# STUDENT SOLDIERS PUT IN HARD LIFE ON U. OF O. CAMPUS

Wonders Being Accomplished in Short Time Under Colonel Leader and Colonel Bowen.

#### CAMP PLANNED FOR AUGUST

Intensive Training Work Said to Fit Men for Commissions, Although None Are Promised.

Eugene, Or., July 6.-Eleven o'clock p. m. One hundred and fifty tired, sleepy student soldiers dropping into slumbers with the sound of taps. Six-thirty o'clock the next morning The same 150, lately awakened by reveille, full of pep and energy, washing up, shaving, chatting incessantly, just spoiling for the day's work

Such is the end and such the beginning of these "perfect days" of militory instruction in the summer training camp conducted on the campus at Eugene by the University of Oregon. Between these two hours is one long succession of work and study, with an occasional interval for food and for play

The actual workday starts with what is for many the most difficult period of all-the half hour of Swedish gymnasties or setting-up exercises, from 7 to 7:20, which for the first few days used to stretch several of the softer-muscled men out on the field "hors de combat." Swedish Drill Hard

It is still hard work, given under the direction of Professor O. C. Mauthe, physical director at the Multnomah Amateur Athletic club at Portland, who is in charge of the gymnastic work in the university's summer session, of which the camp is a part. But the men are getting used to it now, and if this work is ever discontinued, some of the fellows say, it will be at the request of the management of Friendly hall, where the men board, for it gives each of the men "the hunger of four wolves"

In less than two weeks of work together, the men, divided into four companies, have developed a precision and spirit which is the admiration of Lieutenant Colonel John Leader of the British army, who is professor of military blence in charge of the camp. colonel credits them with accomplishing more already than is usually accomplished by recruits in six months.

Trenches Are Dug Already the men have mastered, apparently, the rudiments of close-order drill, and are being schooled in openorder movements and tactics. Skirmish drill is a daily part of the routine, with an occasional battle problem substituted

Camouflage classes are held, in which for delivery at the plant of the Chelthe men are instructed in the art of sea Box & Lumber company, on the Topography, mapmaking and mapreading are another part of the course French conversation also is given for the benefit of those who expect to go "over It is Colonel Leader's idea that almost all of the men in the camp will W. be fitted to hold commissions as the Strahorn, who has the contract with the result of their intensive work here. The mp, however, has no official authority to grant commission, and those enrolled do not obligate themselves to military service by taking the training.

Daily Lectures Given The regular daily military lecture by colonel Leader, Colonel W. H. C. Bowen, U. S. A., retired, detailed here by the war department for the R. O. T. C., or some staff officer of the camp, is the first thing in the afternoon. This lecture gives in theory a great deal of Arthur R. Wilson of this city. The quota what the fellows do in actual practice luring the rest of the day.

turn of the work given in the camp. Recognizing the part played by mathematics in the war, particularly in artillery work, the camp management has made this an available though not compulsory part of the curriculum. Signaling by semaphore and other paign:

annual outing of the organization, to be held this year in the vicinty of Wallowa lake, according to the outing committee chairman, Robert E. Hitch, who has been taking many registrations from members within the past few days. The outing arty will leave Portland on the evening of July 13 and will establish a camp at the fork of the Wallowa river, a mile and a half above the upper end of the lake and 5000 feet above sea level. On the two week's trip Mazamas will not only make a thorough inspection of the interesting lake and its surroundings, but will scale several of the more important mountain peaks in Wallows Mountain Region Different

cades in Oregon.

Wallowa lake, a number of true mouncampers. The north or lower end of the lake is only two or three miles from branch railroad.

By a branch road, which has been put in repair by the United States forest service, the trip into camp can be made entirely by auto. The Joseph Commercial club has courteously offered to transport all of those in attendance to and from camp, which will be a great convenience and will make the outing attractive to many who may not have the vigor to justify hard tramps. It may be stated that this year, as heretofore, the Mazamas will welcome all persons who desire to take the outing.

Registration Is Underway The principal attractions on the expedition will be the climbing of one of the dition will be the climbing of one of the county who had won a Liberty loan wheat production, are today growing peaks, visiting the lakes, falls and can- flag during the last Liberty loan cam- wheat production, are today growing yons, and also in fishing and possibly

In the past most merchants have or inducive of keeping up the reputabeen making two deliveries a day.

# **UMATILLA COUNTY** CROP PROSPECTS EXCELLENT, VIEW

Present Outlook Called Deceptive if District Does Not Produce Equal to That of 1917.

BARLEY STAND NOT SO GOOD

Oats Planting Less Than Normal, but Condition Fair; Shortage of Labor Is Not Evident.

By Hyman H. Cohen

Pendleton, July 6.-If old Umatilla county does not produce within a fraction or even just as much wheat as it did a year ago, the present outlook for the crop is deceptive.

This statement is made in spite of the fact that several well known residents of the county have recently asserted that the output would be con-siderably curtailed. The statement of these interests was possibly true of conditions that existed several weeks ago, and the chances are that they have not seen the crep since then. Personally, I have concluded, after a thorough visit to practically all sec-

tions of the county, that Umatilla will have a good average crop of wheat. The district from Pendleton to the Walla Walla county line is the same old field of wheat. Here and there it may be possible that a half dozen of so kernels less will be gathered than in some years but that is about the extent of the injury that may have been inflicted by weather conditions.

Smut Appears to Be Less In regard to the talk of disastrous crops of 'Umatilla county that one hears year after year, notwithstanding the Pacific Northwest always has a good drop, I would go on record as asserting that, when Umatilla county has practically no wheat production, the rest of the country will be famished. In saying this I do not mean for a single moment that Umatilla county supplies the entire country with wheat, but such a thing as a failure or even a small crop production has not been known for so many years that even the Indians have no traditions regarding it.

Up through the Adams, Havana, Part in Ceremonies Milton. Weston and Athena sections there will be a wheat crop this season that will be simply a repetition of White Salmon, Wash., July 6 .- Many what has happened practically every White Salmon residents motored to season, except, perhaps, that the grain smut than for several years past.

Reservation Crops of Best he said that in some fiel grain does not appear to be as thick as normal

Up through the Westen country, up in the mountains where they usually raise much barley of first class quality, the crop outlook is by no means favorable. The area sown to barley this season was somewhat increased over what was sown last season, but this section will scarcely have more than half the barley, it gathered in recent seasons. While there are excelient fields of barley growing, with the harvest time only a few days distant. most of the barley crop was planted
