LIKE THE STORY the screen adaptation of Tarzan is unusual; New York eagerly stood in line for weeks during the sensational showing of this super-play, homage that is accorded few pictures! Massive, spectacular, seem weak in describing this feature play—in story, in unstinted and lavish staging, in terrific and death-defying deeds even to hand-to-hand encounters with beasts of the jungles (a whole menagerie of them roam through the play); Tarzan simply sweeps you off your feet—its entire eight reels, fade-in to fade-out, are wonderful.
