Pleasure Riding Discouraged, But Necessary Use Not Interfered With.

Washington, Aug. 30.—(I. N. S.)—The American automobile user has been put upon his honor in the observance of the fuel administration's recent request to eliminate all pleasure car riding on Sundays.

The fuel administration announced today that "just what is pleasure riding and what is necessary use of the automobiles must be decided by the individual. The United States fuel administration will not attempt to regulate automobile traffic on Sunday."

This request was made so that a large available gasoline reserve can be built up. It was officially reiterated today, so that shipments overseas may not be delayed.

The fuel administration's official statement, issued this afternoon follows: "The request made by the fuel administration that pleasure riding be discontinued on Sundays for the present in order to conserve our supplies of gasoline for war needs, was not intended to prohibit reasonable use of gasoline driven vehicles as the means of necessary transportation, where other means are not available."

"Mr. Garfield believes that the public will construe the request wisely and intelligently and will not use their automobiles for other than the most necessary purposes."

"The intention of the request is that all mere pleasure riding be eliminated, but that necessary use of the automobile be not interfered with."

ASTORIA MAYOR SAID TO BE BEHIND PLAN TO IMPORT CHINESE

Harley, It Is Alleged, Is Collecting Fund to Tear Down Bars, If Possible.

Astoria, Ore., Aug. 30.—F. C. Harley, mayor of Astoria, is alleged to be behind a movement to import cheap Chinese labor into this country. He is now touring the northwest collecting a fund from interested Chinese, and says that he is going to Washington to tear down the immigration bars, if it is possible to do so. He represents that the money which he is collecting from the Orientals is to defray the expenses of the trip and has stated that a bill permitting

Chinese labor to enter this country will be introduced and passed in congress. Chinese residents of Astoria, according to figures secured from Lin Jaw, of the Hop Hing Ling store, have contributed \$470 to the cause of the mayor and his oriental labor plan. Aw Dogg, a local Chinese contractor, is one of the heavy contributors.

Portland Chinese have also contributed to the mayor's immigration scheme, \$200 having been collected by him in that city.

Mayor Harley is now in Seattle seeking to enlist the Chinese of that city in his scheme. Reports received by local Chinese, however, indicate that he is meeting with little success.

Organized labor in Astoria is highly exercised over the action of the mayor. The men are strong in denunciation of the plan.

C. L. Wellington, financial secretary of the Carpenters' union, declared that organized labor is arrayed against such a plan which will cut prices so that a white man cannot exist, and Adolph Johnson, head of the building trades of the city, is bitterly against such a move.

A. H. T. Chan, formerly a tailor in this city, is touring the Northwest with Harley as an interpreter.

War, Experts Say, Has No Effect on World's Weather

Washington, Aug. 30.—(I. N. S.)—"There is nothing in it," the United States weather bureau announced today in reply to repeated inquiries as to whether the war affects rainfall or any other weather conditions.

The popular belief that conceptions, explosions and the liberation of gases in the European conflicts is having an effect on the weather, not only over the battlefields, but elsewhere on the globe, is only a fancy said the weather specialists.

Actual observations, made officially by several of the belligerent governments, refutes the idea of any effect of war on weather, says the Bureau.
