

SPRINGTIME BEAUTY CHARMS CITY FOLKS TO DAY OF PLEASURE

Fishing, Boating, Parks and
Woodlands Attract Throngs
of Sunday Visitors.

Portland got its baptismal realization of the opening of the aquatic sports season Sunday, when hundreds of water craft were out, their occupants enjoying the warm spell and taking advantage of the placid Willamette river.

Giving a suggestion of the real arrival of the boating season was an impromptu turn-turtle stunt of one venturesome canoeist. The accident took place near the Morrison street bridge and the man, after floundering about in the water for several minutes, was rescued by H. Turner, in the launch Edward E. of the Favorite boat house.

Up toward Oswego and in the vicinity of Jennings Lodge hundreds of small pleasure craft were counted. Motor-boats were churning their way at rapid speed throwing the spray as they cut the ubiquitous canoists were everywhere in evidence.

No estimate of the number of salmon pulled out of the Willamette toward the Oregon City falls Sunday is available, but the river was fairly black with boats all day, echoes of the joyous cries of successful fishermen mingling with the imprecations of those who let the big fish get away.

Despite the somewhat chilly temperature of the water numbers of hardy bathers went in swimming. Others enjoyed the pleasure of a near dip by disporting about on the river banks in their bathing togs.

Down at the Portland Flouring Mills a number of small boys enjoyed the real article of water sports. Oswego lake was visited by both men and women swimmers.

All of the bathhouses did a rushing business. A new departure in the way of charges was inaugurated by the proprietors of the bathhouses Sunday. The customers are taxed on the straight time basis, no reductions being allowed as in former years.

Land retreats had their share of city visitors. All suburban trains were crowded with the pleasure seekers. The automobile enthusiasts and the golfers were out to enjoy the day.

Five Teachers Dismissed
Oakland, Cal., April 22.—Five teachers at the Oakland Technical high school were formally dismissed today for alleged pro-German activities. They had been temporarily suspended several days ago. The teachers were Miss Elsie Mehlmann, Miss Minnie Hosen, Christian Bannock, Fred Schradt and Herman Steinblum.

Chauncey Jacques Saved
Marysville, Cal., April 22.—(U. P.)—Mrs. James E. Bradley received a telegram today announcing that her brother, Chauncey Jacques, first class fireman on the ill-fated steamer Lakemore, had been saved. The Lakemore was torpedoed April 11.

Solicitation for Liberty Loan Will End Here Tonight

Solicitation for the third Liberty loan in Portland will close tonight, "General" Guy W. Talbot announced today. His official statement follows:

"All solicitation on the part of workers is to end tonight, Monday, April 22. Colonels, captains and workers are hereby instructed to return receipt books immediately to Liberty temple."

"Subscriptions for bonds will continue to be received at the banks and at Liberty temple until May 4. "Work of compilation has been seriously retarded because workers have not returned their receipt books. Workers are, therefore, hereby officially notified to send in their receipt books, whether they have additional prospects or not, leaving names of prospects with officials at the temple, who will arrange to follow up prospects either through you or other workers."

"GUY W. TALBOT, "General. "JULIUS L. MEIER, "Lieutenant General. "CHARLES F. BERG, "Acting Lieutenant General."

Censor Is Accused Of Rifling Mails

San Francisco, April 22.—(U. P.)—Corporal Wilber L. Judd, United States army mail censor at the Ferry postoffice, is under arrest here today charged with rifling the mails, and is said to have made a complete confession. Coincident with the arrest of Judd it became known that the authorities are investigating alleged tampering with the mails on the part of the censors at Camp Lewis and Kearny. Judd is a regular and his home is in Cincinnati where he enlisted three years ago.

Mary Pickford's Curls Sell High

Chicago, April 22.—(U. P.)—Mary Pickford selling Liberty loan bonds here today suddenly cut off one of her curls and shouted, "Here, boys, how much am I offered for it?"

The curl went to Herbert Bohm for \$15,000.

Then she put up the pen with which she was signing bond receipts.

Burton P. Hales got it for \$15,000.

She offered to kiss Hales, but he lost himself in the crowd.

Burian to Stick to Germany, He Says

Zurich, April 22.—(U. P.)—Baron Burian, the new Austro-Hungarian foreign minister, has issued a statement in which he declares he will continue his fidelity to the German alliance, but that he will neglect nothing to bring peace, according to advices from Vienna.

Baron Seyditz, chairman of the Free Conservative party, has resigned because of differences over electoral reform.

HOWARD CUDAHY WAS THIRD OFFICER OF THE VESSEL FLORENCE H.

Portland Boy Received Commis-
sion in February, Soon
as Old Enough.

Howard Cudahy

Howard Cudahy, third officer on the ill-fated Florence H. is a Portland boy. His mother is Mrs. K. E. Cudahy of 500 East Twentieth street north, and his father is John W. Cudahy, chief clerk of the Western Union Telegraph company. He was 19 years old last February.

The young man was born in Grand Rapids, Mich., being brought to Portland when 11 years old by his parents. He attended and graduated from Stephens school in 1913. He next attended Lincoln high for two years. He entered the government nautical school on the U. S. S. Newport in New York five years ago last fall, finishing last summer as the youngest member of his class. Cudahy was so young, in fact, that he could not be given his commission as third mate until his birthday in February. Shortly after that he became third officer of the Florence H.

Cudahy received a silver medal upon his graduation for proficiency in seamanship.

His relatives in Portland have made every effort to find out whether he is among the missing, but so far have heard no news whatever. A message from Washington received last Sunday night stated that no list of either saved or missing had been received.

He had made three trips, the first on the transport Mongolia.

It is estimated that 5000 tons of tin are used yearly in the United States for weighing and finishing silk.

OFFICIAL REPORTS

BRITISH

LONDON, April 22.—(U. P.)—"We improved our position during the night in the Villers-Bretonneux (ten miles east of Amiens), Al-Bert and Nieuport forests." Field Marshal Haig reported today.

"South and north of Lens (mid-way between the Picardy and Flanders battle fronts) we conducted a number of successful raids, capturing prisoners and machine guns."

"In different sectors there was considerable reciprocal artillery fighting."

"The enemy shelling was directed chiefly astride the Somme and the Ancre, in the Lens sector, and in the neighborhood of Festubert and Nieuport forests."

"A strong local attack was made by the enemy last night in the neighborhood of Mesnil (four miles north of Albert), accompanied by heavy shelling. After sharp fighting, during the course of which the enemy captured an advanced post, the attack was completely repulsed."

FRENCH

PARIS, April 22.—(U. P.)—"An attempted raid by the enemy last night east of the Avre in the region of Thennes (east of Amiens), was repulsed," the French war office announced today.

"The French took some prisoners."

"East of Rheims the Germans tried three times to make surprise attacks against the French, but all failed."

"On the Picardy front the artillery was active."

CALIFORNIA ADMITS 4 KILLED BY BIG SHAKE

(Continued from Page One)

Into the street, a geyser-like sheet of flame shot up from Mount San Jacinto, an 11,000 foot extinct volcano. Then huge clouds of dust rolled over the mountain, obscuring it.

Had the earthquake occurred on a week day, scores of casualties must have resulted in Hemet and San Jacinto. Roads and walls of business buildings looked for the day, caved in and destroyed stocks of merchandise.

Fifty business buildings in San Jacinto and Hemet were destroyed.

The San Jacinto "river," which heretofore was a dry bed, was flowing a foot of water soon after the earthquake. It was believed an irrigation ditch near the base of the San Jacinto mountains had broken and let its water into the river bed.

School Building Cracked

Riverside, Cal., April 22.—(U. P.)—Practically every business block in San Jacinto was damaged by the earthquake, which struck the two cities at 3:31 Sunday afternoon. Many of the brick buildings crumbled, throwing the walls out into the streets and the roofs crushed in, damaging thousands of dollars' worth of goods.

One entire block on Harvard street in Hemet is in ruins and a number of buildings on Florida avenue are wrecked beyond repair. The two business thoroughfares of San Jacinto, lined by brick buildings, were hit hard by the quake and every one of the brick structures is down or in such condition that all will have to be torn down. Not less than 50 business houses in the two cities suffered losses.

Walls Crumble In
Fortunately, the quake happened on Sunday, otherwise there would have been a long list of fatalities. As it is not a life was lost in either city and only two women were hurt. Nellie J. Koehler was buried in the ruins of her store and was rescued suffering only an injured hand. The walls of this building crumbled and fell out, letting the roof down. It was necessary to dig the woman out of the debris. Anna Williamson, a telephone operator, was at the switchboard when the roof of the building fell in, burying her. Two other escaped. Miss Williamson received a bad cut on the head.

This morning it was conservatively estimated that the loss in the two cities will reach close to a half million dollars. The front of one building in Banning fell out, crushing three automobiles.

Water Tanks All Wrecked
Every water tank along the main line of the Southern Pacific railroad between Cabazon and White Water was wrecked. The Grant school and the county court houses were damaged in Riverside. Ornamental work was thrown from the front of the court house and the building is cracked in two places.

There are three cracks in the brick walls of the Grant school. It may be necessary to abandon the building as it is considered unsafe to permit the 750 pupils or more to occupy it. Bricks were thrown from buildings in this city and several plate glass windows were ruined. There is no damage reported from any of the other cities.

Near Panic in Los Angeles

Los Angeles, April 22.—(U. P.)—Mrs. Harry Jacoby was struck on the head and probably suffered a fracture of the skull at Panamint, where a fire escape was lowered suddenly in the excitement which the earthquake produced here Sunday.

Mrs. Mary Spears was probably fatally hurt at Loma Linda, where she was a patient in a hospital.

Shock Lasts 45 Seconds
The shock occurred at 3:31 o'clock in the afternoon and was of 45 seconds' duration.

In Los Angeles plate glass windows were broken in two or more buildings. Cornices were shaken from others and there were near-panics in several theatres.

That more did not suffer bodily harm in Hemet and San Jacinto is considered due only to the fact that it was Sunday and that the business structures were almost unoccupied.

The buildings crashed down in almost the first tremor of the quake. Caught before they could move from their posts, three telephone operators were buried in the ruins of the building when it fell. They were Anna Williams, Lockwood and Martha Bosh. They were dug out unhurt from the ruins by the home guards.

Mrs. Koehler was buried in the ruins of a second-hand store and suffered serious lacerations. The employees, Miss Grace Water and J. L. Casey, were hit by falling bricks.

Chimneys and windows were broken at Indio. In the interior. Unconfirmed reports were circulated that several old volcanoes in the San Jacinto mountains had renewed activity, but these reports are believed to have been started by the presence

of heavy dust clouds from that direction caused, it is thought probable, by numerous small avalanches which were started by the earth tremors.

Home of Ramona Demolished

The home of Ramona, near San Jacinto, made famous throughout the United States by Helen Hunt Jackson's story, was demolished, it was reported from San Jacinto.

The quake was powerful in the San Jacinto mountains. The state highway from San Jacinto to Hemet is flanked by a number of dead oaks. Many minor ones are apparent also.

Included in the principal business buildings reported ruined by the quake are the First National bank; Farmers and Merchants National bank; Odd Fellows hall, postoffice, Hemet Milling company and Hemet Hardware company.

San Bernardino reports damage to some houses. The shock was felt at Needles, on the California-Arizona line.

Imperial Valley Feels Shock

San Diego, Cal., April 22.—(U. P.)—A slight earthquake shock was felt here Sunday afternoon at 3:30 o'clock. The quake lasted about one minute and aside from breaking glass in a few windows, no damage was reported. The shocks also were felt in the Imperial valley, east of here.

Dr. Wilson Had Ranch at Hemet

According to Portlanders familiar with the section of California visited by an earthquake Sunday, Hemet is only 20 years old and is five miles from San Jacinto, which is one of the oldest towns in Southern California. The towns are located in the center of a big fruit raising section.

A former Portlander who resides in the section is Dr. J. F. Wilson, founder of the Portland academy. He also served as its principal for a good many years. Dr. Wilson owned a fruit ranch near Hemet and it was there that he made his home.

Hemet, say the Portlanders, was nearly destroyed by an earthquake 18 years ago.

San Jacinto is the scene of many episodes in the story of California, especially those of the closing chapters. Hemet was not in existence when the story was written.

Sanatorium Patients Injured

The Loma Linda sanatorium, situated on a hill near Redlands, was badly shaken and four patients injured. Mrs. Mary Stear of Chicago was perhaps fatally injured when she was thrown under a brick and mortar from a collapsed chimney. She suffered a fractured skull, a broken ankle and severe bruises.

Nurses in the sanatorium declared the entire frame structure was lifted 10 feet by the earth bulge and dropped into position again with a crash.

Railroad Shops Damaged

San Bernardino, Cal., April 22.—(U. P.)—Machinery in the Santa Fe railroad shops was damaged and 40 windows in the business and residential section of the city were broken by the earthquake. The damage in this city is estimated at \$200.

School Chimney Topples

Riverside, Cal., April 22.—(U. P.)—While this city was rocked, the principal damage was the toppling of chimneys at the Grant school building and the falling of plaster in the Universalist church and numerous residences. No one was injured.

Drugs Topple From Shelves

Beaumont, Cal., April 22.—(U. P.)—Damage here was confined to the miscellaneous loss of glassware and crockery. Four hundred dollars worth of drugs were destroyed at Robert Fulton's pharmacy, where drug receptacles were thrown to the floor.

Shock Slight in San Diego

San Diego, April 22.—(U. P.)—The earth shocks felt in some parts of Southern California Sunday afternoon were slight in San Diego and no damage was done. Throughout the country towns, especially those north-east of here, dishes and windows were rattled, but no damage has been reported today.

War Honors Given Seattle Students

Two University of Washington Students Decorated With War Crosses by the French for Bravery Under Fire.

By Lowell Mellett

Paris, April 22.—(U. P.)—On the anniversary of the enlistment of the American ambulance corps in the French army, Lieutenant Albert Smith and Private Edward Bickel, both graduates of the University of Washington, in Seattle, Wash., were decorated with the croix de guerre today.

Smith and Bickel spent nine days carrying wounded under shelling and machine gun fire, beginning March 21. For six days they neither slept nor rested.

Smith commanded 20 ambulances, all of which were wrecked, although only two were lost. These ambulances carried out the last wounded from the trenches to the dressing stations, when an evacuation was ordered.

Bickel volunteered and rescued several wounded from a trap so dangerous that the French command would not order the ambulances to attempt the feat.

Secretary Redfield On Northwest Trip

American-Canadian Fisheries Commission Conferencing on New Fishing Treaty for Protection of Salmon.

Seattle, April 22.—(U. P.)—The American-Canadian Fisheries commission which will confer on a new fishing treaty for the protection of sockeye salmon in Puget sound and British Columbia waters arrived here today. The American commission is headed by Secretary of Commerce William C. Redfield and composed of E. F. Sweet, H. M. Smith and E. M. Guilely. The Canadian commissioners are John D. Hazen, chief justice of New Brunswick; George J. DesBarats, deputy minister of the naval service of Canada; William A. Pound, superintendent of fisheries; and Arnold Robertson, first secretary of the British embassy.

Hearings will open here Wednesday, and afterwards the commissioners will go to Vancouver, Prince Rupert and Ketchikan, Alaska.

J. W. Hall Called to Washington

J. W. Hall, assistant to Lloyd J. Wentworth, head of wood shipbuilding in the Oregon district for the emergency fleet corporation, left at 10 o'clock Sunday morning for Washington to attend a conference of assistant district officers, called by the shipping board to consider certain changes in policy. It is understood that one of the things to be considered is the adoption of plans for the construction of larger wooden vessels.

Woman Falls Dead While Watching Fire

Klamath Falls, Or., April 22.—Miss Lillian Stiltz, member of the dry goods firm of Stiltz & Co., was standing among a crowd watching a building burn Sunday, when she fell dead from heart disease.

The building was burning in the same block in which her business is situated and for a time the fire threatened destruction of the entire block. Stiltz & Co. is one of the pioneer business firms of Klamath Falls. Miss Stiltz leaves two brothers, two sisters and other relatives here. She was 35 years old.

America at Heart United, Says Daniels

Providence, R. I., April 22.—(U. P.)—In an address at a Liberty loan meeting here Sunday, Secretary of the Navy Daniels said, in part:

"I feel that we all should thank God and take courage that America at heart is safe and sound and united."

"Let us thank God because we have

learned in this war that if a man would shoot straight he must live straight."

"We have learned that when we shut our eyes to evil it does not dissipate evil. We must open our eyes and tell young men the truth. Our duty to them is to take away every possible temptation and surround them with every good influence."

"To that end the Protestant churches have united in the Y. M. C. A. and the Y. W. C. A., and our Catholic citizens have organized through the Knights of Columbus and our Hebrew fellow citizens through the committee on Jewish welfare work, and we are all working together."

Come Out Into the Garden Now's the Time To Plant!

—And you will be a lot happier in your garden. Get the full benefit of the fresh air and sunshine and exercise to say nothing of actual results—if you have the proper garden apparel and tools. We have complete assortments of the right kind of wear for women—real coveralls and feminalls—that allow fullest action and comfort and can be tubbed easily. Let us show them to you.

Panta-Dress \$1.95

—Made of heavy and lighter quality percales. V-neck styles with sailor collar, short sleeves and rubber to hold it firmly at ankles. Buttoned in front, with two pockets.

Feminalls \$1.95

—Of extra quality plain colored percales—light blue, green and lavender—with V-neck, kimono sleeves, drop seat and elastic at waist and ankles. Piped with white bias binding.

New Khaki Coveralls \$3.75

—Very practical garments with long sleeves, wide belt and band that buttons around the ankles. The collar opens in a V and there are two large roomy pockets.

For the Young Gardeners

Girls 12 to 16—will enjoy these Koveralls in navy and white striped materials with red trimming. Priced \$2.25.

Children 1 to 8—can wear practically the same kind as their older sisters and brothers. Priced \$1.00.

New Garden Sun Bonnets

—One of the picturesque, practical hats that the lady in the sketch is wearing will spare your freckles. Bonnet of fancy cretonne with elastic back and poke front. Also some with ruffled back. Priced 19¢ to 59¢.

—Fourth Floor, Lipman, Wolfe & Co.

And for Men— Garden Wear

Denim Overalls \$1.85

—Heavy blue denim bib overalls and jackets—built to wear.

Khaki Pants \$2.45

—Good heavy quality khaki pants with belt loops, cuff bottom and five pockets. Very special, \$2.45.

Men's Work Shirts 89c

—Blue and tan chevrot and light and dark blue chambray, made with attached collars. Very special, 89c.

—Main Floor, Lipman, Wolfe & Co.

While You Are Out In the Garden

Let the MAYTAG

Do Your Washing

—Save yourself the drudgery of the weekly washing. The Maytag operates electrically. We will be glad to demonstrate how simple and satisfactory the "Maytag" is.

Payable \$5 Down—\$1 a Week

—Basement, Lipman, Wolfe & Co.

Two Interesting Demonstrations

Hot Point Electric Demonstration by Mrs. Walters

—Come in and see how cool your kitchen will be this summer if you have the proper Hotpoint Appliances. Interesting demonstration tomorrow.

—Electric Corner, Main Floor Lipman, Wolfe & Co.

O. M. O. Dress Shields Demonstration By Mrs. Parker

—expert from the O. M. O. factory. Every shield is guaranteed. Come and see why.

—Main Floor, Lipman, Wolfe & Co.

Model Dress Forms Will simplify your Summer sewing. \$1 Down—50c a Week

—Second Floor.

In Times of War— Build Up Your Body

If your blood's a slacker, your body can't measure up to the needs of a war-stricken world. Nature and Gude's Pepto-Mangan are powerful allies in routing the physical disorders that spring from poor blood.

In times of peace the need for able-bodied men and women is great enough. In times of war it is trebly great. Yet for every man fit to fight and every woman fit to do war work, there is a man or woman incapacitated by physical weakness.

The average weak person has no serious organic trouble. He is run-down, anemic, and under weight because his blood is below par. The depleted red blood cells are unable to perform

their vital function of carrying and distributing life-giving oxygen to all parts of the body.

If you are numbered among such men and women, cast off the shackles of ill health and weakness. Step forth physically regenerated into a world that needs strong, enduring men and women as never before. Combine abundant fresh air, sleep, exercise, and sensible diet with Gude's Pepto-Mangan, "The Red Blood Builder."

Gude's Pepto-Mangan

"The Red Blood Builder"

You need Gude's Pepto-Mangan for the quick upbuilding of your blood and the reconstruction of your whole system.

Gude's Pepto-Mangan is more than a temporary tonic. It is a true blood builder. It fills the red blood cells with new vigor. It increases their number. It helps to make you the red-blooded man or woman Nature meant you to be.

Physicians everywhere endorse and prescribe Gude's Pepto-Mangan, because they recognize its unequalled blood-building value, its worth as a general tonic and appetizer, its agreeable taste, its ease of digestibility. They have used it for twenty-five years.

FRIENDLY WARNING: There are many imitations of Pepto-Mangan on the market, but you can be sure of getting the genuine if it bears the name "Gude" and is put up in the bottle and sealed package as pictured here. Ask for it by its full name—"Gude's Pepto-Mangan." For sale at all drug stores.

Pepto-Mangan is made only by
M. J. BREITENBACH CO., Manufacturing Chemists, New York

Study this picture so you will know how genuine Pepto-Mangan looks.
