Nearsightedness means changes

Anyone wearing glasses because of nearsightedness really ought to watch the strength of their eyes very closely. Nearsighted eyes change strength frequently, and therefore need to be examined about three times a year, instead of annually.

If there is no need to change lenses, we will tell you so. If there is, we need, you ought to know it for your eyes' sake.

The Cheapest Luxury on Earth

WHEN you want bread for dinner do you heave a sigh of dread and fuss around in the kitchen over pans, board, rolling pin and a hot stove for an hour or so? If you do you are missing Life's Greatest Luxury. Right here—in your town is a kitchen full of expert chefs making the purest and the best in bread—and the name of it is

New York Bakery

Will Gompers Kill Red Leadership in Labor's Ranks

As many observers see it, the calling of the steel strike at this time reveals the purpose of certain revolutionary radicals to wrest control of the American Federation of Labor from the hands of Mr. Gompers and the other moderate-minded leaders and place the Reds in the saddle, thus making it "the first gun of the industrial revolution." Senator Kenyon declares that the strike is "the first skirmish in an industrial war in the United States" and the New York Times agrees that "it is industrial war in which the leaders are radicals, social and industrial revolutionaries, while their followers are chiefly the foreign element among the steel workers, steeped in the doctrines of the class struggle and social overthrow, ignorant and easily misled."
