

FOUR-YEAR TERM FOR HENRY JONES IS SENTENCE GIVEN

Field Organizer of Marine Transport Workers Pleads Guilty to Writing Letter as Charged.

WORDING SEDITIOUS, CHARGE

Official Finds One of Documents; Operations Carried on Between Astoria and San Francisco.

Henry Jones, field organizer of the marine transport workers of the I. W. W., operating on boats between Astoria and San Francisco, with authority to collect dues and initiate new members, was sentenced to four years at McNeill's Island by Federal Judge Wolverton Wednesday afternoon. Jones pleaded guilty to the charge of writing certain letters declared by federal officers to be seditious and tending to interfere with the operation of the draft law.

One letter addressed to "fellow worker," A. Kolustow, a fireman on the Union Oil company's boat Westenhaw, of Astoria, fell by mistake into the hands of Frank Craig, agent of the Union Oil company at Astoria, and was turned over to Deputy United States Marshal Frank F. Berry. Jones claimed he was not the author of the letter, but took the contents from an article by Emma Goldman in "Mother Earth."

Henry Jones was arrested in Astoria on April 18 for bringing two cases of whiskey from San Francisco to Astoria on the steamer Atlas. His seditious activities came as a subsequent revelation. He was indicted June 14.

The prosecution did not press the liquor charge in Wednesday's trial. Jones carried a membership card signed by William D. Haywood, general secretary and treasurer of the I. W. W., which was dated to expire December 31, 1918. Jones said he was a Britisher and came to America because he liked

the government and wanted to support the constitution.

Jones took out his first citizenship papers March 25, 1916. He is 35 years of age, unmarried, and came to America from Newcastle, Australia.

Sheriffs of Oregon Meet in City Friday

Numerous questions involving the enforcement of state and federal laws during the prosecution of the war will be thoroughly discussed at a special meeting Friday of the state association of sheriffs, which will be held at the courthouse. Federal, state and city officials have been invited to meet with the sheriffs. Talks will be given by United States Attorney Bert E. Haney, United States Marshal Alexander and others.

At 12:30 o'clock the sheriffs will be guests of Sheriff Hurlburt, president of the association, at a luncheon to be given in the corridor of the county jail. A menu befitting the surroundings has been arranged by the jail chef, and an unique meeting has been arranged.

The sheriffs of Oregon will go to Vancouver Saturday where they will meet with the sheriffs of the state of Washington at a joint session.

Fairbanks Leaves \$2,000,000 Estate

Indianapolis, Ind., June 20.—(U. P.)—The will of Charles Warren Fairbanks, disposing of his estate of \$2,000,000, was filed for probate Wednesday. The bulk of the estate is left to his three sons, who are named executors. Bequests include:

Ohio Wesleyan university at Delaware, \$25,000; De Pau university, Greencastle, Ind., \$25,000; city of Indianapolis, for charitable purposes, \$50,000, in memory of his wife; Methodist hospital \$50,000. Servants are remembered with bequests from \$50,000 down.

Wm. H. Pemberton Sentenced for Life

Camp Lewis, June 20.—(U. P.)—Confirmation of the life sentence given William H. Pemberton, Seattle baker, by court martial trial here some weeks ago, was received today from Washington, D. C. Disloyalty and desertion were the charges against Pemberton. He is claimed to have said: "I would rather wear a convict's uniform than that of the United States."

THRESHER CHARGES TO BE REGULATED

Hoover Plans That Local Committees Shall Throttle Any Profiteering.

Washington, June 20.—(U. P.)—Efforts to save farmers millions of dollars' excess threshing charges are under way by the food administration. It was learned today.

With harvest beginning in the great wheat belt, reports of profiteering by threshing machine owners are reaching the food administration. Some farmers are being held up for a threshing fee of 50 cents a bushel on wheat. Increased machinery costs and labor shortages given as reasons. Farmers, held down by the fixed \$2.20 wheat prices, are unable to pass this charge along and must bear it themselves. An average increase of 1 cent a bushel threshing fee would cost American farmers about \$10,000,000.

Hoover is organizing threshing committees in every wheat-growing county, which are to determine a just threshing fee. Profiteering will be guarded against. Increased fees are to be expected, however, because of the general rising scale of prices. Threshing rates have remained practically the same as in 1917, when wheat was \$1. Wheat prices have doubled since then, and the threshing charges must be permitted to keep pace with the advance, officials believe.

No uniform schedule of fees can be drawn up because of varying local conditions. Fee schedules have already been drawn up in many sections in Texas, Oklahoma, Kansas, Missouri and Iowa. As the season advances, Minnesota, Illinois, Montana and the Dakotas will be reached. Oklahoma prices range from 10 to 15 cents a bushel in some districts. Missouri's scales are from 6 to 10 cents. One Illinois district has fixed its price as low as 8 cents a bushel.

Threshing machine owners are being licensed and will be under the supervision of the threshing division of the food administration, newly created to handle the problems of harvesting. In each county in the wheat belt the county food administrator has been asked to organize a threshing committee to determine all questions of fees and harvesting on the basis of local conditions.

Yeon and Holland Aiding Spruce Work

Appointment of Supervisors Announced by Col. Disque; Both Men Are Experienced in Production of Lumber.

John B. Yeon and Howard P. Holland have been appointed supervisors in the spruce production division of the signal corps of the United States army, according to announcement made today at the Portland office of the signal corps. Both men volunteered their services to Colonel Brice P. Disque, to whom the government has assigned the task of producing spruce for the war.

Both men are experienced in lumber production. Mr. Holland is president of the mill at Bridal Veil, Or. Mr. Yeon also is well versed in the logging end of timber production.

Mr. Holland leaves Friday morning for Yeon, where he will take charge of operations in that district. While the appointment of Mr. Yeon has just been announced, he has been engaged in the work for some time, having taken charge of the spruce production along the Northern Oregon coast.

INDUSTRIAL PLANTS HAVE ORGANIZED FOR WAR SAVINGS DRIVE

Captains Have Been Designated in Different Plants; More Counties Will Go Over the Top.

Industrial plants representing 38,000 people have already been organized for the War Savings Stamp drive of June 28. Captains have been designated in these plants and the captains are selecting teams of solicitors to take up the matter of the pledge with the other employees. Organization of the industrial end of the drive is far advanced and is already in better shape than in any previous drive.

While industrial plants are working smoothly, there has not been the cooperation from the banks that was expected. General Lynch of the federal reserve bank at San Francisco has notified Assistant State Director Wootton that only 87 out of 261 banks in Oregon have responded to an inquiry as to how many circulars concerning the stamps they could use. Thomas H. West, state distributor, is getting in touch with the 174 banks who failed to respond.

Anticipating a strong demand for stamps next week, all postmasters in the state have been advised to stock up to the limit. The stamps are supplied to the outside offices from the Portland postoffice.

Instructions are being forwarded today to all county committees urging them to limit club pledges as far as possible. In the country the names of the limit club members will be published in the newspapers and the list will be added to as new members join. Speaking of limit club members, a Portlander quit his work in a shipyard yesterday afternoon to visit the stamp headquarters to buy \$1000 in stamps for each of the five members of his family.

More counties are coming under the drive. A. G. Clark, field commissioner, writes that Union and Baker will pledge their quotas and Linn and Union are also confident. There is a friendly competition between Linn and Union as to which one will make the best showing on the per capita basis. Linn's quota is \$512,000, and Union's \$325,000. The former has already bought \$154,700 of stamps and Union has a credit of \$31,280. A wide difference in these amounts, on the per capita basis they are very close. The last report on stamp sales for the state showed that \$3,728,825.55 had been bought since the stamps were first placed on the market. This leaves approximately \$14,000,000 to be pledged on June 28, the day of the drive.

George W. Caldwell of the speakers' bureau, for Portland, states that lectures or other meetings this week or next will be provided with someone to talk on War Savings Stamps if the bureau is notified at the Liberty Temple. Mr. Caldwell has arranged for a music singing Saturday night in front of the temple, when speakers will discuss the stamps and the Elks band will give a concert.

Navy Hospital Men Are With Marines

Detachments From Navy Corps Sent on Land With "Sea Soldiers"; Many Opportunities Presented for Recruits.

In the recent drives by the United States Marines "over the top" many hospital corps men were listed in the daily casualties. These men were detailed to the Marine corps by the navy department because the Marine corps is a branch of the navy. Uncle Sam is calling for hospital corps men for the navy. Men who are willing to go "over the top" either in the trenches or fight on the high seas.

Men with a high school education or with a drug clerk or pharmacist's experience are preferred, though because of the great demand the navy is enlisting men without experience. The men are either sent to the Puget Sound navy yard at Bremerton or to the naval training camp at Seattle where they receive a preliminary training. Lectures by navy medical officers are given daily to the men. The lectures consist of anatomy, physiology, first aid and minor surgery, nursing, hygiene, sanitation, stretcher drills and practical laboratory work. Hundreds of men are needed for this work and are being enlisted by the United States naval reserve's recruitment station at 352 Alder street, for a period of one week only.

Hollanders to Meet To Plan for Parade

All Hollanders in this vicinity are requested to attend a meeting at the green room of the Commercial club Friday evening at 7:30 o'clock. The purpose of the meeting is to arrange for participation in the Fourth of July parade. Anthony H. Metzel, vice consul for The Netherlands, who has issued the call, asks that the women be brought to the gathering. This year the Fourth of July parade will be in charge of the foreign born groups, at the suggestion of President Wilson, and as there is no society of Holland people in Portland, the only way of taking up the matter is by holding a meeting.

BIG MILK WAR HAS BROKEN OUT HERE

Portland-Damascus Co. Refuses to Meet Dairymen League's New Price.

The Portland milk war broke today with the announcement that the Portland-Damascus Milk company, the largest distributing agency in the city, had cut off shipments of milk aggregating 20,000 pounds daily from producers who are members of the Oregon Dairymen's league.

Alma D. Katz, president of the league, at once announced that he would appeal to W. B. Ayer, food administrator for Oregon, charging that the course of the Portland-Damascus company will result in the loss of valuable food.

"Some of our shippers," said Mr. Katz, "had already made their usual shipments to the Portland-Damascus company when they got the notice that it would not be received after Thursday, June 20," said Mr. Katz.

"That was the date on which we had announced that the new price for milk of \$3.50 a hundred pounds would become effective, but since our original announcement we had decided, in order to give the distributors more time to prepare for the change, to postpone the effective date of the increase until July 1. In the meantime calling upon the city milk commission to make a recommendation that would meet the situation satisfactorily, both to the producers and distributors. The dairymen are now producing milk at a loss and the only way to prevent slaughtering of the herds and an acute milk shortage is to arrange to pay them at least the cost of production."

The Portland-Damascus company was well informed that the postponement had been ordered, but it proceeded in a summary way in spite of the action.

Letters issued to members of the dairymen's league by the Portland-Damascus company notified them that the distributor would not meet the increase in the price and to discontinue shipments effective Thursday. In the meantime, A. M. Work, manager of the company, says a supplementary supply has been secured from non-league members beyond the usual zone of production. W. K. Newell, acting food administrator for Oregon in the absence of Mr. Ayer, announced this morning that in response to Mr. Katz' representations he had asked the city milk commission to join him in conference this afternoon to see what steps can be taken.

Man Power in War Work Is Conserved

Eastern Industries Look to Welfare of Employees, Says L. G. Nichols, Y. M. C. A. Worker, on Return From East.

"Manpower is the most jealously conserved factor in all the eastern war industrial plants," said L. G. Nichols, industrial and educational secretary of the Portland Y. M. C. A., who has just returned from a transcontinental study tour of war industry, which included attendance at the conference of employed officers of the Y. M. C. A. at Springfield, Mass.

"At the Hog Island shipyards, greatest of their kind, and employing 150,000 men, at the munitions factories, the machinery plants and other enterprises of the war industry, I found that the first concern was to assure the welfare of the men and their contentment of mind by the providing of recreational facilities and other means of strengthening the morale of men in industry."

"While these eastern plants have developed their plans and work considerably in advance of Portland, with our plant recreational organization at the shipyards we are proceeding in the same direction."

Mr. Nichols said that Y. M. C. A. educators in conference at Springfield planned a standardization of study courses in associations throughout the country so that work and credits will be uniform.

DROUTH RECORDS FOR JUNE BROKEN

But .12 of an Inch of Rain Has Fallen in Month to Date; Rain Expected Soon.

All Oregon drouth records for the period from April 1 to June 20 since the establishment of the Portland office of the United States weather bureau have been eclipsed in the dry period that has extended up to and including today, according to compilations and references made this morning.

Since April 1 to date Portland observers have recorded only 2.63 inches of rain, and of that total only 0.12 inch has fallen since June 1. Never before in the history of Portland weather observations has this record been approached, with the exception of 1890, when, during April and May, precipitation totaled only 2.49 inches. However, the first few days of June, 1890, saw some heavy showers and, by June 20, 1.57 inches of rain had fallen, as compared with the 0.12 inch to date in the present month. Of the 0.12 inch recorded thus far this June 0.8 inch fell within a brief period of one day.

BARBER GIVES RECIPE FOR GRAY HAIR

Tells How to Make a Home-Made Gray Hair Remedy.

Mr. A. E. O'Brien, who has been a barber in New York City for many years, made the following statement: "Gray, streaked or faded hair can be immediately made black, brown or light brown, whichever shade you desire, by the use of the following remedy that you can make at home."

"Merely get a small box of Oriz powder at any drug store. It costs only 25 cents, and no extras to buy. Dissolve it in one ounce of water and comb it through the hair. Full directions for use come in each box."

"You need not hesitate to use Oriz, as a \$100 gold bond comes in each box guaranteeing the user that Oriz powder does not contain silver, lead, zinc, sulphur, mercury, aniline, coal-tar products or their derivatives."

"It does not rub off, is not sticky or gummy and leaves the hair fluffy. It will make a gray haired person look 20 years younger.—Adv."

Correct Lubrication for the "V"-Type Engine
This is the "V" Type of automobile engine—high speed, finely adjusted—one of the several modern types. Engines of this type, like all integral combustion engines, require an oil that maintains its full lubricating qualities at cylinder heat, burns clean in the combustion chambers and goes out with exhaust. ZEROLENE fills these requirements perfectly, because it is correctly refined from selected California asphalt-base crude.

ZEROLENE is made in several consistencies to meet with scientific exactness the lubrication needs of all types of automobile engines. Get our "Correct Lubrication Chart" covering your car. At dealers everywhere and Standard Oil Service Stations.

The Choice of Those Who Know
Manufacturers and leading motor car distributors recommend ZEROLENE.
The majority of motorists use ZEROLENE.
ZEROLENE reduces wear and gives more power because it keeps its lubricating body at cylinder heat. Gives less carbon because, being refined from selected California asphalt-base crude, it burns clean and goes out with exhaust.
ZEROLENE is the correct oil for all types of automobile engines. It is the correct oil for your automobile. Get our lubrication chart showing the correct consistency for your car.

At dealers everywhere and Standard Oil Service Stations.
