(This Appeared in Sunday Journal) Flour Is Likey to Take Advance of About 10c a Sack

flour within the near future it would probably pay to secure it at once, for an advance of 40 cents a barrel is in the air and may be brought forward any day.

Due to the accumulated carrying charges of 10 cents a bushel which the government is charging millers for wheat above the first price paid to farmers, millers will soon be compelled to adjust their flour values upward. While some of the millers say they may not make a change for a short time because they have wheat at the old price, nevertheless others assert that wheat is worth 10 cents a bushel more and flour 40 cents a barrel more than current quotations on account of interest, insurance rates and handling charges no matter who owns the grain
