

PORTLAND BOYS MEMBER OF CREW SUB CHASER 292

Daring Crew of Craft Has Thrilling Part in Rescue of Northern Pacific Passengers.

WORK IS VERY DIFFICULT

Dash Is Made Into the Shallow Water at Great Risk; Falls in Love With Nurse.

A Portland boy who had a part in rescuing the troops of the stranded Northern Pacific which went ashore on Fire Island recently in Richard H. Figgins, of 448 East Fifty-first street north, a former Journal carrier who is in service on the sub-chaser 292 and writes his story to his mother as follows:

The last few days have been terribly cold and we are out here as we went out to the S. S. Northern Pacific which went ashore off Fire Island. There was a heavy sea running and it was pretty hard to get in close to shore and take off troops.

"We were called out the day she went ashore and by means of a rope, we took her up to the beach and brought them in. We went out a second time the next morning but could not get within 100 yards of her on account of the surf that was breaking over her stern.

"As we came near, the boys gave us lots of cheers but it would have been a mighty wet grave for us all if we had gone closer. We lay to all night and at 7 o'clock the next morning we went in through the first surf at 20 knots an hour, 100 yards from the shore line and in eight feet of water, so you see we had a small chance, but we got away with it. The officers on board gave three cheers for the U. S. sub-chaser 292, the first boat reaching her side. I was on watch, and so I came on deck and could see them taking movies of us from the beach.

"It was some dash. We knew what the New York papers would say. The Times headlines said 'Sub-chaser 292 Making Flying Dash Around Stern of Northern Pacific for Wounded' but to tell the truth, I never expected to come out of the engine room alive, for if we had struck the bottom, we would have turned over.

"We laid in behind her for high tide and took our 100 wounded, some with legs off and some without arms, and one poor chap without arms, legs or eyes, and still alive and he said he was feeling fine. That's war, I'll say.

"We made six trips to the ship, watching our chaps to catch just the right wave, in the three days taking off 594 men. The sub-chasers 291, 293 and 294 were also taking off troops.

"We came in last night and were all taken to the Manhattan hospital for treatment as they were afraid for us, as all the sailors had had colds. This morning when I awoke, a pretty nurse said, 'Good morning, Jack, how are you?' and I fell in love right away."

Writing from Les Cotes sur Merse, Sergeant James N. Wheeler, son of Mr. and Mrs. O. M. Wheeler, with the Fourth ammunition train, in service in France, tells of his experience in the neighborhood of the recent American drive as follows: "I sent you a helmet from Chateau Thierry and I saw more spoil there on the field than I hope to see in my life. The Hun sure left his goods and ran.

"We then went into the St. Mihiel drive with the Fifteenth colonial division (French) and on the 12th there we stopped at Andelot sur Marne where we rested six days. From St. Mihiel we jumped into the big drive and started on September 26 and our front was in the Argonne woods. Here our doughboys met stubborn resistance and it was one long, steady drive. We saw here Dead Man's hill and other places where the French were butchered four years ago. I have been through the silent streets of Verdun and Sarrebourg, the scarred hillsides. Can you imagine the streets about your home covered with barbed wire and trenches zig-zagging past our noses. The hills are seen to be honeycombed with dugouts and criss-crossed with trenches and wire with half the houses destroyed, and soldiers' crosses marking the resting places of the inhabitants in their graves. Some of these towns have been under fire for nearly four years.

"I think we celebrated more over the rumor of peace than when the news of the real peace came. When it really did come I couldn't believe it and we just sat around and looked at each other and said 'I'll be d—d,' for it took a long time to realize the truth.

"But the next day we were pulled out and sent to a place called Verdun and fitted for occupation service. But the only road that looks good to me now is the road home, and I hardly care if we don't get the honor of being the first troops into Germany."

Frank L. Healy, with Company A, machine gun battalion, writes from "somewhere in Germany" that he has been on the move almost constantly since the signing of the armistice and now is with the army of occupation in Germany.

"The French women have adopted a beautiful work of taking care of the graves of American boys buried here," writes J. E. Stevenson of Portland, who is in Y. M. C. A. service in France.

Writing from Paris, he continues: "One woman will take the grave of an American boy and make it her special work to care for it. In the new American cemetery which is being laid out by American soldiers. It is located on a beautiful spot on the Neuilly road overlooking Paris. There were a number of women in Paris today who, with loving hands, were putting the freshly made graves in order and planting shrubbery about them. They give us the real heart of the French people. Many an American mother will thank God in her heart that some other woman across the sea is performing the loving service that she would give if she could. The French greatly appreciate what the Americans have done in helping to hold the gates of Paris and cannot show their good will toward us in too many ways."

Private Milton Unger writes his parents from France, where he is stationed with the Twentieth Balloon company at a camp near Bordeaux. He says that the men have received excellent treatment and are provided with the best of food and also tobacco. Private Unger is the son of H. Unger of the Clyde hotel.

Brutal Murder Admitted Haverhill, Mass., Jan. 20.—(I. N. S.)—Charged with the brutal murder of his young wife and mother-in-law, Joseph E. Banforth was arraigned in court today. Banforth told the police his wife and mother-in-law had been nagging him about getting work and that in a fit of rage he killed them.

HELPS SAVE SOLDIERS ON NORTHERN PACIFIC

Richard H. Figgins

28 OFFICERS OF U. S. ARMY RECOMMENDED FOR SERVICE MEDALS

Among Number Is General Wm. C. Langfitt, Formerly of Portland.

Washington, Jan. 20.—(U. P.)—Upon the recommendation of General Pershing, distinguished service medals have been awarded to the following officers in the United States army:

- Brigadier General Stuart Heintzelman. Brigadier General Malin Craig. Brigadier General Robert C. Davis. Brigadier General Walter A. Buehler. Major General Andrew Brewster. Major General Harry L. Rogers. Major General Merritt W. Ireland. Colonel Walter E. McEwen. Colonel Alfred E. Bradley. Major General William C. Langfitt. Major General Mason M. Patrick. Major General Clarence C. Williams. Major General Charles G. Dawes. Major General James H. McRae. Major General John A. Lejeune. Major General Anson E. Ely. Major General Edmund Willenmeyer. Major General John P. O'Ryan. Major General Charles G. Morton. Major General E. M. Lewis. Major General William Lussiter. Major General James H. McRae. Major General George B. Duncan. Major General William Weigel. Major General William H. Johnson.

Major William C. Langfitt was stationed in Portland about 10 years ago, in charge of the United States engineers directing the improvement of the Columbia river.

Milton R. Klepper Stands Operation

Milton R. Klepper, chairman of the speakers' bureau of the Liberty loan committee, during the last drive, was operated on Sunday night at the Good Samaritan hospital for acute appendicitis. The operation was performed by Dr. J. K. Locke. This morning Mr. Klepper was reported as doing as well as could be expected. R. E. Klepper, a brother, from Seattle, is in the city.

Postpones Hearing On Lumber Tariff

Owing to developments, it has been found necessary to change the date of the hearing on the proposed tariff for January 23, to January 28, the meeting to convene at 10 a. m. at the Multnomah hotel. Important points concerning the proposed simplification of the present tariff, which will be to the benefit of producers and shippers in this section, will be reviewed.

Klamath Irrigators Elect Klamath Falls, Jan. 20.—R. E. Bradbury was elected to the directorate of the Klamath Irrigation district last Tuesday. The election was between Bradbury and Robert Cheyne. Bradbury received 48 votes, while Cheyne received 45.

Writing from Paris, he continues: "One woman will take the grave of an American boy and make it her special work to care for it. In the new American cemetery which is being laid out by American soldiers. It is located on a beautiful spot on the Neuilly road overlooking Paris. There were a number of women in Paris today who, with loving hands, were putting the freshly made graves in order and planting shrubbery about them. They give us the real heart of the French people. UNIFICATION IS THE ONLY SOLUTION OF PROBLEM OF LABOR

Lord Cecil Believes Laborers Should Own Shares in Industrial Plants.

London, Jan. 2.—(I. N. S., by Mail.)—"The great problem that faces the world today, I believe, is industrial unrest, and the only solution, as I view it, is for society to become more unified and for the workers to become co-partners in industry."

That was the statement made by Lord Robert Cecil, assistant foreign secretary of Great Britain, to American newspaper men recently. Lord Robert's family is one of the most famous in England. One of his ancestors was prime minister in Queen Elizabeth's reign.

The remark was prompted by a discussion of the great unrest that is sweeping all Europe, and has had such fearful consequences in Russia, from which land the Bolshevik propaganda has infiltrated into the Scandinavian countries, the Balkans, Holland and Spain.

"Higher wages and shorter hours will never settle the question," Lord Robert said. "Those measures are only palliatives. They do not go to the root of the trouble."

"I think the great remedy—is this a hobby of mine—is to make our population landowners, or, if they are employed in factories, that they shall be co-partners."

"You mean you would let them share in the profits?" a correspondent suggested. "Profit sharing is only a step," replied Lord Robert. "That's just one degree of partnership which the workers naturally would have. There must be more than that. They should be part owners."

St. Louis Invaded By Swarms of Flies

St. Louis, Mo., Jan. 20.—(I. N. S.)—The unseasonable warm weather St. Louis has experienced for nearly two weeks has brought swarms of flies and in many instances mosquitoes to the city. While flies are not very uncommon as they find warmth in homes, the mosquitoes are a rare thing, as the first frost usually scares them away. It is the belief of the health commission that the mosquitoes have developed in little pools of water where the sun had full play.

Similar Names Are Cause of Murder

Decatur, Texas, Jan. 20.—(U. P.)—Judge Hugh D. Spencer is dying today and William Bolger is awaiting a murder charge as a result of a similarity in the names of Bolger's wife and Spencer's divorced wife. Spencer wrote his former wife seeking reconciliation and a meeting. The letter was delivered to Mrs. Bolger and Bolger saw it Bolger shot Spencer and began shooting without seeking an explanation.

Thousands of Hogs Are Dying of "Flu" Aurora, Ill., Jan. 20.—Hogs are dying by the thousand in the rich farming districts of Wheatland and Plainfield, Ill., seemingly suffering from influenza and pneumonia with all the symptoms of the epidemic which show in humans. The animals contract a cold and acute pneumonia sets in. They are being given the serum vaccination treatment in an effort to stay the epidemic.

Norwegians to Help Restore Forests of Devastated France

By Bassett Digby Special Cable to The Journal and the Chicago Daily News. (Copyright, 1919, by Chicago Daily News Co.) Stockholm, Jan. 20.—Norway intends to help out the restoration of the devastated part of France in the front zone by planting a belt of Norwegian forest trees. Much enthusiasm has developed for the scheme and it is intended to begin this spring.

The plan comprises the planting of 250 acres annually for five years and the money is streaming in to Consul Lieberg in Christiania. The idea is to send a forestry party of about 50 Norwegians, fully equipped with trees, tools, tents and stores, so as not to impose the slightest burden upon France.

The tentative zone for planting the belt of trees is from the Adrennes toward the Belgian frontier behind Arras, where there formerly was a fine forest, but action will be taken in accordance with the desires of the French.

Success of Wilson Food Bill Declared Necessary to Peace

Washington, Jan. 20.—(I. N. S.)—President Wilson's position at the peace conference would be weakened and a renewal of the war be made practically inevitable, if the senate should defeat the president's request for \$100,000,000 with which to combat famine in Europe, Senator James Hamilton Lewis declared in the senate this afternoon.

"A defeat of this bill now dishonors the president and makes doubtful for all the sessions of the peace conference if he can thereafter succeed. It calls up disorder and anarchy among 50,000,000 distressed people, and beckons murder to the sons of American mothers. To pass this measure is the preservation of Americans—not charity to foreigners."

The charge that a large portion of the \$100,000,000 food appropriation asked by President Wilson for fighting famine in Europe is to be used in protecting the packers in this country from loss was made in the senate this afternoon by Chairman Gore of the senate agricultural committee.

Senator Gore gave as his authority the general manager of the Hammond-Standish packing house of Detroit, who told him the fund was to be used for stabilizing the price of pork products in this country.

Girls of France Appeal to Yanks

Chicago, Jan. 20.—Mlle. Yvonne Gall of the Chicago opera, a Parisienne and a relative of Marshal Petain, says it is true at least 250,000 Yanks will wed French girls. American soldiers, she says, are struck by the home life of French girls and never again will be satisfied with girls of their native country. She does not hold, however, that French girls have greater beauty or charm than their American cousins.

"Our girls are, perhaps, not as clever as yours," said the opera singer, "but they are more lovable, more appealing to the heart of a brave, good man. Here is the difference: "The French girl follows her husband; the American girl wants to lead him. "The French girl is happy in doing for the one she loves; the American girl demands he serve her. "French wives are helpmates of their husbands, not their slave drivers. "French daughters obey their parents; do not dictate to them. "French mothers are teachers of their children; not their servants. "Your wonderful American soldiers have seen all this and will not be content to be treated again as the American girls treat their sweethearts. If they come back to America, finally they will find it necessary to return to France, either to live there with a French girl or bring one back to the United States."

Pittock's Condition Reported Improved

Henry L. Pittock, president of the Northwestern bank and publisher of the Oregonian, who is seriously ill at his Imperial Heights home with influenza, was reported better today. Mr. Pittock was taken ill last Tuesday morning with a slight cold, which turned into influenza. Captain William M. Campbell, the family physician, came from Camp Lewis last night and is attending Mr. Pittock.

Jury Is Drawn A Jury was drawn in Circuit Judge Tucker's court this morning to try the case of the city against Richard K. Clark, charged with having liquor illegally in his possession. Clark was found guilty and fined \$100 in the municipal court June 21 last. The present proceedings are on appeal.
