

O. A. C. STUDENTS CAN FOLLOW WORK AND ARMY SERVICE

Military Training Unit at Corvallis Will Permit Men to Continue Academic Course.

PLAN HAS BEEN APPROVED

College Is Represented at the Presidio Training Camp, Now On, for Assistant Instructors.

Corvallis, Or., July 20. — A military training unit under officers and non-commissioned officers of the army will be created at the Oregon Agricultural college next fall, enrolling in which will constitute the student a member of the United States army. Provision for this unit is a recent war measure.

Enrollment of students will be voluntary, but all young men are urged to join. They will be liable to active duty at the president's call, but it will be the policy of the government to call no enlisted student who is younger than 21 years. Provision will be made for coordinating the work with the reserve officers' training corps system.

Government Sending Men The government is sending enlisted men by the hundreds to Oregon Agricultural college because the demand in the army for men with technical training is far greater than even the normal output of technical colleges like Oregon Agricultural college, and none of these colleges is able to supply anything like its normal output.

The organization of the new army unit next fall will make it possible for young men to return to or start college with the feeling that they are doing the bidding of Uncle Sam and are by no means slackers.

In Military Department supplemented by the department of physical education, has done a remarkable service to the government in fitting over 500 men as officers of the army and providing training for nearly a thousand men who are in the services giving an excellent account of their instruction. In addition, 171 men, who had had at least one year of training at the college, went to special training camps in the Presidio this summer, for intensive discipline as officers for the new training unit that has been established at the college. These men, with the 100 men from the O. A. C. faculty, will take an additional 60 days' training in preparation for their new duties at O. A. C. next year.

The college will thus be supplied as never before with an adequate group of trained military instructors. Captain Maginnis will be assisted in the work of training O. A. C. military units, including the R. O. T. C., by 10 to 12 regular army men who will be stationed here with the department of physical education, by the 44 advanced students and faculty men now taking special training, and by any who may be needed of the 171 cadets who took the summer training at the Presidio.

Instruction Broad of Scope The curriculum of the Oregon Agricultural college is closely articulated with nearly all types of essential war work. This is more conspicuously true today than it was a year ago. But it has always been so. The college was founded under an act of congress that was passed in the mid of the Civil war. Like all the land-grant colleges, it was designed to train the nation in war as well as in peace. To that end military training, under an officer of the United States army, was made obligatory upon all men students. To that end also the mechanical and engineering studies were made prominent.

Many of the colleges, adopting the language of the original act, came to be known as "Agricultural and Mechanical colleges." Mining, forestry, pharmacy, commerce, household science, sanitation, industrial chemistry, physical training, and vocational education all came in to supplement the more fundamental training in agriculture and engineering. As a result, the land-grant colleges in America represent today the most efficient type of training that the world has yet evolved for mobilizing the resources of the country in a great national crisis like the present.

The training indicated above is essentially that of the standard curriculum of the college. It was completed from the beginning in the plans of the land-grant colleges. Special work evolved as a consequence of the new war conditions is exemplified by the intensive training given to enlisted men in blacksmithing, carpentry, machine shop, forging, auto-repair work and radio and buzzer training. It is exemplified also in the courses offered by the various technical departments of the college, in cooperation with the military department. Some of these courses, typical of all, are the following: military engineering, camp sanitation, camp cookery, foods in the war, military business practice, conservation of clothing, remodeling of military topography, signaling and wireless, veterinary training for artillery men, cavalry men and members of the veterinary corps, military mining and the Oregon Agricultural college, in California, and Idaho each sent nine students, Washington seven, Iowa, Indiana and North Dakota one each.

Benton county with 112, is far ahead of the other Oregon counties in number of registrations. Washington, Multnomah and Marion counties each next, Multnomah with 20 and Marion with 15.

New Library at O. A. C. Corvallis, Or., July 20.—The new library at the Oregon Agricultural college, the latest addition to the group of campus buildings, is expected to fill a long felt want. It is now nearing completion.

St. Mary's Academy and College For Girls, 60th year. Conducted by the SISTERS OF THE ORDER OF JESUS AND MARY. Grade, Academic and Collegiate Courses. Art, Music, Commercial and Domestic Science. Day, Board and Day Students. Refined Moral and Intellectual Training. Write for catalogue. School opens September 3. Address: SUPERVISOR, St. Mary's Academy, Portland.

Normal School Prepared For Wartime Conditions

Demand for Trained Teachers Exceeds the Supply; Enrollment for Fall Term Promises to Approximate That of Year Ago.

Monmouth, Or., July 20. — Taking everything into consideration and judging from the number enrolled in the 1918 summer school, the outlook for the Oregon Normal school for the years 1918-19 seems most encouraging. While the number of assistants in the various departments has been reduced, no course that has been heretofore offered has been eliminated, hence all courses mentioned in the latest catalog will be offered. The secretary reports that the correspondence indicates that when the fall term opens on September 16, the probability the enrollment will be about the same as in September, 1917, as many prospective teachers are beginning to realize the fact that when the war closes the opportunities for trained and experienced teachers at good salaries will be greater than they have ever been, and they are beginning to lose no time in securing such training and experience and that the time is now.

Even with conditions as they are the normal has many more applications for trained and experienced teachers than it has been able to fill and this comes from the greater demand on the part of the school officers for such teachers. There is also a growing feeling that the Oregon Normal school is doing its part in preparing teachers to meet this demand. This addition to the training facilities made possible by the privation of the elementary schools of Independence and the three rural centers at Elkton, Mountain View and Oak Point for training school purposes has placed the normal among the best equipped normals of the Pacific coast in training school facilities.

War Work Perused The war activities of the Oregon Normal school and the several training schools will be carried on during the coming year in the same vigorous manner as they were during the past year. This will be done by means of assembly addresses, bulletin board, reading table in library, courses of lectures on food conservation and substitutes, courses in sewing, cooking, physical education, education courses, study clubs and faculty addresses away from the school.

The normal and training schools subscribed more than \$20,000 last year in Liberty bonds, Red Cross drive, Y. M. C. A. drive, Armenian relief, Red Cross fund, War Savings Stamps, French stamps, paper drive and book fund.

While the normal is sorry to lose many of its members who have proved their worth, yet it feels that it has secured strong people to succeed them, and the normal announces a faculty each of which has been especially trained for his or her particular work.

Normal School Faculty The complete faculty for 1918-19 is as follows: J. H. Ackerman, president; J. E. V. Butler, department of history and civics; Thomas H. Gentle, department of training; Rosa B. Parrott, department of English; Mabel G. West, department of libraries; Jessica S. Todd, dean of women; L. P. Gilmour, department of science; Laura J. Taylor, department of physical education; Archie L. Ide, department of education; May Lewis, assistant to the dean of women; Margaret Anderson, department of art; Lucile Chase, department of domestic science and domestic art; Mrs. Margaret Curran, department of rural schools; Gladys M. Boise, assistant in English; Ida H. Holmes, department of mathematics; Marie M. Schuetz, department of music.

Training School Departments Thomas H. Gentle, principal. Monmouth Alice A. McIntosh, grades seven and eight; Mamma Radabaugh, grades five and six; Mae Smith, grades one and two; Essie Dunham, grades three and four.

Independence Katherine Arbushnot, grades seven and eight; Kate Houz, grades five and six; Emily Devore, grades one and two; Mary Williams, grades three and four.

Rural Mrs. Margaret Curran, principal. Mountain View Center Mrs. Inez Miller, supervisor all grades. Elkton Center Gladys Carson, supervisor all grades. Oak Point Center Mrs. J. H. Collins, supervisor all grades. Alle F. Bramberg, clerk and registrar.

placed by more intensive study classes meeting not less than once a week. The average number of auditors for the extension classes for the term ending in May was 2000. More than 500 courses were completed for credit. Provision will be made for a greater number of students for the term beginning in October. The subjects in which courses will be given will include English and literature, philosophy, music, architecture, education, history and several other courses in commerce and trade will be given, but have not yet been definitely arranged. These will be under the direction of D. Walter Morton, dean of the University school of commerce.

Clear Expression Is School's Objective The Gillespie school of expression is conducted by Mrs. Emma W. Gillespie, which trains its students for public speaking and readings for the new year by offering work of special appeal to those who would meet the wartime demands for clear thinking and careful expressions.

U. of O. Extension Will Be Broadened Present plans for University of Oregon extension classes in Portland indicate a rather wide range of activities for the coming school year. While definite courses have not, as yet, been worked out except in first places, the policy of the extension division will be to offer a wide variety of courses, to meet the varying needs of Portland students.

The Portland extension center will have a resident director for the coming year in the person of Dr. George Rebec, professor of philosophy. This will make possible much greater coordination and regulation of the work than has heretofore been the case. According to Dr. Rebec's plans, it is not the purpose to make the Portland extension center take the place of residence at the university for any to whom such residence is possible, but it is the intention to make the courses given in Portland approximate, as nearly as possible, the standard of work given on the campus. The courses will, in general, be stiffened, and the old, relatively popular lecture course, meeting fortnightly, will be entirely dis-

U. OF O. DIRECTS ITS COURSES TO CURRENT NEEDS

Curriculum Is Broadened to Meet Wartime Demands and New Courses Are Planned.

MILITARY SCIENCE TAUGHT

Student Body Will Have Advantage of Training Taken by Instructors This Summer.

University of Oregon, Eugene, July 18. —Bending its every energy to the work of helping win the war, the University of Oregon will intensify its war training activities with the opening of the 1918-19 year.

General military work at the University will be in charge, as heretofore, of Lieutenant Colonel John Leader, late commander of the Royal Irish Rifles in the Battle of the Somme, while the R. O. T. C. will be under the direction of Colonel W. H. C. Bowen, U. S. A., retired, sent here by the war department to occupy the position of professor of military science in the university faculty.

These two men are in charge of the first summer civilian training camp on the university campus.

Cadet Corps to Be Feature Training in the R. O. T. C. will be available to all men of the university who are mentally and physically fitted for the work. This corps will fit the men for commissions in the national army. Coordinated with this will be the war department's latest idea for the training of cadets for most efficient service in the war. This is the cadet corps, to be established in the universities and colleges of the country. Enrollment in this corps will be purely voluntary, but all students above 18 will be encouraged to enlist. The officers of this corps will be members of the R. O. T. C. The men enlisted will be members of the army of the United States, liable to active service on the call of the president, according to the announcement of Secretary Baker, but it will be the policy of the government not to call them into active service until they have reached 21, save in cases of urgent military necessity. Students under 18 will be encouraged, not to enlist, but to enroll in the training unit.

Instruction along military lines will, in the administration of this corps, be more efficient next year than ever, owing to the provision for the instruction at the Presidio this summer of university students and faculty men who will return to college in the fall and assist in the training of the undergraduate men.

Aside from the straight military training, the courses in mathematics and other sciences have been fitted more and more to military purposes. More math is given at the University of Oregon than at West Point. Chemistry, as taught here, leads directly to the medical courses. Mechanics and military engineering have a prominent place on the curriculum.

For the women, the home economics courses given in cooperation with the national food administration have been augmented to include not only work in food and nutrition, food conservation, food preparation, but also textile study, food preparation for social workers, housewifery, household management, marketing, home nursing and care of children. In this course, Dr. E. W. DeBusk, professor of education, will cooperate with Miss Lillian Tingle, head of the household arts department, in giving the instruction.

Two new instructors, Miss Antonette Shumway of Seattle, who will teach sewing and textile work, and Miss Helen Rhodes of Portland, who, in addition to work in the art department, will give courses in dress design and household decoration, have been provided for next year. In all these courses war-time demands will have first consideration.

In the women's hygiene and physical education department efforts will be made to prepare the girls for the work of fitting disabled soldiers to resume productive occupations.

In athletics, the idea of physical training for all will have a larger place than ever in the college scheme of things. This is for the purpose of developing the maximum of physical efficiency as a foundation for the training for war. The old "star" system seems to have disappeared, and the aim hereafter is to be the good of the individual who needs the training. Along with this, however, intercollegiate athletics are to be carried on, and there will be no lack of the zest of competition, both intercollegiate and intramural.

Forest Club Annual Is New Publication Copies of the 1918 Forest club annual, published by members of the Forest club, college of forestry, University of Washington, are being received by members of the district forest service. The annual is dedicated to the boys "over there," and for the frontlines is a large service flag containing 101 stars, two of them in gold for H. A. Reese and Roy Munaster.

Articles are in the annual by A. G. Jackson, '10, forest examiner at the district forest service, on "Wartime Activities of the Forest Service," William F. Ogburn, professor of sociology at University of Washington and formerly of Reed college, on "Causes and Remedies of Labor Unrest in the Lumber Industry," "Possibilities of Future Airplane Spruce Production in the Pacific Northwest," by Axel J. F. Brandt, assistant professor of forestry, University of Washington.

Wood Preserving Industry in the Pacific Northwest, by Axel J. F. Brandt, assistant professor of forestry, University of Washington.

The Bugle Call

summons all the forces and resources of the Republic to the defense of Freedom.

The Oregon Agricultural College

which the U. S. Military authorities have ranked as one of the fifteen distinguished institutions of the country for excellence in military training, has responded to the call. The College is distinguished not only for its military instruction, but

DINTINGUISHED also for— Its strong industrial courses for men and for women: In Agriculture, Commerce, Engineering, Forestry, Home Economics, Mining, Pharmacy, and Vocational Education.

Its wholesome, purposeful student life. Its democratic college spirit. Its successful graduates.

Students enrolled last year, 3453; stars on its service flags, 1258, over 40 per cent representing officers.

253 Students Take O. A. C. Summer Work

Corvallis, Or., July 20. — Summer school students at Oregon Agricultural college numbering 253 come from 27 colleges in Oregon and from six other states and the Philippine Islands.

California and Idaho each sent nine students, Washington seven, Iowa, Indiana and North Dakota one each. Benton county with 112, is far ahead of the other Oregon counties in number of registrations. Washington, Multnomah and Marion counties each next, Multnomah with 20 and Marion with 15.

Department of Education Y.M.C.A. of Education War Needs—Training and Education

If you are ready for advancement and for war service in Commercial life, Industrial life, or in Military activities, get your special training now. Where will you be in the After the War program?

The following courses are offered to meet special needs:

- Radio Telegraphy
- Automobile
- Aviation Engines
- Business
- Stenography
- Electrical Engineering
- College Preparatory
- Accountancy
- Law
- Mechanical Drawing
- Marine Engineering
- Ship Construction
- Chemistry
- Pharmacy

Portland Art School To Begin Tenth Year

The school of the Portland Art association begins its tenth year September 30. The regular classes of the school comprise drawing, painting, quick sketching, composition, design weaving, pottery, block printing, lettering and other crafts; evening life and antique; special classes for children, and art history. In addition, there will be given next fall a special course for training aides in handicrafts approved by the government for work in military hospitals. There will be also a special short course, under the auspices of the Wednesday Art class, two hours a week covering "The Rudiments of Form," "The Principles of Design" and "The regular course covers three years' work for which a certificate is given. The instructors are H. F. Wentz, Helen Putnam, Clara J. Stephens and Henrietta H. Palling. Information and circulars may be obtained from Anna B. Crocker, curator, at the Museum of Art, Fifth and Taylor streets. The collections and lectures of the Portland Art association are open to the students of the Art school.

EMMA WILSON GILLESPIE, Principal MAIN 5854 384 MORRISON, PORTLAND

Take President Wilson's Advice GO TO COLLEGE

Addressing Himself to the High School Graduates of the Country, the Nation's Chief Executive Said:

"I would particularly urge upon the young people who are leaving our high schools that as many of them as can do so avail themselves this year of the opportunities offered by the colleges and technical schools, to the end that the country may not lack an adequate supply of trained men and women."

The University of Oregon offers training in many lines of military and civil service. It now ranks as a RESERVE OFFICERS' TRAINING CORPS, preparing its young men for commissions in the army. Complete courses in sciences useful in both war and peace are offered. More mathematics is given than at the West Point military academy. Chemistry, Physics, Biology (the pre-med course), Geology, Mechanics, Psychology—all useful in war. The usual liberal arts courses.

Home Economics and Business Courses for Women

Technical schools of the University fit women to take the places of the men called into military service. Schools of Architecture and the Arts, Commerce, Education, Journalism, Law, offer special training which is increasingly taken by young women in these days of emergency. The science courses are more than ever attractive to the women students. Physical Education courses train for reconstruction work.
