secretary of state.

but to prevent a vacancy.

CONTINUITY IN OFFICE

Provision Not to Fill

"The idea of the continuity of the office of chief executive of a state or nation is not new or strange. It is history. The most important and fundamental notion in all governments, of whatever form and everywhere, has always been to provide a succession of the executive power, instantaneous, automatic and effective by the sole force of antecedent

LITERAL MEANING PRESENTED Judge Pipes discusses the succession of kings and problems before the colonies before the republic of United States was formed, in providing for succession to office of the chief executive of state made in all states to guard against a hiatus occurring in the office of the

chief executive for a single moment. He also discusses the literal meaning of the language used in the Oregon conprovision relating 'to suc

cession in the office of governor and insists that "Not only logically and upon ing congress generally with Postmaster historical, political and judicial prin- General Burleson for alleged evils under

Service and Stockmen Adopt Plan to Prevent Overgrazing in National Forests.

To prevent the national forests from ecoming overgrazed and thus rendered useless for several years, a plan of rotation has been adopted by the forest service and the various stock associations, according to J. L. Peterson, grazing examiner of the forest service.

John Lawrence Goodell's mother was This plan is carried out by dividing daughter of Frank W. Benson, once the grazing areas according to altitude secretary of state of Oregon, who became ex-officio governor in 1909 when Governor Chamberlain was elected to or by streams. In the first instance the stock are grazed first on the lower altitude where the spring grasses are the United States senate. Benson was earlier, moving up the slope as the season advances. The highest altitudes 17, 1910.

are reached during the summer month with the oncoming of autumn. Move-ment of the stock is directed through Daring Fireman the distribution of the salt troughs. STREAMS FORM BOUNDARIES

In cases where the topography of the country is marked by streams, the stock is rotated along the different watersheds, the mountains between forming a natural barrier to their wandering. Special attention to grazing problems has been given in the Minam and Wallowa forests in Eastern Oregon. Here the forest is apportioned off to the various cattle and sheep growing James W. Crawford; secretary; John associations, common use areas where Manning, counselor, and Clarence H. Gilbert, W. S. Asher and J. B. Offner, both cattle and sheep may graze and small allotments for individual stock raisers.

ing. Before Balsiger could reach the land, as they are used to this type of shut off valve he had to find his way territory in Eastern Oregon. To show the methods of grazing, the effects of overgrazing, salt distribution, unaided through the basement and then and plants that are poisonous to cattle and sheep, the grazing department of of his company says Balsiger deserves nent Oregon men interested in the the forest service has prepared a set considerable credit.

of enlarged pictures, mounted plants and graphic diagrams and maps. LARKSPUR IS DEADLY

The total cattle losses due to poison larkspur in 1918 amounted to \$15,850. according to Mr. Peterson. During the year 1933 acres were" grubbed out at a cost of about \$5.19 per acre. Death camas causes the greatest

sheep loss. In one locality alone, 900 Tuesday evening held a Roosevelt high- sheep out of a total flock of 2000 died from the effects of the plant.
