munists and Cossacks of Russia. No impartial observer can leave soviet Russia today without delivering this message from millions of Russians terrified at the prospect of the coming winter with its hunger, cold and disease. MILITARY NOW BULES

From a dictatorship of the proletariat the soviet government is rapidly becoming a military dictatorship. The military situation now dominates every thing, and the civil functions of the soviet institutions are being taken over revolutionary defense councils Blockaded by its enemies, the soviet government is compelled to postpone reconstruction and concentrate all vital resources to the prosecution of the war which is waged with masterful organization and skill. There is strong sition to the severe war regime within the ranks of the Communists, a strong group of the latter standing against iron rule and for internal re-forms. But so long as the British and French keep Denikine, Yudenitch and Kolchak in the field, so long will soviet Russia be ruled by extremists and ex-MODERATES GAIN ON VICTORY

During my stay in Russia there was jects. one moment when the moderate Bolsheviki gained a big victory. There was uncovered in Moscow an extensive counter-revolutionary organization main taining intercourse with General Denikine, receiving financial support from Admiral Kolchak and preparing for the overthrow of the soviet government. There followed thousands of arrests by an extraordinary commission. General Denikine learned of the arrest of General Dimitrieff, one of the leaders of a secret officers' organizaion, he threatened the soviet government vireless that in case General Dimitrieff was executed reprisals would be taken. More than 100 persons responsible for the plot were shot as enemy agents. In the midst of this tension a nb was thrown into the hall where

This provoked the indignation of the considerably since it was thought that the bomb was thrown by members of the counter revolutionary organization at large. At the funeral of the victims of the explosion there was an imposing manifestation of soviet power. Certain communist sections marched under banof the bourgeoisie. For a day or two there was great anxiety lest there be a repetition of the outbreak of mass ussian People Are Supporting It terror such as followed the attempt on Lenin's life last year. However, the central committee of the communist party took quick action. Lenin, supported by the majority, carried the field against the terror and the extremist agitation was stopped. Later it was discovered that the bomb was thrown

I traveled by cattle, troop and passenger trains, of every description, for a distance of 1500 miles, and mixed with thousands of people of all classes. I talked with the Bolshevist and anti-Bolshevist leaders, and visited several unition factories as well as other plants. All the time I was gathering information as to the political, military economic conditions in soviet Rus sia; evidence of counter-revolutionary plots, Bolshevist executions and mis-rule; and proof of the terrible Denikin atrocities and frightful Ukrainian ponational relations of the soviet govern-ment and the fate of the Romanoff famfly, as well as a number of other sub-

> In spite of the seriousness of the economic and military situation, there is no reason to expect the speedy collapse of the soviet government. All the indications before my departure from Moscow were that General Denikin's successes were temporary and due to the fact that the Red army high command all its resources to complete the crushing of Admiral Kolchak, thereby giving General Denikin his opportunity. If it had been possible quickly to move reinforcements from the Siberian front against General Denikin the latter would not have advanced far, since the Red oldiers who drove General Kolchak back 1000 versts (about 660 miles), capturing 300,000 prisoners, destroying the entire Southern Kolchak army and opening the road to Turkestan, are imbued with an irresistible victory spirit. I saw thousands of them in Tula on the way to the Southern front from the Urals, being reviewed by Trotzky, saluting and cheering his greeting lustily. The cavalry was magnificent and there were infantry, artillery, machine guns and armored car detachments. Three airplanes and one enormous airship flew overhead. SHOULD REMOVE BLOCKADE The day I left Moscow the soviet army assumed a general offensive against the Denikine forces. Leon Trotaky, as well as the other leaders, were confident that the Red army would be able to drive him back.

There is no permanent solution of th Russian problem in forcing General Denikin, General Yudenitch and the monarchy upon the Russian people, let alone the iniquity of such a course. The only way to rid Russia of Communis control and allow the development of an advanced social democratic state lies through the removal of the blockade and the resumption of economic rela-
