Other Markets Are Seemingly Filled for the Moment-F. O. B. Bids Are Reduced - Accumulations

Shown Along Street.

Sick tone centinues to be shown in the local sign trade with very liberal receipts. During the last 24 hours there was practically no outside demand for supplies and heavy accumulations were shown along the wholesale way.

Most of the f. o. b. buyers still have their previous bids of 35 % c a dozen in effect, but most of them will be out tomorrow. On the basis of outside markets at this time bids would not be above 34 @ 34 % c, in fact this is all flat is being offered by those who did not place f. o. b. bids carrier in the week. Several former bidders for eggs at the higher price have cancelled their bids and are temporarily out of the market.

Only small scattering lots are shown at dountry points, according to John Sheridan of the Sheridan-Beckley company, local jobbers, and for these still higher prices are being asked for this variety along the street are around \$2.25 @ 2.50 for extra fancy stock in ordinary sizes, while as high as \$3.25 is being asked for the larger fruit of similar quality.

Practically no shipments are being made to the east at this time, due both to the lateness of the season as well as the fact that carload lots are practically mpossible to obtain even at the leading shipping points.

A few Spitzenbergs of excellent quality, which had been held by the government, are still of-tering on the street.

It appears that the "run" of eggs into storage houses generally along the coast has been amewhat greater than the capacity of the trade to take care of offerings. This in itself would cause a weaker tone with a consequent lowering of values. Until storage operators reenter the

BUTTER MARKET HAS FIRM TONE Market for butter continues to indicate a firm tone here, with no change in prices. Output of local creameries is slowly increasing, and the ar-rivals of country store or dairy stuff are greater. BRIEF-NOTES OF PRODUCE TRADE

Potato market is showing a somewhat better tene locally with recent advances of 10c to 25c per cental in the selling price. Sales of ordinary stock are generally shown by wholesalers around \$1 \oplus 1.25 is queted.

Dryers continue to take the bulk of the present movement from country points and purchases are around 70 \oplus 75c per cental. General purchases of table stock for outside shipment are shown at 75c per cental with a sprinkling of trade as high as 85c per cental at country points for something of selected quality.

There is apparently an improved consumptive demand generally throughout the country for old potatoes, but prices are low everywhere. New stock from Cahfornia and Texas has been quoted at declining prices, although values for such offerings are still so far beyond a general consumptive basis that little effect is shown on the market for old growth.
