Peoples

The glamor and romance surrounding the nomadic life of the English gypsies has been put on the screen by Maurice Tourneur in his new production for Paramount - Arteraft release, "The Life Line," which will be the attraction at the Peoples today. The story was originally entitled "The Romany Rye," by George R. Sims, and as a stage play was produced some 20 years ago at the Princess theatre, London. The theme centers around the attractive eader of the gypsy band, who is the real owner of a fine English estate, His fight for his inheritance leads to my exciting episodes, including a thrilling fire in a London theatre and a rescue at sea by means of a breeches buoy of the heroine from a sinking ship.

Majestic

Blossoms," the Griffith nasterpiece, will show at the Majestic for the last times today and tomorrow, and will be followed Monday by Mabel Normand in "When Doctors Disagree," new comedy. On the same program will be David Belasco in his first and only film performance, "A Star Overnight." Mabel Normand in "When Doctors Disagree" follows the success of "Sis Hopkins" and "The Pest" in decidedly different way. The new Goldwyn picture embodies all the elements that go to make a typical Mabel Normand production and at the same time it surpasses them all. There are undeniable reasons for this.

Of course, as in any community, there were some that would not even the danger signals. When they do not obey they have to suffer the punishment that always comes in one

Tinker looked out one day and then he sent a message to all the dwellers in the Great Forest to go to their homes and stay there as there was a great storm approaching.

"Oh, I don't know," said Jerry the Jay, "I guess I know when to come in."
"That may be," said Jenny Wrea, "but you better listen to what the King says or you'll be sorry." "The King may know about the storm coming, but I guess no storm ever hurt

"But there's always a first time to be hurt," replied Jenny.
"I'm not afraid anyway, so I'm going out to find some berries," and Jerry the Jay flew away, heedless of what the King had said.

He found some berries at the edge of the forest and began to eat his fill. But the other forest dwellers went to their homes. By and by the wind be-gan to blow and the tree tops swayed back and forth, but Jerry kept on eating berries. Then when it began to rain, he thought he would go back to

He spread his wings and raised into the air. But when he had reached wind was raging and it blew him every way. Before he could get his balance he banged into the branches of a great tree and broke his wing. His flying was done. He fluttered to the ground and crawled under a great burdock leaf. The rain came down in torrents and it was not long until poor Jerry the Jay stood in the water nearly to his breast feathers. It was in these weary moments that he had time to think.

High class which you happened to be in need of as you can and often do today.

By a curious law the manufacturers of pins were only allowed to sell them on January first and second each year and so when those days came around the women whose husbands could afford secured pin money from them and went out and got their pins.

Pins have become so very cheap in these days that we are rather careless with them, but the expression has continued to live, although today used, it means any allowance of money which a husband gives a wife for her personal expenses. Pins were known and used as long

ago as 1347 A. D. They were introduced into England in 1540. In 1824 an American named Might invented a machine for making pins which enabled them to be manufactured cheaply. About 1500 tons of iron and brass are made into pins every year in the United States. —From the Book of Wonde Published and Copyrighted by the Bureau of Industrial Education, Inc., Washington, D. C.
