation is greater.

600 U.-W. Students In Military Service

Seattle, Wash., Oct. 20.—Six hundred men from the University of Washington have gone to war, according to present estimates. Many of the fraternity houses have been closed because so large a number of their members have enlisted. Service flags, some with as high as 16 stars to a flag, are

furled from the houses that are open; and as the need becomes more and more urgent, many more stars will be won by new enlistments.

Two thousand two hundred seventy-eight students are enrolled at the university. Last year 54 per cent of students were men. This year war has reduced the proportion of men to 42.

Throughout the country college enrollment has fallen off from 15 to 25 per cent.

Reed College Notes

Dr. William T. Foster, president of Reed college, who recently returned to this country from American Red Cross duty in France, will arrive in Portland Tuesday evening. The men students are planning to meet him at the station in a military formation. There will also be many of the women present. Dr. Foster will be ready to begin his extension course lectures on his observations in the war zone after October 25. He has been spending the last week in Washington, D. C., settling matters after his return from France.

Norman F. Coleman, professor of English last year, and who is now at the head of the religious and educational work at the Y. M. C. A. at Camp Lewis, spent the last week end in Portland with his family.

held on Monday evenings for three-quarters of an hour to an hour after dinner are so well attended that they will probably be made a permanent thing and be held every Monday evening.

At a class meeting Friday the junior class elected its new officers. Walter Peterson was elected president, Helen Doyle vice president, and Madeline Johnson secretary.

The freshmen beat the sophomores at soccer Wednesday by a score of 3 to 2. The game was hard-fought throughout, but a stronger defense gave the freshmen the victory. The sophomores' offensive was stronger than that of their opponents, but they were unable to score more than twice.

Those who turned out to the lecture recital given by Lucien Becker were

well repaid, for the selections were all beautifully done. The next recital will be on the third Wednesday in November.

Jasper Jacob Stahl, instructor in German last year, who is now with the naval militia at Seattle, surprised his friends with a short visit this week end. He is in the executive office, and says that the life in camp, although the exact opposite from that he has been used to, is just as pleasing.

Dr. Irving Fisher of Yale will speak at vesper services in the college chapel this afternoon at 4 o'clock.

Beginning Monday, October 22, the Red Cross Institute will hold four meetings a week under the auspices of Paul Douglas. The days are Monday, Tuesday, Wednesday and Friday.

Five Minutes! No Indigestion, Gas, Sour Stomach—Pape's Diapepsin

Neutralizes acids in stomach, instantly relieving dyspepsia, heartburn, belching, distress. It's fine!

"Really does" put upset stomachs in order—"really does" overcome indigestion, dyspepsia, gas, heartburn and sourness due to acid fermentation in five minutes—that—just that—makes Pape's Diapepsin the largest selling stomach antacid and regulator in the world. If what you eat ferments and turns sour, you belch gas and eructate undigested food or water; head is dizzy and aches; breath foul, tongue coated; your insides filled with indigestible waste, remember the moment "Pape's Diapepsin" comes in contact with the stomach all such distress vanishes. It's truly astonishing—almost marvelous, and the joy is its harmlessness.

A large fifty-cent case of Pape's Diapepsin is worth its weight in gold to men and women who can't get their stomachs regulated. It belongs in your home—should always be kept handy in case of a sick, sour, upset stomach during the day or at night. It's the quickest, surest antacid for the stomach in the world. (Adv.)
